Dell Display Manager User's Guide

Overview

Dell Display Manager is a Windows application used to manage a monitor or a group of monitors. It allows manual adjustment of the displayed image, assignment of automatic settings, energy management, image rotation and other features on select Dell models. Once installed, Dell Display Manager will run each time the system starts and will place its icon in the notification tray. Information about monitors connected to the system is always available when hovering over the notification tray icon.

Using the Quick Settings Dialog

Clicking Dell Display Manager's notification tray icon opens the Quick Settings dialog box. When more than one supported Dell model is connected to the system, a specific target monitor can be selected using the menu provided. The Quick Settings dialog box allows convenient adjustment of the monitor's Brightness and Contrast levels, Preset Modes can be manually selected or set to Auto Mode, and the screen resolution can be changed.

The Quick Settings dialog box also provides access to Dell Display Manager's advanced user interface which is used to adjust Basic functions, configure Auto Mode and access other features.

Setting Basic Display Functions

A Preset Mode for the selected monitor can be manually applied using the menu on the Basic tab. Alternatively, Auto Mode can be enabled. Auto Mode causes your preferred Preset Mode to be applied automatically when specific applications are active. An onscreen message momentarily displays the current Preset Mode whenever it changes.

The selected monitor's Brightness and Contrast can also be directly adjusted from the Basic tab.

Assigning Preset Modes to Applications

The Auto Mode tab allows you to associate a specific Preset Mode with a specific application, and apply it automatically. When Auto Mode is enabled, Dell Display Manager will automatically switch to the corresponding Preset Mode whenever the associated application is activated. The Preset Mode assigned to a particular application may be the same on each connected monitor, or it can vary from one monitor to the next. Dell Display Manager is pre-configured for many popular applications. To add a new application to the assignment list, simply drag the application from the desktop, Windows Start Menu or elsewhere, and drop it onto the current list.

NOTE: Preset Mode assignments targeting batch files, scripts, and loaders, as well as non-executable files such as zip archives or packed files, are not supported and will be ineffective.

Applying Energy Conservation Features

On supported Dell models the PowerNap tab will be available to provide energy conservation options. When the screensaver activates, the monitor's Brightness can automatically be set to minimum level or the monitor can be put to sleep in order to save additional power.

About Your Monitor

Package Contents

Your monitor ships with all the components shown below. Ensure that you have received all the components and **Contact Dell** if anything is missing.

NOTE: Some items may be optional and may not ship with your monitor. Some features or media may not be available in certain countries

	• Monitor
Mark 1	• Stand Riser
	• Stand Base
	• VESA™ Screw Cover
	• Power Cable (varies with countries)
	• VGA Cable
	• Quick Setup Guide • Product Information Guide

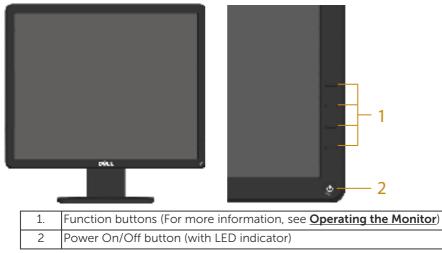

Product Features

The Dell E1715S flat-panel display has an active matrix, Thin-Film Transistor, Liquid Crystal Display. The monitor's features include:

- 43.2 cm (17 inches) diagonal viewable image size, 1280 x 1024 resolution, plus full-screen support for lower resolutions.
- LED backlit monitor
- Tilt adjustment capability.
- Removable pedestal and Video Electronics Standards Association (VESA) 100 mm mounting holes for flexible mounting solutions.
- Plug and play capability if supported by your system.
- On-Screen Display (OSD) adjustments for ease of set-up and screen optimization.
- Security lock slot.
- Asset Management Capability.
- CECP
- RoHS compliant.
- EPEAT registered where applicable. EPEAT registration varies by country. See <u>www.epeat.net</u> for registration status by country".

Monitor Specifications

The following sections give you information about the various power management modes and pin assignments for the various connectors of your monitor.

