Safety instructions

Use the following safety guidelines to protect your monitor from potential damage and to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that you have read the safety information that shipped with your monitor.

NOTE: Before using the monitor, read the safety information that is shipped with your monitor and printed on the product. Keep the documentation at a secure location for future reference.

⚠ WARNING: Use of controls, adjustments, or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards, and/or mechanical hazards.

⚠ WARNING: The possible long-term effect of listening to audio at high volume through the headphones (on monitor that support it) may cause damage to your hearing ability.

- Place the monitor on a solid surface and handle it carefully. The screen is fragile and can be damaged if dropped or hit with a sharp object.
- Ensure that your monitor is electrically rated to operate with the AC power available in your location.
- Keep the monitor in room temperature. Excessive cold or hot conditions can have an adverse effect on the liquid crystal of the display.
- Connect the power cable from the monitor to a wall outlet that is near and accessible. See Connecting your monitor.
- Do not place and use the monitor on a wet surface or near water.
- Do not subject the monitor to severe vibration or high impact conditions. For example, do not place the monitor inside a car trunk.
- Unplug the monitor when it is going to be left unused for an extended period.
- To avoid electric shock, do not attempt to remove any cover or touch the inside of the monitor.
- Read these instructions carefully. Keep this document for future reference. Follow all warnings and instructions marked on product.
- Certain monitors can be wall mounted using the VESA mount that is sold separately. Ensure to use the correct VESA specifications as mentioned in the wall mounting section of the *User's Guide*.

For information on safety instructions, see the *Safety, Environmental, and Regulatory Information (SERI)* document that is shipped with your monitor

About your monitor

Package contents

The following table provides the list of components that are shipped with your monitor. If any component is missing, contact Dell. For more information, see Contacting Dell.

NOTE: Some items may be optional and may not ship with your monitor. Some features may not be available in certain countries.

Component image	Component description
	Display
	Stand riser
	Stand base
	Power cable (varies by country)

	DisplayPort to DisplayPort cable (1.8 meters)
	Super speed USB 5 Gbps (USB 3.2 Gen1) Type-A to Type-B upstream cable (enables the USB ports on the monitor)
	• Quick Setup Guide • Safety, Environmental and Regulatory Information

Product features

The Dell P2423D/P2723D monitor has an active matrix, Thin-Film Transistor (TFT), Liquid Crystal Display (LCD), and LED backlight. The monitor features include:

- P2423D: 60.45 cm (23.8 in.) viewable area display (measured diagonally).
- P2723D: 68.47 cm (27 in.) viewable area display (measured diagonally).
- 2560 x 1440 resolution, with full-screen support for lower resolutions.
- Color gamut of 99% sRGB (typical).
- Digital connectivity with DisplayPort and HDMI.
- Equipped with 1 USB-B upstream port and 4 SuperSpeed USB 5 Gbps (USB 3.2 Gen1) Type-A downstream ports.
- Plug and play capability if supported by your computer.
- On-Screen Display (OSD) adjustments for ease of setup and screen optimization.
- Power and joystick buttons lock.
- Removable stand and Video Electronics Standards Association (VESA™) 100 mm mounting holes for flexible mounting solutions.
- Tilt, swivel, height, and rotate adjustment capabilities.
- Security lock slot.
- Stand lock.
- ≤0.3 W standby power when in Standby Mode.
- Supports Dell Display Manager.
- Optimize eye comfort with a flicker-free screen and low blue light feature.
- The monitor use Low Blue Light panel and compliance with TUV Rheinland (Hardware Solution) at factory reset/default setting model (Preset mode: Standard).

⚠ **WARNING: The possible long-term effects of blue light emission from the monitor may cause damage to the eyes, which includes but is not limited to eye fatigue and digital eye strain. ComfortView Plus feature is designed to reduce the amount of blue light emitted from the monitor to optimize eye comfort.**

Identifying parts and controls

Front view

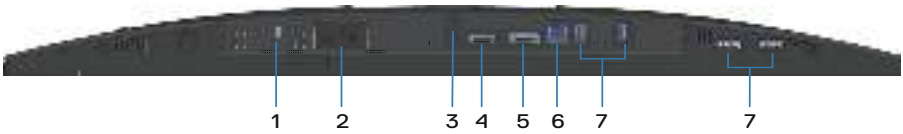
Label	Description
1	Power LED indicator Solid white light indicates that the monitor is turned on and functioning normally. Blinking white light indicates that the monitor is in Standby Mode.

Back view

Back View with monitor stand

Label	Description	Use
1	VESA mounting holes (100 mm x 100 mm - behind attached VESA Cover)	Wall-mount the monitor using VESA-compatible wall mount kit (100 mm x 100 mm).
2	Regulatory label	Lists the regulatory approvals.
3	Stand release button	Releases the stand from the monitor.
4	Barcode, serial number, and Service Tag label	Contains monitor details and support information. Refer to this label if you need to contact Dell for technical support.
5	Power On/Off button	To turn the monitor on or off.
6	Joystick	Use to control the OSD menu. (For more Information, see Operating your monitor)
7	Cable-management slot	Use to organize cables by inserting them through the slot.

Bottom view



Bottom view without monitor stand

Label	Description	Use
1	Security lock slot (based on Kensington Security Slot)	Secure your monitor using a security lock (purchased separately) to prevent unauthorized movement of your monitor.
2	Power connector	Connect the power cable (shipped with your monitor).
3	Stand lock	To lock the stand to the monitor using a M3 x 6 mm screw (screw not included).
4	HDMI port	Connect to your computer using a HDMI cable (purchased separately).
5	DisplayPort	Connect to your computer using a DisplayPort cable (shipped with your monitor).
6	USB 3.2 Gen1 upstream port	Connect the USB cable (shipped with your monitor) from this port to your computer to enable the USB ports on your monitor.
7	SuperSpeed USB 5 Gbps (USB 3.2 Gen1) Type-A downstream port (4)	Connect your USB devices. * **NOTE: To use these ports, you must connect the USB upstream cable (shipped with your monitor) between the monitor and the computer.**

*To avoid signal interference, when a wireless USB device has been connected to a USB downstream port, it is NOT recommended to connect any other USB devices to the adjacent port(s).

Monitor specifications

Model	P2423D	P2723D
Screen type	Active matrix-TFT LCD	
Panel type	In-Plane Switching Technology	
Aspect ratio	16:9	
Viewable image		
Diagonal	604.50 mm (23.80 in.)	684.70 mm (26.96 in.)
Horizontal, Active Area	526.85 mm (20.74 in.)	596.74 mm (23.49 in.)
Vertical, Active Area	296.35 mm (11.67 in.)	335.66 mm (13.21 in.)
Area	156132.00 mm^2 (242.01 $in.^2$)	200301.75 mm^2 (310.47 $in.^2$)
Native resolution and refresh rate	2560 x 1440 at 60 Hz	
Pixel pitch	0.2058 mm x 0.2058 mm	0.2331 mm x 0.2331 mm
Pixel per inch (PPI)	123	109
Viewing angle		
Horizontal	178° (typical)	
Vertical	178° (typical)	
Luminance output	300 cd/m² (typical)	350 cd/m² (typical)
Contrast ratio	1000 to 1 (typical)	
Display screen coating	Anti-glare treatment of the front polarizer (3H) hard coating	
Backlight	LED edgelight system	
Response time	5 ms (Fast mode) 8 ms (Normal mode)	
Color depth	16.7 million colors (8 bit)	
Color gamut	sRGB 99%(typical)	

Connectivity	1 x HDMI 1.4 (HDCP 1.4) 1 x DisplayPort 1.2 (HDCP 1.4) 1 x USB 3.2 Gen1 upstream 4 x SuperSpeed USB 5 Gbps (USB 3.2 Gen1) downstream	
Bezel width (edge of monitor to active area)		
Top	5.42 mm	7.37 mm
Left/Right	5.48 mm	7.43 mm
Bottom	16.72 mm	17.77 mm
Adjustability		
Height adjustable stand	150 mm	
Tilt	-5° to 21°	
Swivel	-45° to 45°	
Pivot	-90° to 90°	
Cable management	Yes	
Dell display manager compatibility	Easy Arrange and other key features	
Security	Security lock slot (cable lock optional purchase)	

Resolution specifications

Model	**P2423D/P2723D**
Horizontal scan range	29 kHz to 113 kHz
Vertical scan range	49 Hz to 75 Hz (automatic)
Maximum preset resolution	2560 x 1440 at 60 Hz

