# Product Features

The **Dell U2718Q** flat panel display has an active matrix, Thin-Film Transistor (TFT), Liquid Crystal Display (LCD) and LED backlight. The monitor features include:

- 68.47 cm (27-inch) viewable area display (measured diagonally). 3840 x 2160 (16:9) resolution, plus full-screen support for lower resolutions.
- Wide viewing angle to allow viewing from a sitting or standing position.
- Tilt, swivel, vertical extension, and rotation adjustment capabilities.
- Ultra-thin bezel minimizes the bezel gap in multi-monitor usage, enabling easier setup with an elegant viewing experience.
- Removable stand and Video Electronics Standards Association (VESA™) 100 mm mounting holes for flexible mounting solutions.
- Plug and play capability if supported by your system.
- Color gamut of 99.9% sRGB with an average Delta E  $\leq 2$ .
- HDR compatible with HDMI 2.0a.
- Extensive digital connectivity with DP, mDP, HDMI, and USB3.0 helps future-proof your monitor.
- On-Screen Display (OSD) adjustments for ease of setup and screen optimization.
- Software and documentation media includes an Information File (INF), Image Color Matching File (ICM), and product documentation.
- Dell Display Manager Software included (comes in the CD shipped with the monitor).
- Security lock slot.
- Stand lock.
- 0.3 W standby power when in the sleep mode.
- Optimizes eye comfort with a flicker-free screen.

**NOTE:** The possible long-term effects of blue light emission from the monitor may cause damage to the eyes, including eye fatigue or digital eye strain. ComfortView feature is designed to reduce the amount of blue light emitted from the monitor to optimize eye comfort.

## Power Management Modes

If you have VESA's DPM™ compliance display card or software installed in your PC, the monitor can automatically reduce its power consumption when not in use. This is referred to as *Power Save Mode*\*. If the computer detects input from the keyboard, mouse, or other input devices, the monitor automatically resumes functioning. The following table shows the power consumption and signaling of this automatic power saving feature.

| VESA Modes       | Horizontal Sync | Vertical Sync | Video   | Power Indicator  | Power Consumption                  |
|------------------|-----------------|---------------|---------|------------------|------------------------------------|
| Normal operation | Active          | Active        | Active  | White            | 99 W (maximum)**<br>30 W (typical) |
| Active-off mode  | Inactive        | Inactive      | Blanked | White (blinking) | Less than 0.3 W                    |
| Switch off       | -               | -             | -       | Off              | Less than 0.3 W                    |

| Energy Star      | Power Consumption |
|------------------|-------------------|
| P <sub>on</sub>  | 24.32 W           |
| E <sub>TEC</sub> | 76.39 kWh         |

The OSD functions only in the normal operation mode. When any button is pressed in the Active-off mode, the following message will be displayed:

Activate the computer and the monitor to gain access to the OSD.

 **NOTE:** The message may be slightly different according to the connected input signal.

 **NOTE:** This monitor is **ENERGY STAR®**-compliant.

 **NOTE:**

**P<sub>on</sub>:** Power consumption of on mode as defined in Energy Star 7.0 version.  
**E<sub>TEC</sub>:** Total energy consumption in kWh as defined in Energy Star 7.0 version.

\* Zero power consumption in OFF mode can only be achieved by disconnecting the main cable from the monitor.

\*\* Maximum power consumption with max luminance, and USB active.

# Plug and Play Capability

You can install the monitor in any Plug and Play-compatible system. The monitor automatically provides the computer system with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so the system can configure itself and optimize the monitor settings. Most monitor installations are automatic; you can select different settings if desired. For more information about changing the monitor settings, see [Operating the Monitor](#).

## Universal Serial Bus (USB) Interface

This section gives you information about the USB ports that are available on the monitor.

 **NOTE:** This monitor is Super-Speed USB 3.0 compatible.

| Transfer Speed | Data Rate | Power Consumption*     |
|----------------|-----------|------------------------|
| Super-speed    | 5 Gbps    | 4.5 W (Max, each port) |
| High speed     | 480 Mbps  | 4.5 W (Max, each port) |
| Full speed     | 12 Mbps   | 4.5 W (Max, each port) |

\* Up to 2A on USB downstream port (port with  battery icon) with BC1.2 compliance devices or normal USB devices.