Power Management Modes

If you have VESA's DPM compliance display card or software installed in your PC, the monitor automatically reduces its power consumption when not in use. This is referred to as Power Save Mode. If the computer detects input from keyboard, mouse, or other input devices, the monitor automatically resumes functioning. The following table shows the power consumption and signaling of this automatic power saving feature:

E1715S:

VESA Modes	Horizontal		Video	Power	Power
	Sync	Sync		Indicator	Consumption
Normal operation	Active	Active	Active	White	15 W (Maximum) **
					11 W (Typical)
Active-off mode	Inactive	Inactive	Blank	Glowing	Less than 0.5 W
				white	
Switch off	-	-		Off	Less than 0.5 W *

The OSD will only function in the *normal operation* mode. When any button except power button is pressed in Active-off mode, the following messages will be displayed:

Dell E1715S

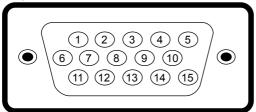

There is no signal coming from your computer. Press any key on the keyboard or move the mouse to wake it up. If there is no display, press the monitor button now to select the correct input source on the On-Screen-Display menu.

Activate the computer and monitor to gain access to the OSD.

- * Zero-power consumption in OFF mode can only be achieved by disconnecting the main cable from the monitor.
- ** Maximum power consumption with max luminance and contrast.

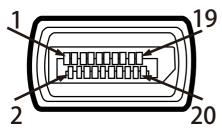

Pin Assignments

Plug and Play Capability

You can install the monitor in any Plug and Play compatible system. The monitor automatically provides the computer with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so that the system can configure itself and optimize the monitor settings. Most monitor installations are automatic. You can select different settings if required.

Flat-Panel Specifications

Model number	Dell E1715S monitor
Screen type	Active matrix - TFT LCD
Panel Type	TN
Viewable image dimensions:	
Diagonal	43.20 cm (17 inches)
Horizontal	337.92 mm (13.30 inches)
Vertical	270.33 mm (10.64 inches)
Area	91349.91 mm ² (141.59 inch ²)
Pixel pitch	0.264 mm
Viewing angle:	
Horizontal	170° typical
Vertical	160° typical
Luminance output	250 cd/m² (typical)
Contrast ratio	1000 to 1 (typical)
Faceplate coating	Antiglare with hard-coating 3H
Backlight	LED light bar system
Response Time	5 ms typical (black to white)
Color Depth	16.77 mil colors
Color Gamut	85 % (typical) **

** [E1715S] color gamut (typical) is based on CIE1976 (85 %) and CIE1931 (72 %) test standards.

Resolution Specifications

Model number	Dell E1715S monitor
Scan range	
• Horizontal	30 kHz to 81 kHz (automatic)
• Vertical	56 Hz to 76 Hz (automatic)
Maximum preset resolution	1280 x 1024 at 60 Hz

Electrical Specifications

Model number	Dell E1715S monitor
Video input signals	Analog RGB: 0.7 Volts +/- 5 %, 75 ohm input impedance
Synchronization input	Separate horizontal and vertical synchronizations,
signals	polarity-free TTL level, SOG (Composite SYNC on green)
AC input voltage /	100 VAC to 240 VAC/50 Hz or 60 Hz + 3 Hz/1.5 A (Max.)
frequency / current	
Inrush current	120 V: 30 A (Max.)
	240 V: 60 A (Max.)

Preset Display Modes

The following table lists the preset modes for which Dell guarantees image size and centering:

E1715S:

Display Mode	Horizontal Frequency (kHz)	Vertical Frequency (Hz)	Pixel Clock (MHz)	Sync Polarity (Horizontal/ Vertical)
VESA, 720 x 400	31.5	70.1	28.3	-/+
VESA, 640 x 480	31.5	59.9	25.2	-/-
VESA, 640 x 480	37.5	75.0	31.5	-/-
VESA, 800 x 600	37.9	60.3	40.0	+/+
VESA, 800 x 600	46.9	75.0	49.5	+/+
VESA, 1024 x 768	48.4	60.0	65.0	-/-
VESA, 1024 x 768	60.0	75.0	78.8	+/+
VESA, 1152 x 864	67.5	75.0	108.0	+/+
VESA, 1280 x 1024	64.0	60.0	108.0	+/+
VESA, 1280 x 1024	80.0	75.0	135.0	+/+

Physical Characteristics

The following table lists the monitor's physical characteristics:

Model Number	Dell E1715S monitor		
Connector type	D-subminiature, blue connector,		
	DisplayPort, black connector		
Signal cable type	Analog: Detachable, D-Sub, 15-pin		
	DP 1.2 signal input support, 20-pin, optional		
Dimensions: (with stand)			
Height	389.5 mm (15.33 inches)		
Width	374.5 mm (14.74 inches)		
Depth	165.5 mm (6.52 inches)		
Dimensions: (without stand)			
Height	306.9 mm (12.08 inches)		
Width	374.5 mm (14.74 inches)		