Supported video modes

Model	**P2423D/P2723D**
Video display capabilities (HDMI/DisplayPort)	480p, 576p, 720p, 1080i(HDMI), 1080p, 1440p

Preset display modes

Display Mode	Horizontal Frequency (kHz)	Vertical Frequency (Hz)	Pixel Clock (MHz)	Sync Polarity (Horizontal / Vertical)
IBM, 720 x 400	31.50	70.10	28.30	-/+
VESA, 640 x 480	31.50	59.90	25.20	-/-
VESA, 640 x 480	37.50	75.00	31.50	-/-
VESA, 800 x 600	37.90	60.30	40.00	+/+
VESA, 800 x 600	46.90	75.00	49.50	+/+
VESA, 1024 x 768	48.40	60.00	65.00	-/-
VESA, 1024 x 768	60.00	75.00	78.80	+/+
VESA, 1152 x 864	67.50	75.00	108.00	+/+
VESA, 1280 x 768	47.80	59.90	79.50	-/+
VESA, 1280 x 1024	64.00	60.00	108.00	+/+
VESA, 1280 x 1024	79.90	75.00	135.00	+/+
VESA, 1600 x 1200	75.00	60.00	162.00	+/+
VESA, 1680 x 1050	65.30	60.00	146.30	-/+
CTA, 1920 x 1080	67.50	60.00	148.50	+/+
VESA, 1920 x 1200	74.60	59.90	193.30	-/+
VESA, 2048 x 1080	66.60	60.00	147.20	+/-
VESA, 2560 x 1440	88.80	60.00	241.50	+/-

Electrical specifications

Model	P2423D	P2723D
Video input signals	•HDMI 1.4, 600 mV for each differential line, 100 ohm input impedance per differential pair •DisplayPort 1.2, 600 mV for each differential line, 100 ohm input impedance per differential pair	
AC input voltage/ frequency/current	100 VAC to 240 VAC / 50 Hz or 60 Hz ± 3 Hz / 1.5 A (typical)	
Inrush current	120 V: 30 A (max.) at 0°C (cold start) 240 V: 60 A (max.) at 0°C (cold start)	
Power consumption	0.3 W (Off mode)[1] 0.3 W (Standby Mode)[1] 16 W (On Mode)[1] 55 W (Max.)[2] 15.89 W (Pon)[3] 49.57 kWh (TEC)[3]	0.3 W (Off mode)[1] 0.3 W (Standby Mode)[1] 21 W (On Mode)[1] 55 W (Max.)[2] 17.89 W (Pon)[3] 55.76 kWh (TEC)[3]

[1] As defined in EU 2019/2021 and EU 2019/2013.

[2] Max brightness and contrast setting with maximum power loading on all USB ports.

[3] Pon: Power consumption of On Mode as defined in Energy Star 8.0 version..

TEC: Total energy consumption in kWh as defined in Energy Star 8.0 version.

This document is informational only and reflects laboratory performance. Your product may perform differently, depending on the software, components and peripherals you ordered and shall have no obligation to update such information.

Accordingly, the customer should not rely upon this information in making decisions about electrical tolerances or otherwise. No warranty as to accuracy or completeness is expressed or implied.

NOTE: This monitor is ENERGY STAR certified.

This product qualifies for ENERGY STAR in the factory default settings which can be restored by “Factory Reset” function in the OSD menu. Changing the factory default settings or enabling other features may increase power consumption that could exceed the ENERGY STAR specified limit.

Physical characteristics

Model	P2423D	P2723D
Signal cable type	• Digital: DisplayPort, 20 pins • Digital: HDMI, 19 pins (cable not included) • Universal Serial Bus: USB, 9 pins	
NOTE: Dell monitors are designed to work optimally with the video cables that are shipped with your monitor. As Dell does not have control over the different cable suppliers in the market, the type of material, connector and process used to manufacture these cables, Dell does not guarantee video performance on cables that are not shipped with your Dell monitor.		
Dimensions (with stand)		
Height (extended)	496.11 mm (19.53 in.)	535.20 mm (21.07 in.)
Height (compressed)	364.00 mm (14.33 in.)	385.20 mm (15.17 in.)
Width	537.80 mm (21.17 in.)	611.60 mm (24.08 in.)
Depth	179.57 mm (7.07 in.)	190.10 mm (7.48 in.)
Dimensions (without stand)		
Height	318.50 mm (12.54 in.)	360.80 mm (14.20 in.)
Width	537.80 mm (21.17 in.)	611.60 mm (24.08 in.)
Depth	52.15 mm (2.05 in.)	52.18 mm (2.05 in.)
Stand dimensions		
Height (extended)	410.80 mm (16.17 in.)	428.30 mm (16.86 in.)
Height (compressed)	364.00 mm (14.33 in.)	381.50 mm (15.02 in.)
Width	245.00 mm (9.65 in.)	268.00 mm (10.55 in.)
Depth	179.57 mm (7.07 in.)	190.10 mm (7.48 in.)
Base	245.00 x 173.00 mm (9.65 in. x 6.81 in.)	268.00 x 185.00 mm (10.55 in. x 7.28 in.)
Weight		
Weight with packaging	7.44 kg (16.40 lb)	9.20 kg (20.28 lb)
Weight with stand assembly and cables	5.45 kg (12.02 lb)	6.76 kg (14.90 lb)

Weight without stand assembly (For wall mount or VESA mount considerations - no cables)	3.44 kg (7.58 lb)	4.54 kg (10.01 lb)
Weight of stand assembly	1.63 kg (3.59 lb)	1.84 kg (4.06 lb)
Front-frame gloss	Black frame 2-4 gloss units	

Environmental characteristics

Model	**P2423D**	**P2723D**
Compliant Standards		
• ENERGY STAR certified monitor. • EPEAT registered where applicable. EPEAT registration varies by country. See **www.epeat.net** for registration status by country. • RoHS-compliant. • TCO Certified & TCO Certified Edge. • BFR/PVC free monitor (excluding external cables). • Meets NFPA 99 leakage current requirements. • Arsenic-free glass and Mercury-free for the panel only.		
Temperature		
Operating	0°C to 40°C (32°F to 104°F)	
Non-operating	• Storage: -20°C to 60°C (-4°F to 140°F) • Shipping: -20°C to 60°C (-4°F to 140°F)	
Humidity		
Operating	10% to 80% (non-condensing)	
Non-operating	• Storage 5% to 90% (non-condensing) • Shipping 5% to 90% (non-condensing)	
Altitude		
Operating (maximum)	5,000 m (16,400 ft)	
Non-operating (maximum)	12,192 m (40,000 ft)	
Thermal dissipation	• 188.10 BTU/hour (Maximum) • 54.72 BTU/hour (On Mode)	• 188.10 BTU/hour (Maximum) • 71.82 BTU/hour (On Mode)

8	SSRX-
9	SSRX+

USB downstream connector

Pin number	9-pin side of the connector
1	VCC
2	D-
3	D+
4	GND
5	SSRX-
6	SSRX+
7	GND
8	SSTX-
9	SSTX+

NOTE: SuperSpeed USB 5 Gbps (USB 3.2 Gen1) functionality requires a SuperSpeed USB 5 Gbps (USB 3.2 Gen1)-capable computer.

NOTE: The USB ports on the monitor work only when the monitor is turned On or in power save mode. If you turn Off the monitor and then turn it On, the attached peripherals may take a few seconds to resume normal functionality.

Plug and play capability

You can install the monitor in any Plug and Play-compatible system. The monitor automatically provides the computer system with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so the system can configure itself and optimize the monitor settings. Most monitor installations are automatic, you can select different settings if desired. For more information about changing the monitor settings, see Operating your monitor.

LCD monitor quality and pixel policy

During the LCD Monitor manufacturing process, it is not uncommon for one or more pixels to become fixed in an unchanging state which are hard to see and do not affect the display quality or usability. For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at **www.dell.com/pixelguidelines**.