## USB Upstream Connector

| Pin Number | 9-pin Side of the Connector |
|------------|-----------------------------|
| 1          | VCC                         |
| 2          | D-                          |
| 3          | D+                          |
| 4          | GND                         |
| 5          | SSTX-                       |
| 6          | SSTX+                       |
| 7          | GND                         |
| 8          | SSRX-                       |
| 9          | SSRX+                       |

# USB Downstream Connector

| Pin Number | 9-pin Side of the Connector |
|------------|-----------------------------|
| 1          | VCC                         |
| 2          | D-                          |
| 3          | D+                          |
| 4          | GND                         |
| 5          | SSRX-                       |
| 6          | SSRX+                       |
| 7          | GND                         |
| 8          | SSTX-                       |
| 9          | SSTX+                       |

## USB Ports

- 1 x USB 3.0 upstream - bottom
- 2 x USB 3.0 downstream - bottom
- 2 x USB 3.0 downstream - side
- Power Charging Port- the port with  battery icon; supports fast current charging capability if the device is BC1.2 compatible.

**NOTE:** USB 3.0 functionality requires a USB 3.0-capable computer.

**NOTE:** The monitor's USB interface works only when the monitor is On or in the power save mode. If you turn Off the monitor and then turn it On, the attached peripherals may take a few seconds to resume normal functionality.

## LCD Monitor Quality and Pixel Policy

During the LCD Monitor manufacturing process, it is not uncommon for one or more pixels to become fixed in an unchanging state which are hard to see and do not affect the display quality or usability. For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: <http://www.dell.com/support/monitors>.

# Maintenance Guidelines

## Cleaning Your Monitor

**CAUTION:** Read and follow the [Safety Instructions](#) before cleaning the monitor.

**WARNING:** Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.

For best practices, follow the instructions in the list below while unpacking, cleaning, or handling your monitor:

- To clean your anti-static screen, lightly dampen a soft, clean cloth with water. If possible, use a special screen-cleaning tissue or solution suitable for the anti-static coating. Do not use benzene, thinner, ammonia, abrasive cleaners, or compressed air.
- Use a lightly-dampened, warm cloth to clean the monitor. Avoid using detergent of any kind as some detergents leave a milky film on the monitor.
- If you notice white powder when you unpack your monitor, wipe it off with a cloth.
- Handle your monitor with care as a darker-colored monitor may get scratched and show white scuff marks more than a lighter-colored monitor.
- To help maintain the best image quality on your monitor, use a dynamically changing screen saver and turn Off your monitor when not in use.

# Setting Up the Monitor

---

## Attaching the Stand

**NOTE:** The stand is detached when the monitor is shipped from the factory.

**NOTE:** This is applicable for a monitor with a stand. When any other stand is bought, please refer to the respective stand setup guide for the setup instructions.

**CAUTION:** Do not remove the monitor from the packaging box before attaching the stand.

To attach the monitor stand:

- 1 Follow the instructions on the flaps of carton to remove the stand from the top cushion that secures it.
- 2 Insert the stand base blocks fully into the stand slot.
- 3 Lift the screw handle and turn the screw clockwise.
- 4 After fully tightening the screw, fold the screw handle flat within the recess.

- 5** Lift the cover, as shown, to expose the VESA area for stand assembly.

- 6** Attach the stand assembly to the monitor.
- a** Fit the two tabs on the upper part of the stand to the groove on the back of the monitor.
  - b** Press the stand down till it snaps into place.

- 7 Place the monitor upright.
- a Slide one hand in the cutout area on the bottom cushion and use the other hand to hold the stand.
  - b Lift the monitor carefully to prevent it from slipping or falling.

**CAUTION: Do not press on the panel screen when lifting the monitor.**

- 8 Remove the cover from the monitor.

# Connecting Your Monitor

**WARNING:** Before you begin any of the procedures in this section, follow the [Safety Instructions](#).

**NOTE:** Do not connect all cables to the computer at the same time.

To connect your monitor to the computer:

- 1 Turn Off your computer and disconnect the power cable.  
Connect the DP/Mini-DP to DP/HDMI cable from your monitor to the computer.