Depth	46.5 mm (1.83 inches)
Stand dimensions:	
Height	149.0 mm (5.87 inches)
• Width	180.5 mm (7.11 inches)
• Depth	165.5 mm (6.52 inches)
Weight:	
Weight with packaging	3.75 kg (8.24 lb)
Weight with stand assembly and cables	2.68 kg (5.90 lb)
Weight without stand assembly (For wall mount or VESA mount considerations - no cables)	2.08 kg (4.85 lb)
Weight of stand assembly	0.34 kg (0.75 lb)

Environmental Characteristics

The following table lists the environmental conditions for your monitor:

Model Number	Dell E1715S monitor
Temperature	
Operating	0 °C to 40 °C (32 °F to 104 °F)
Non-operating	Storage: -20 °C to 60 °C (-4 °F to 140 °F)
	Shipping: -20 °C to 60 °C (-4 °F to 140 °F)
Humidity	
 Operating 	10 % to 80 % (non-condensing)
 Non-operating 	Storage: 5 % to 90 % (non-condensing)
	Shipping: 5 % to 90 % (non-condensing)
Altitude	
Operating	5,000 m (16,387 ft) max
Non-operating	12,191 m (40,000 ft) max
Thermal dissipation	75.09 BTU/hour (maximum)
	61.43 BTU/hour (typical)

LCD Monitor Quality & Pixel Policy

During the LCD Monitor manufacturing process, it is not uncommon for one or more pixels to become fixed in an unchanging state. The visible result is a fixed pixel that appears as an extremely tiny dark or bright discolored spot. When the pixel remains permanently lit, it is known as a "bright dot." When the pixel remains black, it is known as a "dark dot."

In almost every case, these fixed pixels are hard to see and do not detract from display quality or usability. A display with 1 to 5 fixed pixels is considered normal and within competitive standards. For more information, see Dell Support site at:

http://www.dell.com/support/monitors.

Maintenance Guidelines

Caring for Your Monitor

CAUTION: Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.

For best practices, follow the instructions in the list below while unpacking, cleaning, or handling your monitor:

- To clean your antistatic screen, slightly dampen a soft, clean cloth with water. If possible, use a special screen-cleaning tissue or solution suitable for the antistatic coating. Do not use benzene, thinner, ammonia, abrasive cleaners, or compressed air.
- Use a slightly dampened, warm cloth to clean the plastics. Avoid using detergent of any kind as some detergents leave a milky film on the plastics.
- If you notice a white powder when you unpack your monitor, wipe it off with a cloth. This white powder occurs during the shipping of the monitor.
- Handle your monitor with care as a darker-colored monitor may scratch and show white scuff marks more than a lighter-colored monitor.
- To help maintain the best image quality on your monitor, use a dynamically changing screen saver and power off your monitor when not in use.
- **1.** The socket-outlet should be installed near the equipment and should be easily accessible.

2. The monitor is equipped with a three-pronged grounded plug, a plug with a third (grounding) pin.

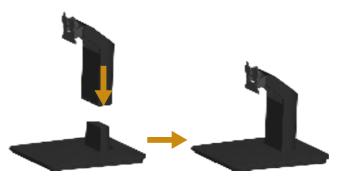

Setting Up the Monitor

Attaching the Stand

NOTE: The stand base is detached when the monitor is shipped from the factory.

1. Assemble the stand riser to stand base.

- **a.** Place the monitor stand base on a stable table top.
- **b.** Slide the monitor stand body in the correct direction down onto the stand base until it clicks into place.
- 2. Attach the stand assembly to the monitor:

- a. Place the monitor on a soft cloth or cushion near the edge of desk.
- **b.** Align the stand assembly bracket to the monitor groove.
- c. Insert the bracket towards monitor until it locks in place.

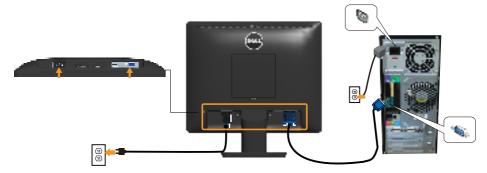

Connecting Your Monitor

MARNING: Before you begin any of the procedures in this section, follow the <u>Safety Instructions</u>.