Ergonomics

△ **CAUTION: Improper or prolonged usage of keyboard may result in injury.**

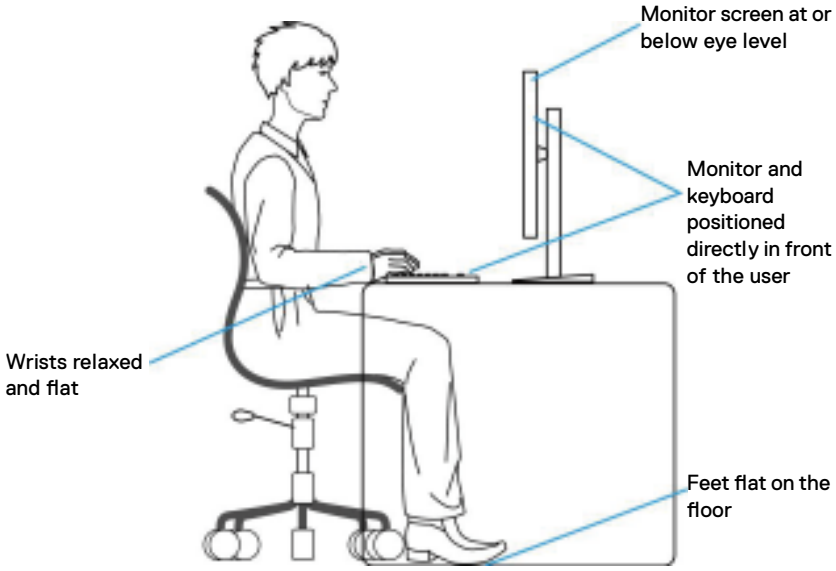
△ **CAUTION: Viewing the monitor screen for extended periods of time may result in eye strain.**

For comfort and efficiency, observe the following guidelines when setting up and using your computer workstation:

- Position your computer so that the monitor and keyboard are directly in front of you as you work. Special shelves are commercially available to help you correctly position your keyboard.
- To reduce the risk of eye strain and neck, arm, back, or shoulder pain from using the monitor for long period, we recommend you to:

1. Set the distance of the screen between 20 in. to 28 in. (50 cm - 70 cm) from your eyes.
2. Blink frequently to moisten your eyes or wet your eyes with water after prolonged usage of the monitor.
3. Take regular and frequent breaks for 20 minutes every two hours.
4. Look away from your monitor and gaze at a distant object at 20 feet away for at least 20 seconds during the breaks.
5. Perform stretches to relieve tension in the neck, arm, back, and shoulders during the breaks.

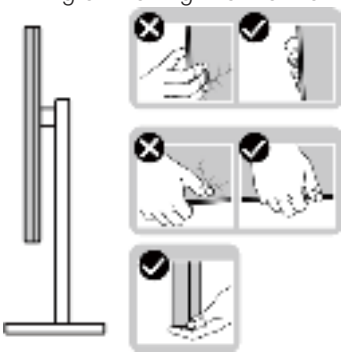
- Ensure that the monitor screen is at eye level or slightly lower when you are sitting in front of the monitor.
- Adjust the tilt of the monitor, its contrast, and brightness settings.
- Adjust the ambient lighting around you (such as overhead lights, desk lamps, and the curtains or blinds on nearby windows) to minimize reflections and glare on the monitor screen.
- Use a chair that provides good lower-back support.
- Keep your forearms horizontal with your wrists in a neutral, comfortable position while using the keyboard or mouse.
- Always leave space to rest your hands while using the keyboard or mouse.
- Let your upper arms rest naturally on both sides.
- Ensure that your feet are resting flat on the floor.
- When sitting, ensure that the weight of your legs is on your feet and not on the front portion of your seat. Adjust your chair's height or use a footrest if necessary to maintain a proper posture.
- Vary your work activities. Try to organize your work so that you do not have to sit and work for extended periods of time. Try to stand or get up and walk around at regular intervals.
- Keep the area under your desk clear of obstructions and cables or power cords that may interfere with comfortable seating or present a potential trip hazard.



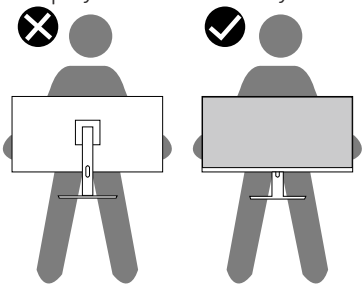
Handling and moving your display

To ensure that the monitor is handled safely when lifting or moving it, observe the following guidelines:

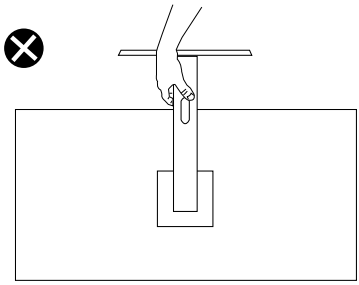
- Before moving or lifting the monitor, turn off your computer and the monitor.
- Disconnect all cables from the monitor.
- Place the monitor in the original box with the original packing materials.
- Hold the bottom edge and the side of the monitor firmly without applying excessive pressure when lifting or moving the monitor.



- When lifting or moving the monitor, ensure that the screen is facing away from you. Do not press on the display area to avoid any scratches or damage.



- When transporting the monitor, avoid any sudden shock or vibration to it.
- When lifting or moving the monitor, do not turn the monitor upside down while holding the stand base or stand riser. It may result in accidental damage to the monitor or cause personal injury.



Maintenance guidelines

Cleaning your monitor

⚠ **WARNING: Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.**

△ **CAUTION: Read and follow the** Safety instructions **before cleaning the monitor.**

⚠ **WARNING: Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.**

For best practices, follow the instructions in the list below when unpacking, cleaning, or handling your monitor:

- To clean the Dell monitor screen, lightly dampen a soft, clean cloth with water. If possible, use a special screen-cleaning tissue or solution suitable for the Dell monitor screen.

△ **CAUTION: Do not use detergents or other chemicals such as benzene, thinner, ammonia, abrasive cleaners, or compressed air.**

△ **CAUTION: Using chemicals for cleaning may cause changes in the appearance of the monitor, such as color fading, milky film on the monitor, deformation, uneven dark shade, and peeling of screen area.**

⚠ **WARNING: Do not spray the cleaning solution or even water directly on the surface of the monitor. Doing so will allow liquids to accumulate at the bottom of the display panel and corrode the electronics resulting in permanent damage. Instead, apply the cleaning solution or water to a soft cloth and then clean the monitor.**

NOTE: Monitor damage due to improper cleaning methods and the use of benzene, thinner, ammonia, abrasive cleaners, alcohol, compressed air, detergent of any kind will lead to a Customer Induced Damage (CID). CID is not covered under the standard Dell warranty.

- If you notice white powder when you unpack your monitor, wipe it off with a cloth.
- Handle your monitor with care as a dark-colored monitor may get scratched and show white scuff marks more than a light-colored monitor.
- To help maintain the best image quality on your monitor, use a dynamically changing screen saver and turn off your monitor when not in use

Setting up the monitor

Attaching the stand

NOTE: The stand is not installed at the factory when shipped.

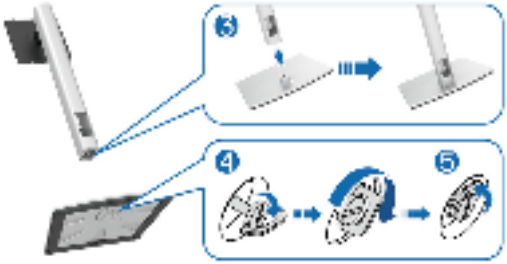
NOTE: The following instructions are applicable only for the stand that was shipped with your monitor. If you are attaching a stand that you purchased from any other source, follow the setup instructions that were included with the stand.

To attach the monitor stand:

1. Follow the instructions on the flaps of carton to remove the stand from the top cushion that secures it.
2. Remove the stand riser and stand base from the packaging cushion.

NOTE: The graphics are used for the purpose of illustration only. The appearance of the package cushion may vary.

3. Insert the stand base blocks fully into the stand slot.
4. Lift the screw handle and turn the screw clockwise.
5. After fully tightening the screw, fold the screw handle flat within the recess.



6. Lift the cover, as shown, to access the VESA area for stand assembly.

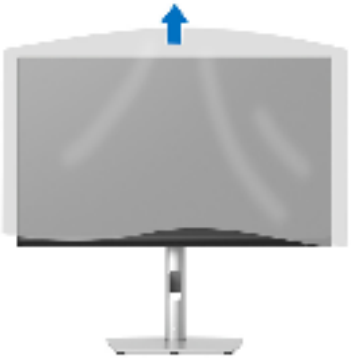
NOTE: Before attaching the stand assembly to the display, ensure that the front plate flap is opened to allow space for assembly.

