

15.6" P-Cap 10 point multi-touch monitor with edge-to-edge glass

The 15.6" LED-backlit ProLite T1634MC-B4X uses Projective Capacitive Multi-Touch Technology, built into an eye catching bezel with edge-to-edge glass. The screen features a 1366 x 768 resolution, DVI and VGA inputs and a rugged bezel and IP54 rated front making it suitable for demanding environments. The ProLite T1634MC-B4X is the ideal solution for In-store Retail and Kiosk Integration.

TOUCH TECHNOLOGY - CAPACITIVE

This technology uses a sensor-grid of micro-fine wires integrated into the glass that covers the screen. Touch is detected because electrical characteristics of the sensor grid change when human finger is placed on the glass. Thanks to the glass overlay this technology is highly durable, and the touch function remains unaffected even if the glass is scratched. It offers perfect picture performance and will work with human finger (also latex gloved) and stylus-pen.

SCRATCH RESISTANCE

Scratch resistance is essential for touch solutions used in public places and schools. This is achieved thanks to a glass overlay covering the screen. It guarantees high durability of the touch function and even more importantly the touch function remains unaffected even if the glass is scratched.