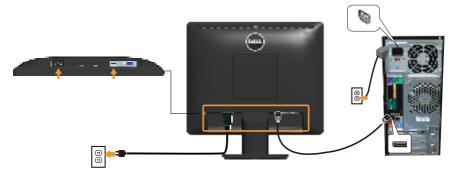

To connect your monitor to the computer:

- 1. Turn off your computer and disconnect the power cable.
- 2. Connect either the black (digital DP) or the blue (analog VGA) display connector cable to the corresponding video port on the back of your computer. Do not use both cables at the same time. Use both the cables only when they are connected to two different computers with appropriate video systems.

Connecting the blue VGA Cable

Connecting the black DP cable

Note: The graphics are used for the purpose of illustration only. Appearance on the computer may vary.

Removing the Monitor Stand

After placing the monitor panel on a soft cloth or cushion, complete the following steps to remove the stand:

- **1.** Use a long screwdriver to press and hold the release latch located in a hole just above the stand.
- **2.** While the release latch is pressed down, remove the stand from the monitor slowly.

Wall Mounting (Optional)

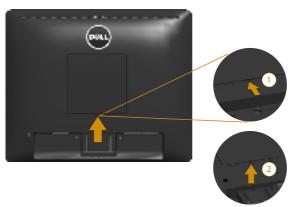

figure 2

(Screw dimension: M4 x 10 mm).

Refer to the instructions that come with the VESA-compatible base mounting kit.

- **1.** Place the monitor panel on a soft cloth or cushion on a stable flat table.
- 2. Remove the stand.
- 3. Remove the VESA[™] Screw Cover (figure 1)
- **4.** Use a screwdriver to remove the four screws securing the plastic cover. (figure 2)
- **5.** Attach the mounting bracket from the wall mounting kit to the LCD.
- **6.** Mount the LCD on the wall by following the instructions that came with the base-mounting kit.
- NOTE: For use only with UL-listed wall mount bracket with minimum weight/load bearing capacity of 9.00 kg.

Operating the Monitor

Power On the Monitor

Press the 🕘 button to turn on the monitor.

Using the Front-Panel Controls

Use the keys on the front of the monitor to adjust the image settings.

Front-Panel Keys		Description	
		Use the Preset modes key to choose from a list of preset color modes. See <u>Using the OSD Menu</u> .	
В	Brightness /Contrast	Use the Brightness / Contrast key to direct access to the "Brightness" and "Contrast" control menu.	
С	Menu	Use the Menu key to open the on-screen display (OSD).	
D	Exit	Use the Exit key to exit on-screen display (OSD) from menu and sub-menus.	

Front-Panel Keys

Front-Panel Keys		Description
A A Up		Use the Up key to adjust (increase ranges) items in the OSD menu.
B Down		Use the Down key to adjust (decrease ranges) items in the OSD menu.
С	OK	Use the OK key to confirm your selection.
D	Back	Use the Back key to go back to the previous menu.

Using the On-Screen Display (OSD) Menu

Accessing the Menu System

- **NOTE:** If you change the settings and then either proceed to another menu or exit the OSD menu, the monitor automatically saves those changes. The changes are also saved if you change the settings and then wait for the OSD menu to disappear.
 - 1. Press the 🕒 button to open the OSD menu and display the main menu.

Main Menu

OSD Messages

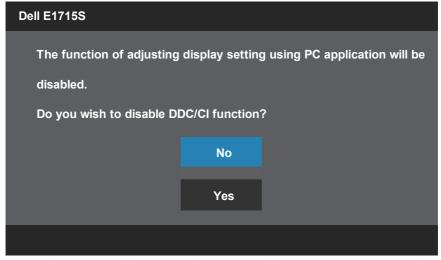

When the monitor does not support a particular resolution mode you will see the following message:

E1715S:

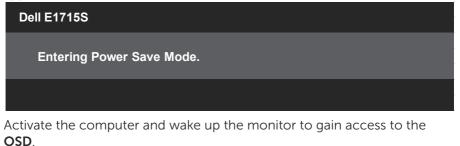

Dell E1715S
The current input timing is not supported by the monitor display. Please
change your input timing to 1280 X 1024, 60Hz or any other monitor
listed timing as per the monitor specifications.

This means that the monitor cannot synchronize with the signal that it is receiving from the computer. See <u>Monitor Specifications</u> for the horizontal and vertical frequency ranges addressable by this monitor. Recommended mode is 1280 x 1024.