## Connecting the HDMI cable (Optional Purchase)

## Connecting the DisplayPort (Mini-DP to DP) cable

## Connecting the DisplayPort (DP to DP) cable (Optional Purchase)

**△ CAUTION:** The graphics are used for the purpose of illustration only. Appearance of the computer may vary.

## Connecting the USB 3.0 cable

After you have completed connecting the DP/Mini-DP to DP/HDMI cable, follow the procedures below to connect the USB 3.0 cable to the computer and complete your monitor setup:

- 1 Connect the upstream USB 3.0 port (cable supplied) to an appropriate USB 3.0 port on your computer.
- 2 Connect the USB 3.0 peripherals to the downstream USB 3.0 ports on the monitor.
- 3 Plug the power cables for your computer and monitor into a nearby outlet.

- 4 Turn On the monitor and the computer.  
If your monitor displays an image, installation is complete. If it does not display an image, see [Universal Serial Bus \(USB\) Specific Problems](#).
- 5 Use the cable slot on the monitor stand to organize the cables.

## Organizing Your Cables

After attaching all necessary cables to your monitor and computer, (See [Connecting Your Monitor](#) for cable attachment,) organize all cables as shown above.

## Removing the Monitor Stand

 **NOTE:** To prevent scratches on the LCD screen while removing the stand, ensure that the monitor is placed on a soft, clean surface.

 **NOTE:** This is applicable for a monitor with a stand. When any other stand is bought, please refer to the respective stand setup guide for the setup instructions

To remove the stand:

- 1 Place the monitor on a soft cloth or cushion.
- 2 Press and hold the stand release button.
- 3 Lift the stand up and away from the monitor.

## Wall Mounting (Optional)

(Screw dimension: M4 x 10 mm).

Refer to the instructions that come with the VESA-compatible wall mounting kit.

- 1 Place the monitor panel on a soft cloth or cushion on a stable, flat table.
- 2 Remove the stand.
- 3 Use a Phillips crosshead screwdriver to remove the four screws securing the plastic cover.

- 4 Attach the mounting bracket from the wall mounting kit to the monitor.
- 5 Mount the monitor on the wall by following the instructions that comes with the wall mounting kit.

**NOTE:** For use only with UL-listed wall mount bracket with minimum weight/load bearing capacity of 3.70 kg.

# Operating the Monitor

---

## Power On the Monitor

Press the  button to turn On the monitor.

## Using the Front Panel Controls

The front panel control buttons provide quick access to primary software functionalities for controlling the monitor.

The following table describes the front panel buttons:

| Front Panel Button  | Description   |
|---|---|
| 1<br><br>Shortcut key/<br>Preset Modes         | Use this button to choose from a list of preset color modes.  |

# Using the On-Screen Display (OSD) Menu

## Accessing the Menu System

 **NOTE:** If you change the settings and then either proceed to another menu or exit the OSD menu, the monitor automatically saves those changes. The changes are also saved if you change the settings and then wait for the OSD menu to disappear.

- 1 Press the  button to launch the OSD menu and display the main menu.

- 2 Press the  and  buttons to move between the setting options. As you move from one icon to another, the option name is highlighted. See the following table for a complete list of all the options available for the monitor.
- 3 Press the  button once to activate the highlighted option.
- 4 Press  and  button to select the desired parameter.
- 5 Press  to enter the submenu and then use the  and  buttons, according to the indicators on the menu, to make your changes.
- 6 Select the  button to return to the main menu.

| Icon   | Menu and Submenus  | Description  |

| <b>Auto Select</b>        | Turning on the function allows you to scan for available input sources.              |
| <b>Reset Input Source</b> | Reset your monitor input settings to the factory settings.                           |

### Color

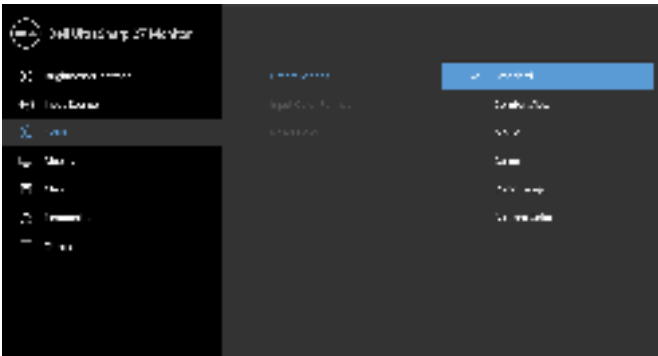

Use **Color** to adjust the color setting mode.