7. Attach the stand assembly to the display.
   a. Fit the two tabs on the upper part of the stand to the groove on the back of the display.
   b. Press the stand down till it snaps into place.

8. Hold the stand riser and lift the monitor carefully, then place it on a flat surface.

NOTE: Lift the monitor carefully to prevent it from slipping or falling.

9. Remove the cover from the monitor.



Connecting your monitor

WARNING: Before you begin any of the procedures in this section, follow the Safety instructions.

NOTE: Dell monitors are designed to work optimally with Dell supplied inbox cables. Dell does not guarantee the video quality and performance if non-Dell cables are used.

NOTE: Route the cables through the cable-management slot before connecting them.

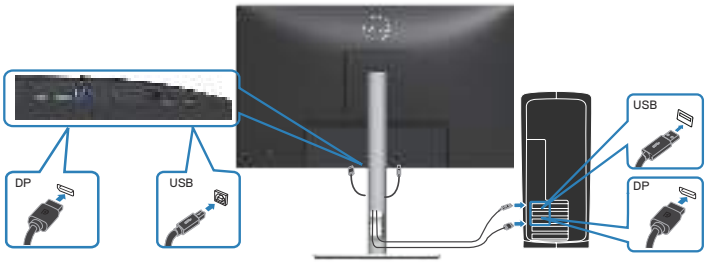
NOTE: Do not connect all cables to the computer at the same time.

NOTE: The images are for the purpose of illustration only. The appearance of the computer may vary.

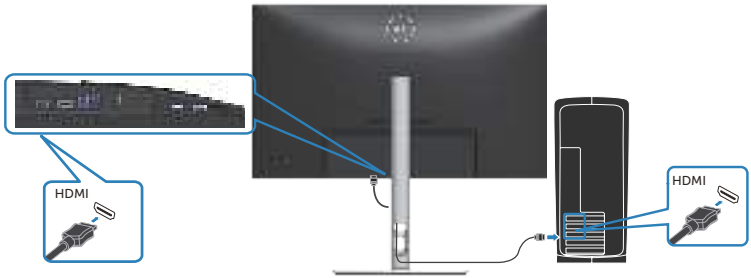
To connect your monitor to the computer:

1. Turn off your computer and disconnect the power cable.
2. Connect the DisplayPort or HDMI cable from your monitor to the computer.
3. Connect the USB upstream cable (shipped with your monitor) to an appropriate USB 3.2 Gen1 port on your computer. (See Bottom view for details.)
4. Connect the USB peripherals to the SuperSpeed USB 5 Gbps (USB 3.2 Gen1) on the monitor.

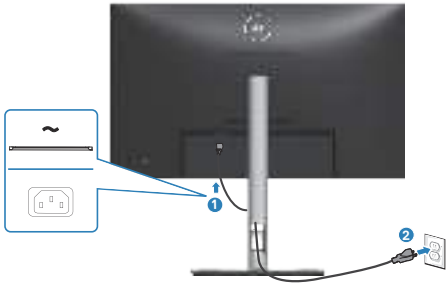
Connecting the DisplayPort and USB cable



Connecting the HDMI cable (optional)



5. Connect the power cables from your computer and monitor into a wall outlet.



Organizing cables

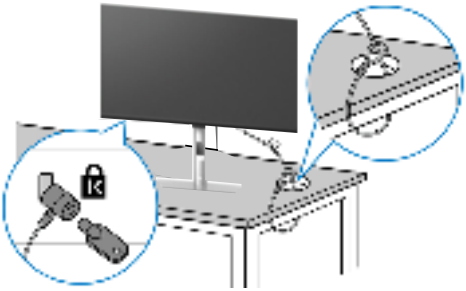
Use the cable-management slot to route the cables connected to your monitor.

6. Turn on the Monitor.

Securing your monitor using Kensington lock (optional)

The security lock slot is located at the bottom of the monitor. (see Security lock slot). Secure your monitor to a table using the Kensington security lock.

For more information on using the Kensington lock (sold separately), see the documentation that is shipped with the lock.



NOTE: The image is for the purpose of illustration only. The appearance of the lock may vary.

Removing the monitor stand

NOTE: To prevent scratches on the LCD screen when removing the stand, ensure that the monitor is placed on a soft surface and handle it carefully.

NOTE: The following steps are specifically for removing the stand that is shipped with your monitor. If you are removing a stand that you purchased from any other source, follow the setup instructions that are included with the stand.

To remove the stand:

1. Place the monitor on a soft cloth or cushion.
2. Press and hold the stand release button.
3. Lift the stand up and away from the monitor.

VESA wall mounting (optional)

(Screw dimension: M4 x 10 mm).

See the documentation that shipped with the VESA-compatible wall mounting kit.

1. Place the display on a soft cloth or cushion at the edge of the desk.
2. Remove the stand. See Removing the monitor stand.
3. Remove the four screws that secure the display back cover.
4. Install the mounting bracket from the wall mounting kit to the display.
5. To mount the monitor on the wall, see the documentation that shipped with the wall mounting kit.

NOTE: For use only with UL or CSA or GS-listed wall mount bracket with minimum weight/load bearing capacity of 13.76 kg (P2423D) / 18.16 kg (P2723D).

Operating your monitor

Power on the monitor

Press the Power button to turn On the monitor.

Using the joystick control

Use the joystick control on the rear of the monitor to make On-Screen Display (OSD) adjustments.

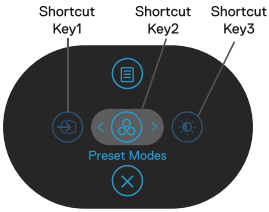
1. Press the joystick to launch the Menu Launcher.
2. Move the joystick up/down/left/right to toggle between options.
3. Press the joystick again to confirm the selection.

Using the On-Screen Display (OSD) menu

Accessing the Menu Launcher

When you toggle or press the joystick, the Menu Launcher appears to let you access the OSD main menu and shortcut functions.

To select a function, move the joystick.



The following table describes the Menu Launcher functions:

	Joystick	Description
1	Shortcut key/ Input Source	To choose an input source from the list of video signals that may be connected to your monitor.
2	Shortcut key/ Preset Modes	To choose a preferred color mode from the list of preset modes.
3	Shortcut key/ Brightness/Contrast	To access the adjustment sliders of brightness and contrast.
4	Menu	To launch the On-Screen Display (OSD) main menu. See Accessing the OSD menu.
5	OK	To exit the Menu Launcher.

Using the navigation keys

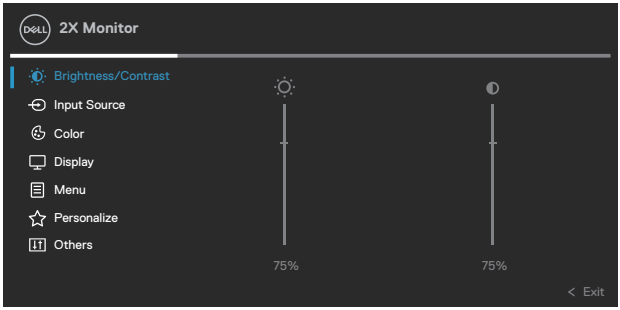
When the OSD main menu is active, move the joystick to configure the settings, following the navigation keys displayed below the OSD.

	Joystick	Description
1	Up	Use the **Up** direction to adjust (increase ranges) items in the OSD menu.
2	Down	Use the **Down** direction to adjust (decrease ranges) items in the OSD menu.
3	Left	For all first level in the Menu list, **Left** arrow will exit/ close the OSD menu.
4	Right	For all other levels except first level in the Menu list, **Right** arrow will go to the next level.
5	OK	Press the joystick to confirm your selection.

Accessing the OSD menu

NOTE: If you change the settings and then either proceed to another menu or exit the OSD menu, the monitor automatically saves those changes. The changes are also saved if you change the settings and then wait for the OSD menu to disappear.

1. Select the icon to launch the OSD and display the main menu.



2. Press the and directions to move between the setting options. As you move from one icon to another, the option is highlighted.
3. Press the or directions once to activate the highlighted option.

NOTE: The directional buttons (and the OK button) displayed may differ according to the menu you've selected. Use available buttons to make your selection.

4. Press and direction to select the desired parameter.
5. Press and then use the and directions, according to the indicators on the menu, to make your changes.
6. Select the to return to the main menu.