You will see the following message before the DDC/CI function is disabled.

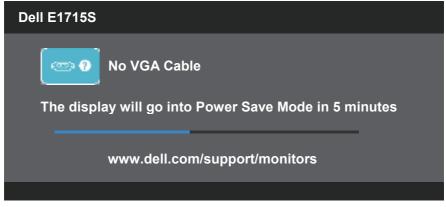

When the monitor enters the **Power Save** mode, the following message appears:

If you press any button other than the power button, the following messages will appear depending on the selected input:

Dell E1715S
There is no signal coming from your computer. Press any key on the keyboard or move the mouse to wake it up. If there is no display, press the monitor button now to select the correct input source on the On-Screen-Display menu.

If VGA or DP cable is not connected, a floating dialog box as shown below appears. The monitor will enter **Power Save Mode after 5 minutes** if left at this state.

See **Solving Problems** for more information.

Setting the Maximum Resolution

To set the maximum resolution for the monitor:

In Windows 7, Windows 8/Windows 8.1:

- **1.** For Windows 8/Windows 8.1 only, select the Desktop tile to switch to classic desktop.
- 2. Right-click on the desktop and click Screen Resolution.
- 3. Click the dropdown list of the screen resolution and select 1280 x 1024.
- 4. Click OK.

In Windows 10:

- 1. Right-click on the desktop and click **Display settings**.
- 2. Click Advanced display settings.
- 3. Click the dropdown list of **Resolution** and select 1280 x 1024.

4. Click Apply.

If you do not see 1280 x 1024 as an option, you may need to update your graphics driver. Depending on your computer, complete one of the following procedures:

If you have a Dell desktop or portable computer:

• Go to <u>www.dell.com/support</u>, enter your service tag, and download the latest driver for your graphics card.

If you are using a non-Dell computer (portable or desktop):

- Go to the support site for your computer and download the latest graphic drivers.
- Go to your graphics card website and download the latest graphic drivers.

Using the Tilt feature

Tilt

With the stand assembly, you can tilt the monitor for the most comfortable viewing angle.

NOTE: The stand base is detached when the monitor is shipped from the factory.

Troubleshooting

MARNING: Before you begin any of the procedures in this section, follow the <u>Safety Instructions</u>.

Self-Test

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

- 1. Turn off both your computer and the monitor.
- **2.** Unplug the video cable from the back of the computer. To ensure proper Self-Test operation, remove any connected video cable from the back of computer.
- 3. Turn on the monitor.

The floating dialog box should appear on-screen (against a black background) if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains white. Also, depending upon the selected input, one of the dialogs shown below will continuously scroll through the screen.

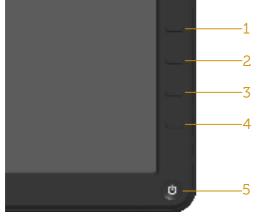

Dell E1715S
No VGA Cable The display will go into Power Save Mode in 5 minutes
www.dell.com/support/monitors

- This box also appears during normal system operation, if the video cable becomes disconnected or damaged. The monitor will enter Power Save Mode after 5 minutes if left at this state.
- **5.** Turn off your monitor and reconnect the video cable; then turn on both your computer and the monitor.

If your monitor screen remains blank after you use the previous procedure, check your video controller and computer, because your monitor is functioning properly.

Built-in Diagnostics

Your monitor has a built-in diagnostic tool that helps you determine if the screen abnormality you are experiencing is an inherent problem with your monitor, or with your computer and video card.

NOTE: You can run the built-in diagnostics only when the video cable is unplugged and the monitor is in self-test mode.

To run the built-in diagnostics:

- **1.** Ensure that the screen is clean (no dust particles on the surface of the screen).
- **2.** Unplug the video cable(s) from the back of the computer or monitor. The monitor then goes into the self-test mode.
- **3.** Press and hold the **Button 1** and **Button 4** on the front panel simultaneously for 2 seconds. A gray screen appears.
- 4. Carefully inspect the screen for abnormalities.
- **5.** Press the **Button 4** on the front panel again. The color of the screen changes to red.
- 6. Inspect the display for any abnormalities.
- **7.** Repeat steps 5 and 6 to inspect the display in green, blue, black, white screens.

The test is complete when the white screen appears. To exit, press the **Button 4** again.

If you do not detect any screen abnormalities upon using the built-in diagnostic tool, the monitor is functioning properly. Check the video card and computer.

