

Relive the Moment

Vital Moment Reproduced with Exceptional Colors

PhotoVue Photographer
Monitor SW321C

To preserve the moment captured, the true colors have to be shown faithfully whether it's on screen or on paper. BenQ Photographer Monitor SW321C offers a wide range of colors with 99% Adobe RGB and 95% DCI-P3/Display-P3 color space to deliver brilliant colors. SW321C also supports HDR to bring you finest details and various video formats to present the real content. Featuring the latest technology, Paper Color Sync, SW321C simulates the photo-printing results to facilitate the photo re-touching process. Keep the moment and never let it fade away.

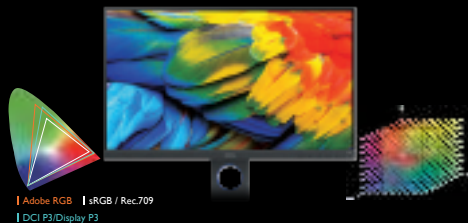

Because it matters

AQCOLOR™

Colors You Can Trust

Industry **STANDARD** | Displaying **DETAILS** | Out-of-the-Box **GUARANTEE**

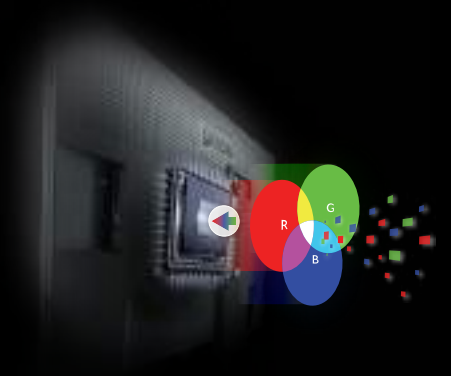

Industry Color Standards

Enrich Your Palette with 99% Adobe RGB

High color standards by 99% of Adobe RGB, 100% of sRGB/Rec.709, and 95% of DCI-P3/Display P3 result in a more realistic color representation for outdoor and nature photography.

Color Precision with 16 bit 3D (LUT) & Delta E≤2

The 16 bit 3D look up table (LUT) and precise Delta E≤2 in Adobe RGB and sRGB color spaces render the truest view of the original image with accurate colors.

HDR for Vibrant Images

SW321C is compatible with HDR10 and HLG formats so that videographers can preview the HDR effect of the video content, ensuring desirable outcomes for their final works.

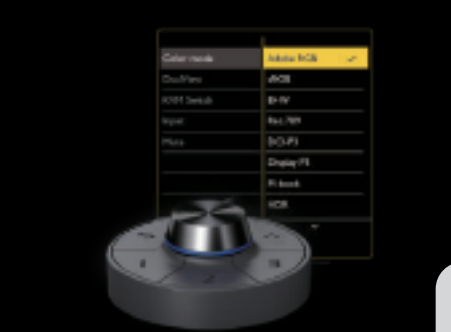

Video Format Supports Present the Real Content

SW321C supports 24P/25P film content to be displayed at native cadence without pulldown which can distort playback of the source video.

Hotkey Puck G2

Preferred color modes and features are designated as quick access to widely used settings.

*The transmission rate of USB-C™ can vary. *USB-C is compatible with Thunderbolt 3. *Please make sure your laptop's USB-C port supports DisplayPort Alt mode. * Please make sure the purchased cable is certified by USB-IF and is full-featured with power delivery and video / audio / data transfer functions.

Color Consistency in Every Detail

Uniformity Technology

BenQ Uniformity Technology fine-tunes the color and brightness of the hundreds of sub-regions across the entire screen and thus offers screen-wide precise color for perfectly authentic and consistent viewing experiences.

Hardware Calibration

Hardware calibration allows you to adjust the monitor's internal image processing chip, keeping displayed images consistent with the original content without being affected by graphic card setting.

Display Every Splendid Scene with Details

Intuitive Designs for Work Efficiency

Paper Color Sync

Paper Color Sync is a BenQ proprietary technology, saving your time and efforts in the re-editing and resetting process by simulating the printing results.

USB-C Port

The latest USB-C™ port provides high-speed video/audio/data transmission and power delivery with one single cable.

*The transmission rate of USB-C™ can vary. *USB-C is compatible with Thunderbolt 3. *Please make sure your laptop's USB-C port supports DisplayPort Alt mode. * Please make sure the purchased cable is certified by USB-IF and is full-featured with power delivery and video / audio / data transfer functions.