Icon	Menu and Submenus	Description
	Brightness/ Contrast	Use this menu to activate **Brightness/Contrast** adjustment. 	Brightness	**Brightness** adjusts the luminance of the backlight. Press the ⌃ direction to increase the brightness and press the ⌄ direction to decrease the brightness (min. 0 / max. 100).
	Contrast	Adjust the **Brightness** first, and then adjust the **Contrast** only if further adjustment is necessary. Press the ⌃ direction to increase the contrast and press the ⌄ direction to decrease the contrast (min. 0 / max. 100). The **Contrast** function adjusts the degree of difference between darkness and lightness on the monitor screen.

	Input Source	Use the **Input Source** menu to select between the different video signals that may be connected to your monitor. 	DP	Select **DP** input when you are using the DisplayPort connector. Push ✓ to select the DP input source.
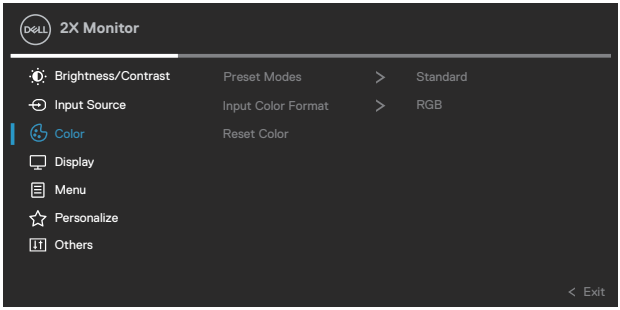
	HDMI	Select **HDMI** input when you are using the HDMI connector. Push ✓ to select the HDMI input source.
	Auto Select	Choose **Auto Select** to scan for available input signals.
	Rename Inputs	Allows you to specify a preset input name for the selected input source. The preset options are PC, PC 1, PC 2, Laptop, Laptop 1, and Laptop 2. The default setting is Off. **NOTE: It is not applicable for the input names shown in the warning messages and Display Info.**
	Reset Input Source	Select this option to restore default Input Source.

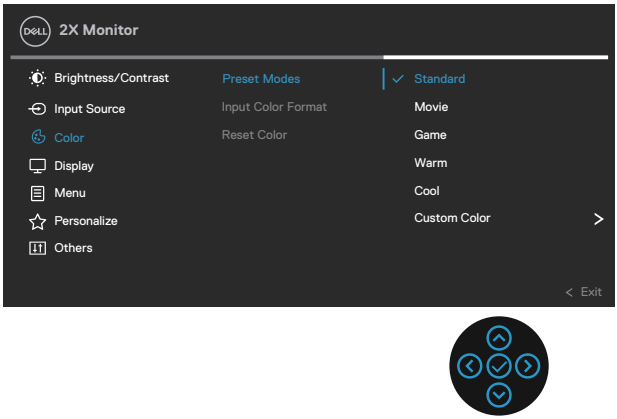
Color Use **Color** to adjust the color setting mode.



Preset Modes Allows you to choose from a list of preset color modes.

- **Standard**: Loads the monitor's default color settings. This is the default preset mode.
- **Movie**: Loads color settings ideal for movies.
- **Game**: Loads color settings ideal for most gaming applications.
- **Warm**: Increases the color temperature. The screen appears warmer with a red/yellow tint.
- **Cool**: Decreases the color temperature. The screen appears cooler with a blue tint.
- **Custom Color**: Allows you to manually adjust the color settings.

Press the ⌃ and ⌄ directions to adjust the three colors
(R, G, B) values and create your own preset color mode.



Input Color Format	Allows you to set the video input mode to: • RGB: Select this option if your monitor is connected to a computer or a media player that supports RGB output. • YCbCr: Select this option if your media player supports only YCbCr output. Hue	This feature can shift the color of the video image to green or purple. This is used to adjust the desired flesh tone color. Use ⌃ or ⌄ to adjust the hue from 0 to 100. Press ⌃ to increase the green shade of the video image. Press ⌄ to increase the purple shade of the video image. **NOTE: Hue adjustment is available only when you select Movie and Game mode.**
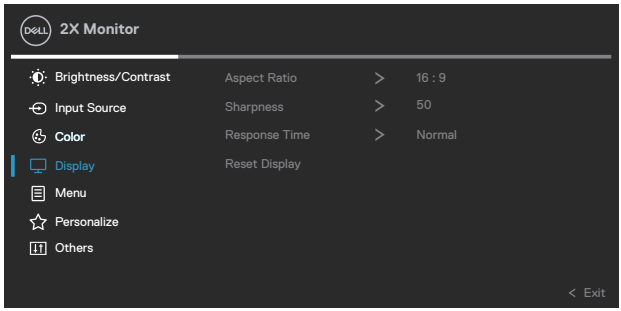
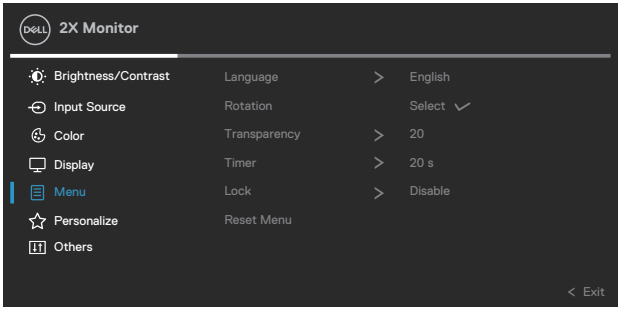
Saturation	This feature can adjust the color saturation of the video image. Use ⌃ or ⌄ to adjust the saturation from 0 to 100. Press ⌃ to increase the monochrome appearance of the video image. Press ⌄ to increase the colorful appearance of the video image. **NOTE: Saturation adjustment is available only when you select Movie and Game mode.**

	Reset Color	Resets your monitor's color settings to the factory default.
	Display	Use the **display** to adjust image.



Aspect Ratio	Adjusts the image ratio to 16:9, 4:3 or 5:4.
Sharpness	This feature can make the image look sharper or softer. Use ⌃ or ⌄ to adjust the sharpness from 0 to 100.
Response Time	Allows you to set the **Response Time** to **Normal** or **Fast**.
Reset Display	Resets all display settings to the factory default values.

Menu	Select this option to adjust the settings of the OSD, such as, the languages of the OSD, the amount of time the menu remains on screen and so on.



Language	Language options set the OSD display to one of the eight languages (English, Spanish, French, German, Brazilian Portuguese, Russian, Simplified Chinese, or Japanese).
Rotation	Rotates the OSD by 90 degrees counter-clockwise. You can adjust the menu according to your Display Rotation.
Transparency	Select this option to change the menu transparency by pressing the ⌃ and ⌄ directions from 0 to 100.
Timer	OSD hold time: sets the length of time the OSD will remain active after the last time you pressed a direction. Use ⌃ or ⌄ to adjust the slider in 1 second increments, from 5 to 60 seconds.
Lock	Controls user access to adjustments. User can select one of the following: Menu Buttons, Power Button, Menu + Power Buttons, Disable.
Reset Menu	Reset all OSD settings to the factory preset values.

Personalize	Select this option to adjust the settings of the personalization. Shortcut Key 1 **Shortcut Key 2** **Shortcut Key 3**	Allows you to choose a feature from **Preset Modes, Brightness/Contrast, Input Source, Aspect Ratio, Rotation, Display Info** and set it as a shortcut key. Power Button LED	Allows you to set the power LED indicator On or Off to save energy.
USB	Allows you to enable or disable USB function during monitor standby mode.
Reset Personalization	Reset all settings under the **Personalize** menu to the default setting.