Common Problems

The following table contains general information about common monitor problems you might encounter and the possible solutions.

Common	What You	Possible Solutions
Symptoms	Experience	
No Video/Power LED off	No picture	 Ensure that the video cable connecting the monitor and the computer is properly connected and secure. Verify that the power outlet is functioning properly using any other electrical equipment. Ensure that the power button is depressed fully. Check the LED Button option under Energy Setting in OSD menu
No Video/Power LED on	No picture or no brightness	 Increase brightness & contrast controls via OSD. Perform monitor self-test feature check. Check for bent or broken pins in the video cable connector. Ensure that the correct input source is selected via the Input. Source Select menu. Run the built-in diagnostics.
Poor Focus	Picture is fuzzy, blurry, or ghosting	
Shaky/Jittery Video	Wavy picture or fine movement	 Perform Auto Adjust via OSD. Adjust the Phase and Pixel Clock controls via OSD. Reset the monitor to Factory Settings. Check environmental factors. Relocate the monitor and test in another room.
Missing Pixels	LCD screen has spots	 Cycle power on-off. Pixel that is permanently off is a natural defect that can occur in LCD technology. For more information on Dell Monitor Quality and Pixel Policy,
		see Dell Support site at:
		www.dell.com/support/monitors

Stuck-on Pixels	LCD screen has bright spots	 Cycle power on-off. Pixel that is permanently off is a natural defect that can occur in LCD technology.
		For more information on Dell
		Monitor Quality and Pixel Policy,
		see Dell Support site at:
		www.dell.com/support/monitors.
Brightness Problems	Picture too dim or too bright	Settings. • Auto Adjust via OSD. • Adjust brightness & contrast controls via OSD.
Geometric Distortion	Screen not centered correctly	 Reset the monitor to Factory Settings. Auto Adjust via OSD. Adjust brightness & contrast controls via OSD. NOTE: When using 'DP', the
		positioning adjustments are not
		available.
Horizontal/Vertical Lines	Screen has one or more lines	 Reset the monitor to Factory Settings. Perform Auto Adjust via OSD. Adjust Phase and Pixel Clock controls via OSD. Perform monitor self-test feature check and determine if these lines are also in self-test mode. Check for bent or broken pins in the video cable connector. NOTE: When using 'DP', the Pixel Clock and Phase adjustments are not available.
Synchronization Problems	Screen is scrambled or appears torn	 Reset the monitor to Factory Settings. Perform Auto Adjust via OSD. Adjust Phase and Pixel Clock controls via OSD. Perform monitor self-test feature check to determine if the scrambled screen appears in self- test mode. Check for bent or broken pins in the video cable connector. Restart the computer in the safe mode.
Safety-Related Issues	Visible signs of smoke or sparks	 Do not perform any troubleshooting steps. Contact Dell immediately.

Intermittent Problems	Monitor malfunctions on & off	 Ensure that the video cable connecting the monitor to the computer is connected properly and is secure. Reset the monitor to Factory Settings. Perform monitor self-test feature check to determine if the intermittent problem occurs in self-test mode.
Missing Color	Picture missing color	 Perform monitor self-test feature check. Ensure that the video cable connecting the monitor to the computer is connected properly and is secure. Check for bent or broken pins in the video cable connector.
Wrong Color	Picture color not good	 Change the Color Setting Mode in the Color Settings OSD to Graphics or Video depending on the application. Try different Color Preset Settings in Color Settings OSD. Adjust R/G/B value in Color Settings OSD if the Color Management is turned off. Change the Input Color Format to PC RGB or YPbPr in the Advance Setting OSD.
Image retention from a static image left on the monitor for a long period of time	Faint shadow from the static image displayed appears on the screen	

Product-Specific Problems

Specific Symptoms	What You	Possible Solutions
	Experience	
Screen image is too small Cannot adjust the monitor with the buttons on the front panel	Image is centered on screen, but does not fill entire viewing area OSD does not appear on the screen	 Reset the monitor to Factory Settings. Turn off the monitor, unplug the power cord, plug back, and then turn on the monitor.
No Input Signal when user controls are pressed	No picture, the LED light is white. When you press "up", "down" or "Menu" key, the message " No input signal" will appear.	 Check the signal source. Ensure the computer is not in the power saving mode by moving the mouse or pressing any key on the keyboard. Check whether the signal cable is plugged in properly. Re-plug the signal cable if necessary. Reset the computer or video player.
The picture does not fill the entire screen	The picture cannot fill the height or width of	• Run the built-in diagnostics.
	the screen	

NOTE: When choosing DP mode, the Auto Adjust function is not available.