**Preset Modes** When you select **Preset Modes**, you can choose **Standard**, **ComfortView**, **Movie**, **Game**, **Color Temp.**, or **Custom Color** from the list.

- **Standard:** Loads the monitor's default color settings. This is the default preset mode.
- **ComfortView:** Decreases the level of the blue light emitted from the screen to make viewing more comfortable for your eyes.
- **Movie:** Loads color settings ideal for movies.
- **Game:** Loads color settings ideal for most gaming applications.
- **Color Temp.:** Allows users to select the color temperature: 5000K, 5700K, 6500K, 7500K, 9300K, and 10000K.
- **Custom Color:** Allows you to manually adjust the R, G, B color settings.

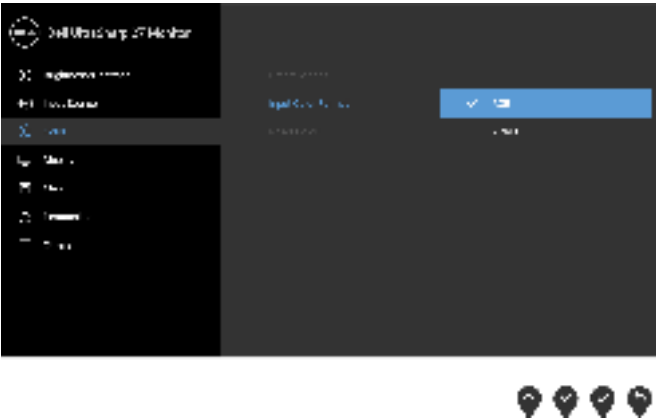

Press the  and  buttons to adjust the R, G, B colors values and create your own preset color mode.

**NOTE:** To reduce the risk of eye strain and neck/arm/back/shoulders pain from using the monitor for long periods of time, we suggest you:

- set the screen about 20 to 28 inches (50-70 cm) from your eyes.
- blink frequently to moisten or rewet your eyes when working with the monitor.
- take regular and frequent breaks for 20 minutes every two hours.
- look away from your monitor and gaze at a distant object at 20 feet away for at least 20 seconds during the breaks.
- perform stretches to relieve tension in the neck/arm/back/shoulders during the breaks.

## Personalize

**Shortcut Key 1/** Users can choose a feature from **Preset Modes, Brightness/Contrast, Shortcut Key 2** **Input Source, Aspect Ratio, Smart HDR, or Rotation** and set it as a shortcut key.

**Power Button LED** Allows you to set the power LED indicator On or Off when the monitor is active to save energy.

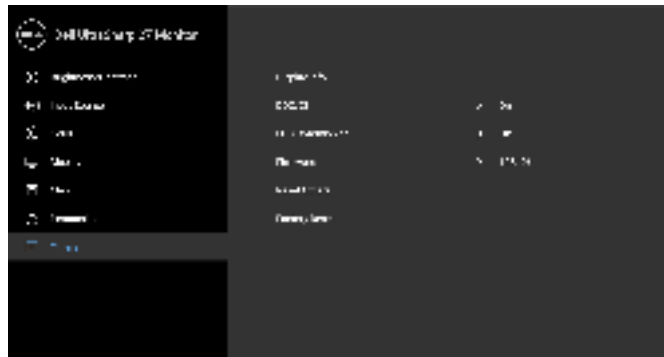

**USB** Allows you to enable or disable USB function during monitor standby mode.  
**NOTE:** USB On/Off During Standby mode is only available when the USB upstream cable is unplugged. This option will be greyed out when the USB upstream cable plugs in.

**Monitor Sleep** Allows you to let the monitor turn off automatically or stay on when your computer goes into sleep mode. When **Enable** is selected, the monitor goes to sleep as the system sleeps; when **Disable** is selected, you may prevent the screen from going off as the system sleeps for speedy display recovery from PC wake up.