	Others	Select this option to adjust the OSD settings, such as the DDC/CI, LCD conditioning, and so on. 	Display Info	Displays the monitor's current settings.
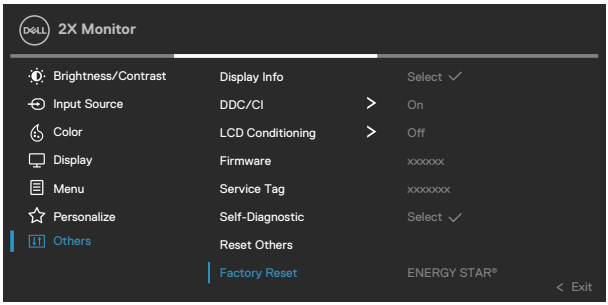
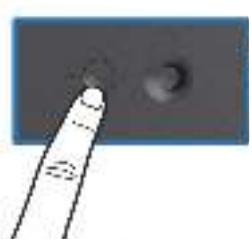
	DDC/CI	**DDC/CI** (display data channel/command interface) allows your monitor parameters (brightness, color balance and etc.) to be adjustable via the software on your computer. You can disable this feature by selecting **Off**. Enable this feature by selecting on for best user experience and optimum performance of your monitor. 
LCD Conditioning	Helps reduce minor cases of image retention. Depending on the degree of image retention, the program may take some time to run. To start LCD conditioning, select on.
Firmware	Displays the firmware version of your monitor.
Service Tag	Display the service tag number of the display. The Service Tag is a unique alphanumeric identifier that allows Dell to identify the product specifications and access warranty information. **NOTE: The Service Tag is also printed on a label located at the back of the cover.**
Self-Diagnostic	Allows you to check if your monitor is functioning properly.
Reset Others	Reset all settings under the others setting menu to the factory preset values.
Factory Reset	Restore all preset values to the factory default settings. These are also the settings for ENERGY STAR® tests.



Menu and Power button lock

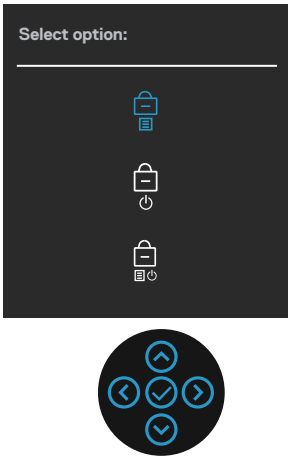
Prevents users to access or change OSD menu settings on the display.

By default, the Menu and Power button lock setting is disabled.



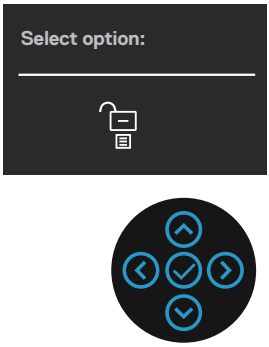
To access the lock menu, press and hold the Up or Down or Left or Right direction for four seconds. A lock menu appears at the bottom right corner of the display.

NOTE: The lock menu can be accessed using this method when the Menu and Power buttons are in unlocked state.



To access the unlock menu, press and hold the Up or Down or Left or Right direction for four seconds. An unlock menu appears at the bottom right corner of the display.

NOTE: The unlock menu can be accessed when the Menu and Power buttons are in locked state.



There are three lock options.

	Menu	Description
1	Menu Buttons	When **Menu Buttons** is selected, the OSD menu settings cannot be changed. All buttons are locked except Power button.
2	Power Button	When **Power Button** is selected, the display cannot be turned off using the Power button.
3	Menu + Power Buttons	When **Menu + Power Buttons** is selected, the OSD menu settings cannot be changed and the Power button is locked.

NOTE: To access the Lock or Unlock menu – Press and hold the Up or Down or Left or Right direction for four seconds.

In the following scenarios, the icon appears at the center of the display:

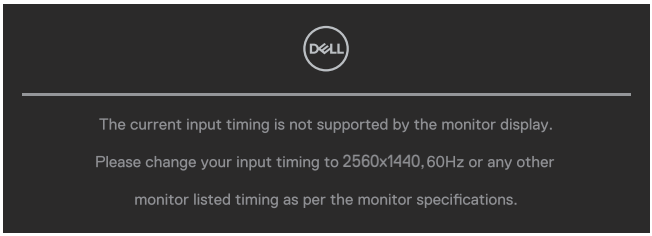
- When Up or Down or Left or Right direction are pressed. This indicates the OSD menu buttons are in lock state.
- When the Power button is pressed. This indicates the Power button is in lock state.
- When Up or Down or Left or Right direction or Power button are pressed. This indicates OSD menu buttons and the Power button is in lock state.

Unlocking the OSD menu and Power buttons:

1. Press and hold the Up or Down or Left or Right direction for four seconds. The unlock menu appears.
2. Select the unlock icon to unlock the buttons on the display.

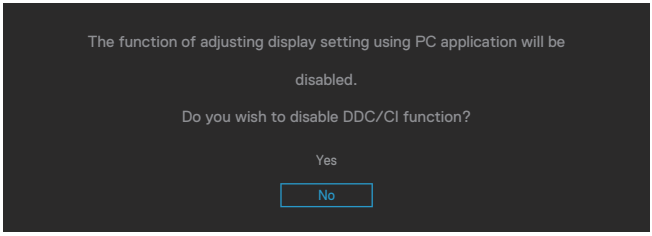
OSD warning messages

When the monitor does not support a particular resolution mode, the following message is displayed:

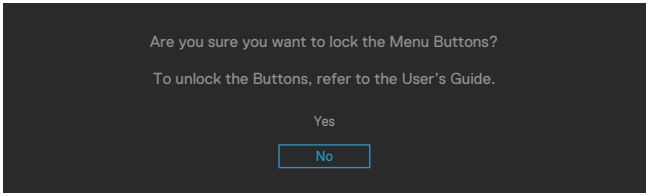


This means that the monitor cannot synchronize with the signal that it is receiving from the computer. See Monitor specifications for the Horizontal and Vertical frequency ranges addressable by this monitor. Recommended mode is **2560 x 1440**.

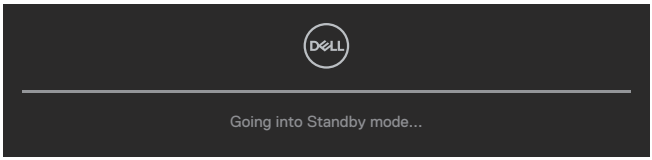
You will see the following message before the **DDC/CI** function is disabled:



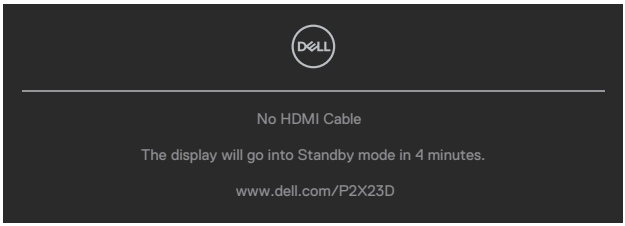
You will see the following message before the **Lock** function is activated:



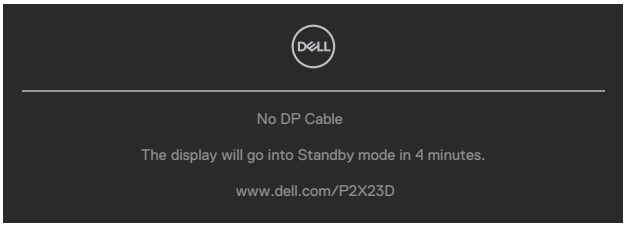
When the monitor goes into power-save mode, the following message appears:



If either HDMI or DisplayPort cable is not connected, a floating dialog box as shown below appears. The monitor will enter Standby Mode after 4 minutes if left at this state.



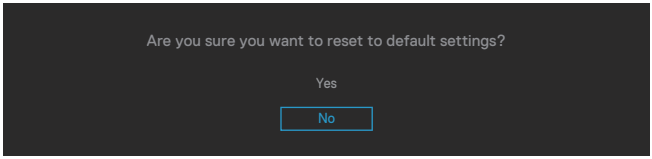
or



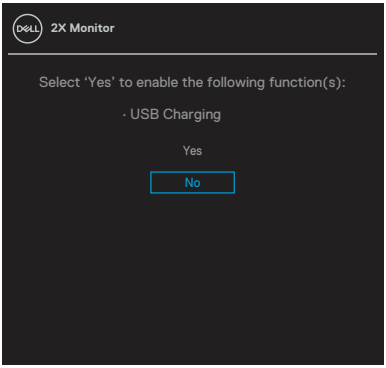
NOTE: The message may be slightly different according to the connected input signal.

The Power Warning Message box below shall apply to **Brightness** functions for the first time when user adjust the Brightness level above the default level.