Appendix

WARNING: Use of controls, adjustments, or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards, and/or mechanical hazards.

For information on safety instructions, see the Product Information Guide.

FCC Notices (U.S. Only) and Other Regulatory Information

For FCC notices and other regulatory information, see the regulatory compliance website located at <u>www.dell.com\regulatory_compliance</u>.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference
- (2) this device must accept any interference received including interference that may cause undesired operation

Contact Dell

For customers in the United States, call 800-WWW-DELL (800-999-3355).

NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area.

To get online monitor support content:

1. Visit www.dell.com/support/monitors

To contact Dell for sales, technical support, or customer service issues:

- 1. Visit <u>www.dell.com/support</u>.
- 2. Verify your country or region in the Choose A Country/Region drop-down menu at the top left of the page.
- 3. Click Contact Us on the top left side of the page.
- 4. Select the appropriate service or support link based on your need.
- 5. Choose the method of contacting Dell that is convenient for you.

Setting Up Your Monitor

Setting the display resolution to 1280 x 1024 (Maximum)

For optimal display performance while using the Microsoft Windows operating systems, set the display resolution to 1280 x 1024 pixels by performing the following steps:

In Windows 7, Windows 8/Windows 8.1:

- **1.** For Windows 8/Windows 8.1 only, select the Desktop tile to switch to classic desktop.
- 2. Right-click on the desktop and click Screen Resolution.
- 3. Click the dropdown list of the screen resolution and select 1280 x 1024.
- 4. Click OK.

In Windows 10:

- 1. Right-click on the desktop and click Display settings.
- 2. Click Advanced display settings.
- 3. Click the dropdown list of **Resolution** and select 1280 x 1024.

4. Click Apply.

If you do not see 1280 x 1024 as an option, you may need to update your graphics driver. Please choose the scenario below that best describes the computer system you are using, and follow the provided

1: If you have a Dell desktop or a Dell portable computer with Internet access

2: If you have a non Dell desktop, portable computer, or graphics card

If you have a Dell desktop or a Dell portable computer with Internet access

- **1.** Go to <u>http://www.dell.com/support</u>, enter your service tag, and download the latest driver for your graphics
- **2.** After installing the drivers for your graphics adapter, attempt to set the resolution to 1280 x 1024 again.
- **NOTE**: If you are unable to set the resolution to 1280 x 1024, please contact Dell to inquire about a graphics adapter that supports these resolutions.

If you have a non Dell desktop, portable computer, or graphics card

In Windows 7, Windows 8/Windows 8.1:

- **1.** For Windows 8/Windows 8.1 only, select the Desktop tile to switch to classic desktop.
- 2. Right-click on the desktop and click Personalization.
- 3. Click Change Display Settings.
- 4. Click Advanced Settings.
- **5.** Identify your graphics controller supplier from the description at the top of the window (e.g. NVIDIA, ATI, Intel etc.).
- **6.** Please refer to the graphics card provider website for updated driver (for example, <u>http://www.ATI.com</u> OR <u>http://www.NVIDIA.com</u>).
- **7.** After installing the drivers for your graphics adapter, attempt to set the resolution to 1280 x 1024 again.

In Windows 10:

- 1. Right-click on the desktop and click **Display settings**.
- 2. Click Advanced display settings.
- 3. Click Display adapter properties.
- **4.** Identify your graphics controller supplier from the description at the top of the window (e.g. NVIDIA, ATI, Intel etc.).
- Please refer to the graphics card provider website for updated driver (for example, <u>http://www.ATI.com</u> OR <u>http://www.NVIDIA.com</u>).
- **6.** After installing the drivers for your graphics adapter, attempt to set the resolution to 1280 x 1024 again.
- **NOTE**: If you are unable to set the resolution to 1280 x 1024, please contact the manufacturer of your computer or consider purchasing a graphics adapter that will support the video resolution of 1280 x 1024.

Procedures for setting up dual monitors in Windows 7, Windows 8/Windows 8.1 or Windows 10

For Windows 7

Connect the external monitor(s) to your laptop or desktop using a video cable (VGA, DVI, DP, HDMI etc.) and follow any of the below setup methods.