**Reset Personalization** Reset all settings under the **Personalize** menu to the factory preset values.

## Others

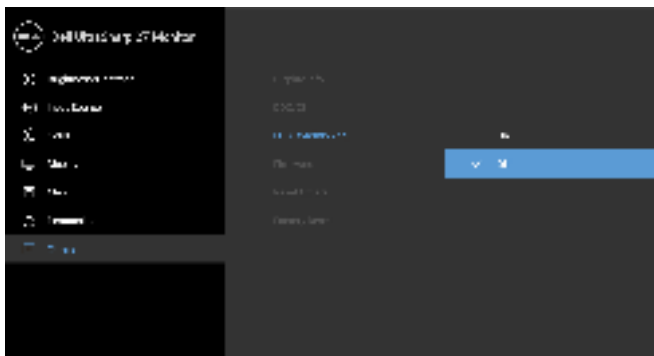

**Display Info** Displays the monitor's current settings.

**DDC/CI** **DDC/CI** (Display Data Channel/Command Interface) allows your monitor parameters (brightness, color balance, and etc.) to be adjustable via the software on your computer. You can disable this feature by selecting **Off**. Enable this feature for best user experience and optimum performance of your monitor.

## LCD

Helps reduce minor cases of image retention. Depending on the degree of image retention, the program may take some time to run. You can enable this feature by selecting **On**.

## Firmware

Displays the current firmware version.

## Reset Others

Resets all settings under the **Others** menu to the factory preset values.

## Factory Reset

Resets all settings to the factory preset values.

**NOTE:** This monitor has a built-in feature to automatically calibrate the brightness to compensate for LED aging.

## OSD Warning Messages

When the **Dynamic Contrast** feature is enabled (in these preset modes: **Game** or **Movie**), the manual brightness adjustment is disabled.

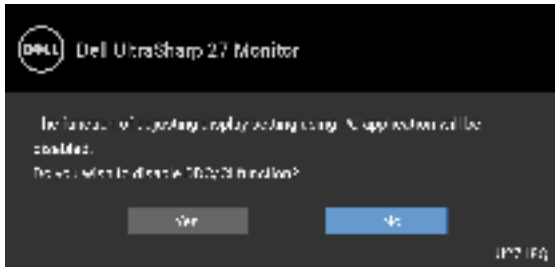

When the monitor does not support a particular resolution mode, you will see the following message:

**NOTE:** The message may be slightly different according to the connected input signal.

This means that the monitor cannot synchronize with the signal that it is receiving from the computer. See [Monitor Specifications](#) for the Horizontal and Vertical frequency ranges addressable by this monitor. Recommended mode is 3840 x 2160.

You will see the following message before the DDC/CI function is disabled:

When the monitor enters the **Power Save** mode, the following message appears:

Activate the computer and wake up the monitor to gain access to the [OSD](#).

**NOTE:** The message may be slightly different according to the connected input signal.

If you press any button other than the power button, the following message will appear depending on the selected input:

**NOTE:** The message may be slightly different according to the connected input signal.

If either DP, mDP, or HDMI input is selected and the corresponding cable is not connected, a floating dialog box as shown below appears.

**NOTE:** The message may be slightly different according to the connected input signal.

See [Troubleshooting](#) for more information.

## Setting the Maximum Resolution

To set the maximum resolution for the monitor:

In Windows® 7, Windows® 8, and Windows® 8.1:

- 1 For Windows® 8 and Windows® 8.1 only, select the Desktop tile to switch to classic desktop.
- 2 Right-click on the desktop and click **Screen Resolution**.
- 3 Click the Dropdown list of the Screen Resolution and select **3840 x 2160**.
- 4 Click **OK**.

In Windows® 10:

- 1 Right-click on the desktop and click **Display settings**.
- 2 Click **Advanced display settings**.
- 3 Click the dropdown list of **Resolution** and select **3840 x 2160**.
- 4 Click **Apply**.

If you do not see 3840 x 2160 as an option, you may need to update your graphics driver.

Depending on your computer, complete one of the following procedures:

If you have a Dell desktop or portable computer:

- Go to **<http://www.dell.com/support>**, enter your service tag, and download the latest driver for your graphics card.

If you are using a non-Dell computer (portable or desktop):

- Go to the support site for your computer and download the latest graphic drivers.
- Go to your graphics card website and download the latest graphic drivers.