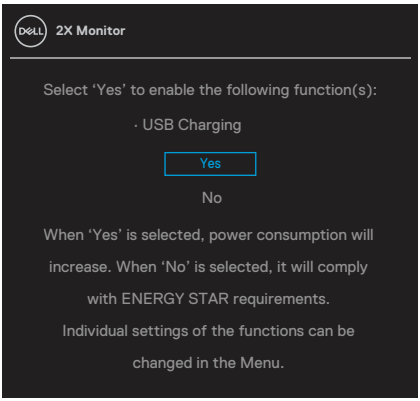
When **Factory Reset** is selected, the following message appears:



When you select 'Yes' to reset to default settings, the following message will appear:



When you select ‘Yes’ to reset to default settings, the following message will appear:



See Troubleshooting for more information.

Setting the maximum resolution

NOTE: The steps may vary slightly depending on the version of Windows you have.

To set the maximum resolution for the monitor:

In Windows 8.1:

1. For Windows 8.1, select the Desktop tile to switch toclassic desktop.
2. Right-click on the desktop and click **Screen Resolution**.
3. If you have more than one monitor connected, ensure that you select **P2423D/ P2723D.**
4. Click the **Screen Resolution** dropdown list and select **2560 x 1440**.
5. Click **OK**.

In Windows 10 and Windows 11:

1. Right-click on the desktop and click **Display settings**.
2. If you have more than one monitor connected, ensure to select **P2423D/ P2723D.**
3. Click the **Display Resolution** dropdown list and select **2560 x 1440**.
4. Click **Keep changes**.

If you do not see **2560 x 1440** as an option, you must update your graphics driver to the latest version. Depending on your computer, complete one of the following procedures:

If you have a Dell desktop or laptop:

- Go to **https://www.dell.com/support**, enter your service tag, and download the latest driver for your graphics card.

If you are using a non-Dell computer (laptop or desktop):

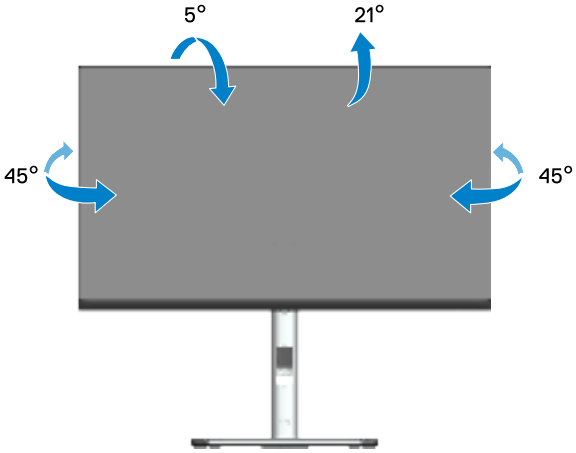
- Go to the support site for your computer and download the latest graphic drivers.
- Go to your graphics card website and download the latest graphic drivers.

Using the tilt, swivel, and vertical extension

NOTE: The following instructions are applicable only for attaching the stand that was shipped with your monitor. If you are attaching a stand that you purchased from any other source, follow the set up instructions that were included with the stand.

Tilt, swivel

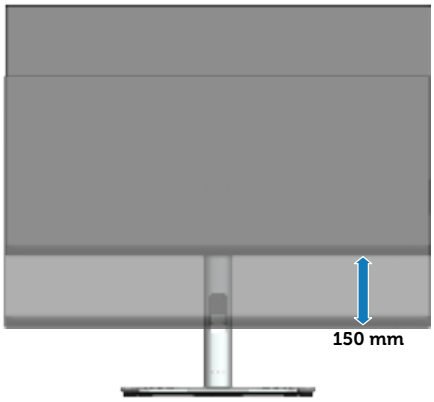
With the stand attached to the monitor, you can tilt and swivel the monitor for the most comfortable viewing angle.



NOTE: The stand is detached when the monitor is shipped from the factory.

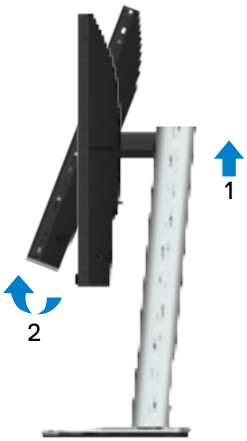
Vertical Extension

NOTE: The stand can be extended vertically up to 150 mm.

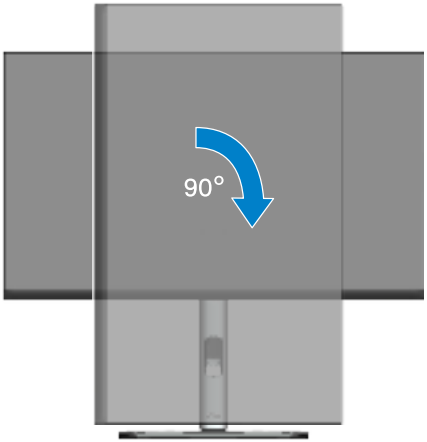


Rotating the monitor

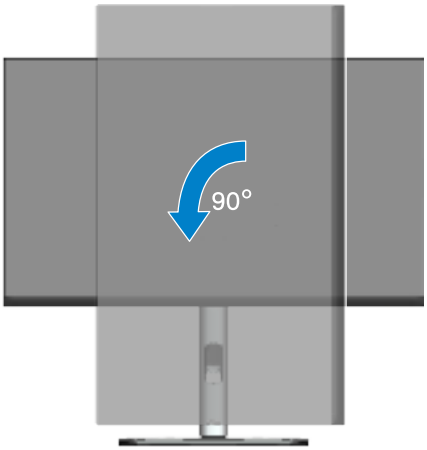
Before you rotate the monitor, your monitor should be fully vertically extended (Vertical Extension) and fully tilted up to avoid hitting the bottom edge of the monitor.



Rotate clockwise



Rotate counterclockwise



NOTE: To use the Display Rotation function (Landscape versus Portrait view) with your Dell computer, you require an updated graphics driver that is not included with this monitor. To download the graphics driver, go to www.dell.com/support and see the Download section for Video Drivers for latest driver updates.

NOTE: When in the Portrait View Mode, you may experience performance degradation in graphic-intensive applications (3D Gaming and etc.).

Adjusting the rotation display settings of your system

After you have rotated your monitor, you need to complete the procedure below to adjust the Rotation Display Settings of your system.

NOTE: If you are using the monitor with a non-Dell computer, you need to go to the graphics driver website or your computer manufacturer website for information on rotating the 'contents' on your display.

To adjust the Rotation Display Settings:

1. Right-click on the desktop and click **Properties**.
2. Select the **Settings** tab and click **Advanced**.
3. If you have an ATI graphics card, select the **Rotation** tab and set the preferred otation.
4. If you have an NVIDIA graphics card, click the **NVIDIA** tab, in the left-hand column select **NVRotate**, and then select the preferred rotation.
5. If you have an Intel® graphics card, select the **Intel** graphics tab, click **Graphic Properties**, select the **Rotation** tab, and then set the preferred rotation.

NOTE: If you do not see the rotation option or it is not working correctly, go to www.dell.com/support and download the latest driver for your graphics card.

Troubleshooting

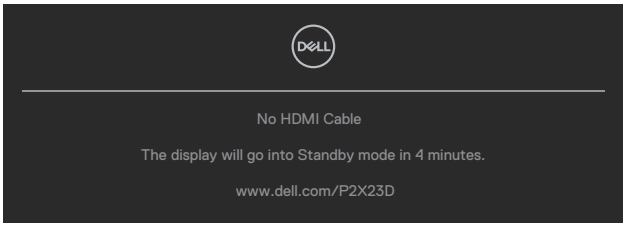
⚠ **WARNING: Before you begin any of the procedures in this section, follow the** Safety instructions**.**

Self-Test

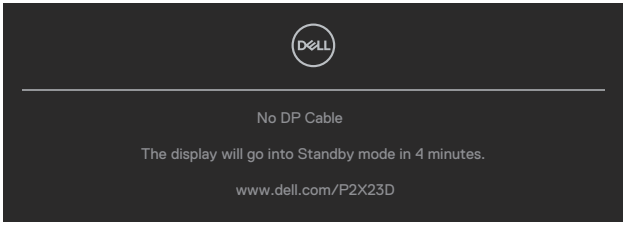
Your monitor provides a self-test feature that allows you to check if your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

1. Turn off both your computer and the monitor.
2. Disconnect all video cables from the monitor. This way, the computer doesn't have to be involved.
3. Turn on the monitor.