Method 1: Using keyboard shortcut "Win+P"

1. Press the **Windows logo key** + **P** on your keyboard.

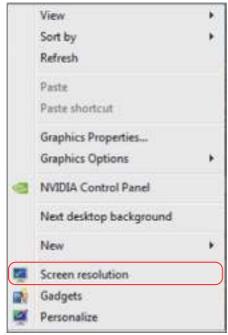

2. While holding down the **Windows logo key**, press **P** to toggle between the display selections.

Method 2: Using the "Screen Resolution" menu

1. Right-click on the desktop and click **Screen resolution**.

- 2. Click **Multiple displays** to choose a display selection. If you do not see the additional monitor listed, click **Detect**.
 - You may need to restart your system and repeat steps 1 to 3 if the system does not detect the added monitor.

For Windows 8/Windows 8.1

Connect the external monitor(s) to your laptop or desktop using a video cable (VGA, DVI, DP, HDMI etc.) and follow any of the below setup method.

Method 1: Using keyboard shortcut "Win+P"

- 1. Press the Windows logo key + P on your keyboard.
- 2. While holding down the **Windows logo key**, press **P** to toggle between the display selections.

Method 2: Using the "Screen Resolution" menu

1. From the Start screen, select **Desktop** tile to switch to the Classic Windows desktop.

2. Right-click on the desktop and click Screen resolution.

- **3.** Click **Multiple displays** to choose a display selection. If you do not see the additional monitor listed, click Detect.
 - You may need to restart your system and repeat steps 1 to 3 if the system does not detect the added monitor.

For Windows 8/Windows 8.1

• Extend these displays: This option is recommended when an external monitor is connected to a laptop, and each monitor can display different screen independently to improve user convenience. The relative position of the screens can be set up here, for example monitor 1 may be set up to be to the left of monitor 2 or vice versa. This depends on the physical position of the LCD monitor in relation to the laptop. The horizontal line displayed on both monitors can be based on the laptop or external monitor. These are all adjustable options, and all a user need do is drag the monitor of the main screen to the extended monitor.

• Show desktop only on...: Display the status of a particular monitor. This option is typically chosen when the laptop is used as a PC so the user can enjoy a large external monitor. Most current laptops support mainstream resolutions. As shown in the figure above, the resolution of the laptop monitor is only 1280 x 800, but after connecting a 27" external LCD monitor, users can immediately improve their visual enjoyment to 1920 x 1080 Full HD quality.

For Windows 10

Connect the external monitor(s) to your laptop or desktop using a video cable (VGA, DVI, DP, HDMI etc.) and follow any of the below setup method.

Method 1: Using keyboard shortcut "Win+P"

1. Press the Windows logo key + P on your keyboard.

2. While holding down the Windows logo key, press P to toggle between the display selections.

Method 2: Using the "Screen Resolution" menu

1. Right-click on the desktop and click **Display Settings**.

	Sort by	>
	Refresh	
	Paste	
	Paste shortcut	
	Undo Rename	Ctrl+Z
	New	>
	Display settings	
1	Personalize	

2. Click **Customize your display** to choose a display selection. If you do not see the additional monitor listed, click Detect.

• You may need to restart your system and repeat steps 1 to 2 if the system does not detect the added monitor.

Setting Display Styles For Multiple Monitors in Windows 10

After the external monitor(s) have been set up, users can select the desired display style from **Multiple displays** menu: Duplicate, Extend, Show only On, Disconnect.

• **Duplicate these displays:** Duplicate the same screen on two monitors with the same resolution, chosen based on the monitor with a lower resolution.

• Extend these displays: This option is recommended when an external monitor is connected to a laptop, and each monitor can display different screen independently to improve user convenience. The relative position of the screens can be set up here, for example monitor 1 may be set up to be to the left of monitor 2 or vice versa. This depends on the physical position of the LCD monitor in relation to the laptop. The horizontal line displayed on both monitors can be based on the laptop or external monitor. These are all adjustable options, and all a user need do is drag the monitor of the main screen to the extended monitor.

• Show only on...: Display the status of a particular monitor. This option is typically chosen when the laptop is used as a PC so the user can enjoy a large external monitor. Most current laptops support mainstream resolutions. As shown in the figure below, the resolution of the laptop monitor is only 1280 x 800, but after connecting a 27" external LCD monitor, users can immediately improve their visual enjoyment to 1920 x 1080 Full HD quality.