# Using the Tilt, Swivel, and Vertical Extension

 **NOTE:** This is applicable for a monitor with a stand. When any other stand is bought, please refer to the respective stand setup guide for set up instructions.

## Tilt, Swivel

With the stand attached to the monitor, you can tilt and swivel the monitor for the most comfortable viewing angle.

 **NOTE:** The stand is detached when the monitor is shipped from the factory.

## Vertical Extension

 **NOTE:** The stand extends vertically up to 130 mm. The figure below illustrates how to extend the stand vertically.

# Rotating the Monitor

Before you rotate the monitor, your monitor should be fully vertically extended ([Vertical Extension](#)) and fully tilted up to avoid hitting the bottom edge of the monitor.

## Rotate clockwise

## Rotate counterclockwise

 **NOTE:** To use the Display Rotation function (Landscape versus Portrait view) with your Dell computer, you require an updated graphics driver that is not included with this monitor. To download the graphics driver, go to [www.dell.com/support](http://www.dell.com/support) and see the **Download** section for **Video Drivers** for latest driver updates.

 **NOTE:** When in the *Portrait View Mode*, you may experience performance degradation in graphic-intensive applications (3D Gaming and etc.).

## Adjusting the Rotation Display Settings of Your System

After you have rotated your monitor, you need to complete the procedure below to adjust the Rotation Display Settings of your system.

 **NOTE:** If you are using the monitor with a non-Dell computer, you need to go the graphics driver website or your computer manufacturer website for information on rotating the 'contents' on your display.

To adjust the Rotation Display Settings:

- 1 Right-click on the desktop and click **Properties**.
- 2 Select the **Settings** tab and click **Advanced**.
- 3 If you have an ATI graphics card, select the **Rotation** tab and set the preferred rotation.
- 4 If you have an nVidia graphics card, click the **nVidia** tab, in the left-hand column select **NVRotate**, and then select the preferred rotation.
- 5 If you have an Intel® graphics card, select the **Intel** graphics tab, click **Graphic Properties**, select the **Rotation** tab, and then set the preferred rotation.

 **NOTE:** If you do not see the rotation option or it is not working correctly, go to [www.dell.com/support](http://www.dell.com/support) and download the latest driver for your graphics card.

# Troubleshooting

---

**WARNING:** Before you begin any of the procedures in this section, follow the [Safety Instructions](#).

## Self-Test

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

- 1 Turn off both your computer and the monitor.
- 2 Unplug the video cable from the back of the computer.
- 3 Turn on the monitor.

The floating dialog box should appear on-screen (against a black background), if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains white. Also, depending upon the selected input, the dialog shown below will continuously scroll through the screen.

**NOTE:** The message may be slightly different according to the connected input signal.

- 4 This box also appears during normal system operation, if the video cable becomes disconnected or damaged.
- 5 Turn Off your monitor and reconnect the video cable; then turn On both your computer and the monitor.

If your monitor screen remains blank after you use the previous procedure, check your video controller and computer, because your monitor is functioning properly.

# Built-in Diagnostics

Your monitor has a built-in diagnostic tool that helps you determine if the screen abnormality you are experiencing is an inherent problem with your monitor, or with your computer and video card.

**NOTE:** You can run the built-in diagnostics only when the video cable is unplugged and the monitor is in *self-test mode*.

To run the built-in diagnostics:

- 1 Ensure that the screen is clean (no dust particles on the surface of the screen).
- 2 Unplug the video cable(s) from the back of the computer or monitor. The monitor then goes into the self-test mode.
- 3 Press and hold **Button 1** on the front panel for 5 seconds. A gray screen appears.
- 4 Carefully inspect the screen for abnormalities.
- 5 Press **Button 1** on the front panel again. The color of the screen changes to red.
- 6 Inspect the display for any abnormalities.
- 7 Repeat steps 5 and 6 to inspect the display in green, blue, black, white and text screens.

The test is complete when the text screen appears. To exit, press **Button 1** again.

If you do not detect any screen abnormalities upon using the built-in diagnostic tool, the monitor is functioning properly. Check the video card and computer.

# Common Problems

The following table contains general information about common monitor problems you might encounter and the possible solutions:

| Common Symptoms        | What You Experience                   | Possible Solutions   |