The floating dialog box should appear on-screen (against a black background), if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains white. Also, depending upon the selected input, one of the dialogs shown below will continuously scroll through the screen.



or



4. This box also appears during normal system operation, if the video cable becomes disconnected or damaged.

5. Turn Off your monitor and reconnect the video cable; then turn On both your computer and the monitor.

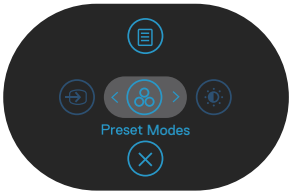
If your monitor screen remains blank after you use the previous procedure, check your video controller and computer, because your monitor is functioning properly.

Built-in diagnostics

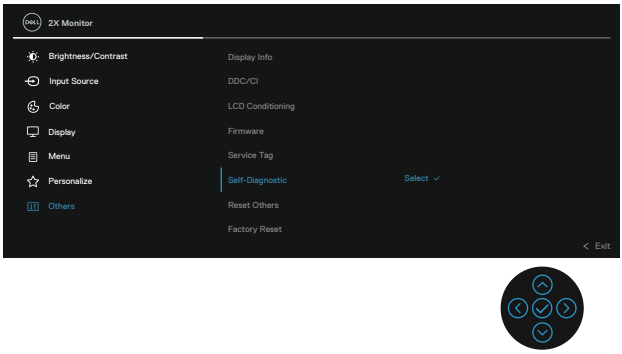
Your monitor has a built-in diagnostic tool that helps you determine if any screen abnormality you experience is an inherent problem with your monitor, or with your computer and video card.

To run the built-in diagnostics:

1. Ensure that the screen is clean (no dust particles on the surface of the screen).
2. Press the Joystick buttton to launch the OSD Menu Launcher and move the Joystick up to select "" to open Main Menu.



3. Move the Joystick to select **Others > Self-Diagnostic** to initiate the self-diagnostic process.



4. When initiated, a gray screen apppears. Inspect the screen for abnormalities.
5. Toggle the Joystick. The color of the screen changes to red. Inspect the screen for abnormalities.
6. Repeat step 5 to inspect the display in green, blue, black, white and text screens.
7. The test is complete when the text screen appears. To exit, toggle the Joystick again.

If you do not detect any screen abnormalities upon using the BID tool, the monitor is functioning properly. Please check the video card and computer.

Common problems

The following table contains general information about common monitor problems you might encounter and the possible solutions:

Common Symptoms	What you experience	Possible Solutions
No Video/Power LED off	No picture	Ensure that the video cable connecting the monitor and the computer is properly connected and secure. • Verify that the power outlet is functioning properly using any other electrical equipment. • Ensure that the power button is pressed. • Ensure that the correct input source is selected via the Input Source menu.
No Video/Power LED on	No picture or no brightness	• Increase brightness and contrast controls using the OSD. • Perform monitor self-test feature check. • Check for bent or broken pins in the video cable connector. • Run the built-in diagnostics. • Ensure that the correct input source is selected via the Input Source menu.
Poor Focus	Picture is fuzzy, blurry, or ghosting	• Eliminate video extension cables. • Reset the monitor to Factory Settings (**Factory Reset**). • Change the video resolution to the correct aspect ratio.
Shaky/Jittery Video	Wavy picture or fine movement	• Reset the monitor to Factory Settings (**Factory Reset**). • Check environmental factors. • Relocate the monitor and test in another room.

Missing Pixels	LCD screen has spots	• Cycle power On-Off. • Pixel that is permanently Off is a natural defect that can occur in LCD technology. • For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: **www.dell.com/pixelguidelines**.
Stuck-on Pixels	LCD screen has bright spots	• Cycle power On-Off. • Pixel that is permanently off is a natural defect that can occur in LCD technology. • For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: **www.dell.com/pixelguidelines**.
Brightness Problems	Picture too dim or too bright	• Reset the monitor to Factory Settings (**Factory Reset**). • Adjust brightness & contrast controls via OSD.
Geometric Distortion	Screen not centered correctly	• Reset the monitor to Factory Settings (**Factory Reset**). • Adjust horizontal & vertical controls via OSD.
Horizontal/ Vertical Lines	Screen has one or more lines	• Reset the monitor to Factory Settings (**Factory Reset**). • Perform monitor self-test feature check and determine if these lines are also in self-test mode. • Check for bent or broken pins in the video cable connector. • Run the built-in diagnostics.

Synchronization Problems	Screen is scrambled or appears torn	• Reset the monitor to Factory Settings (**Factory Reset**). • Perform monitor self-test feature check to determine if the scrambled screen appears in self-test mode. • Check for bent or broken pins in the video cable connector. • Restart the computer in the safe mode.
Safety Related Issues	Visible signs of smoke or sparks	• Do not perform any troubleshooting steps. • Contact Dell immediately.
Intermittent Problems	Monitor malfunctions on & off	• Ensure that the video cable connecting the monitor to the computer is connected properly and is secure. • Reset the monitor to Factory Settings (**Factory Reset**). • Perform monitor self-test feature check to determine if the intermittent problem occurs in self-test mode.
Missing Color	Picture missing color	• Perform monitor self-test feature check. • Ensure that the video cable connecting the monitor to the computer is connected properly and is secure. • Check for bent or broken pins in the video cable connector.
Wrong Color	Picture color not good	• Try different **Preset Modes** in **Color** settings OSD. Adjust **R**/**G**/**B** value in **Custom Color** in **Color** settings OSD. • Change the **Input Color Format** to **RGB** or **YCbCr** in the **Color settings** OSD. • Run the built-in diagnostics.

Image retention from a static image left on the monitor for a long period of time	Faint shadow from the static image displayed appears on the screen	• Set the screen to turn off after a few minutes of screen idle time. These can be adjusted in Windows Power Options or Mac Energy Saver setting. • Alternatively, use a dynamically changing screensaver.

Product-specific problems

Specific Symptoms	What you experience	Possible Solutions
Screen image is too small	Image is centered on screen, but does not fill entire viewing area	• Check the **Aspect Ratio** setting in the **Display** settings OSD. • Reset the monitor to Factory Settings (**Factory Reset**).
Cannot adjust the monitor with the joystick	OSD does not appear on the screen	• Turn Off the monitor, unplug the power cord, plug it back, and then turn On the monitor. • Check whether the OSD menu is locked. If yes, move and hold the joystick up/down/left/right for 4 seconds to unlock (for more information, see Menu and Power button lock).

No Input Signal when user controls are pressed	No picture, the LED light is white	• Check the signal source. Ensure the computer is not in Standby Mode by moving the mouse or pressing any key on the keyboard. • Check if the video cable is plugged in properly. Disconnect and reconnect the video cable if necessary. • Reset the computer or video player.
The picture does not fill the entire screen	The picture cannot fill the height or width of the screen	• Due to different video formats (aspect ratio) of DVDs, the monitor may display in full screen. • Run the built-in diagnostics.
No video at HDMI/ DisplayPort	When connected to some dongle/ docking device at the port, there is no video when unplugging/plugging the cable from the notebook	• Unplug the HDMI/ DisplayPort cable from dongle/docking device, then plug the docking HDMI/DisplayPort cable to the notebook.

Universal Serial Bus (USB) specific problems

Common symptoms	What you experience	Possible Solutions
USB interface is not working	USB peripherals are not working	• Check that your monitor is turned On. • Reconnect the upstream cable to your computer. • Reconnect the USB peripherals (downstream connector). • Turn off the monitor and turn it on again. • Reboot the computer. • Certain USB devices such as portable hard drive require higher power source; connect the drive to the computer directly.
SuperSpeed USB 5 Gbps (USB 3.2 Gen1) interface is slow	SuperSpeed USB 5 Gbps (USB 3.2 Gen1) peripherals working slowly or not working at all	• Check that your computer is SuperSpeed USB 5 Gbps (USB 3.2 Gen1)-compatible. • Some computers have USB 3.2, USB 2.0, and USB 1.1 ports. Ensure that the correct USB port is used. • Reconnect the upstream cable to your computer. • Reconnect the USB peripherals (downstream connector). • Reboot the computer.

Wireless USB peripherals stop working when a USB 3.2 device is plugged in	Wireless USB peripherals responding slowly or only working as the distance between itself and its receiver decreases	• Increase the distance between the USB 3.2 peripherals and the wireless USB receiver. • Position your wireless USB receiver as close as possible to the wireless USB peripherals. • Use a USB-extender cable to position the wireless USB receiver as far away as possible from the USB 3.2 port.
