

### **Dismantling information**

The document is intended for use by end-of-life recyclers or treatment facilities. It provides the basic instructions for the disassembly of LG products to remove components and materials requiring selective treatment.

### **Product Identification**

| Type of Product | Monitor          |
|-----------------|------------------|
| Model name      | 27UN880, 32UN880 |

Displays must be stored in accordance with the requirements stipulated in Appendix VIII (1) or (2) of Directive 2012/192/EU and must, amongst other things, be stored in a weatherproof manner. Containers with covers must be used when storing and transporting the Displays.

### **Contents**

- **1. Materials and components for Selective Treatment**
- 2. Tools Required
- 3. Product Disassembly Process
- 4. Disassembly of External enclosure

### **1. Materials and components for Selective Treatment**

Displays may contain hazardous substances like Pb and BFRs which are covered by exemptions under the RoHS directive. However, the majority is present in the PCB assembly. In order to reduce emissions as much as possible, a complete disposal of the old appliance is required. This treatment may only be performed in authorized handling plants.

| Materials and components   | Notes  | Included |
|--|--|----------|
| Printed Circuit Boards (PCB) or Printed<br>Circuit Assemblies (PCA)                            | With a surface greater than 10 square cm                                   | 0        |
| Batteries  | For Remote control   | -        |
| Dallenes   | Internal batteries   | -        |
| Mercury containing components  | display backlights   | -        |
| Liquid Crystal Displays (LCD) with a surface greater than 100 square cm                        | Includes background<br>illuminated displays<br>with gas discharge<br>lamps | Ο        |
| Capacitors / condensers (Containing PCB / PCT)   |  | -        |
| Electrolytic Capacitors / Condensers<br>measuring greater than 2.5 cm in<br>diameter or height |  | О        |
| External electric cables cords   | Power cord   | 0        |
| External electric caples cords   | Signal cable   | 0        |
| Gas Discharge Lamps  |  | -        |
| Plastics containing Brominated Flame<br>Retardants   |  | -        |
| Components and waste containing asbestos   |  | -        |
| Components, parts and materials containing refractory ceramic fibers                           |  | -        |
| Components, parts and materials containing radioactive substances                              |  | -        |

# 2. Tools Required

List the type that would typically be used to disassemble the product to a point where components and materials requiring selective treatment can be removed.

| Tool Description | Tool information |  |
|------------------|------------------|--|
| Screw driver     |                  |  |
| Nipper           | A A              |  |
|                  |                  |  |
| Plastic Hera Jig |                  |  |
|                  |                  |  |

### **3. Product Disassembly Process**

#### 1. Batteries

No battery.

### **3. Product Disassembly Process**

#### 2. PCBs and Module

The back cover of the display can easily be removed by Plastic Hera Jig and screw driver.

Once removed this will expose the accessible electronic units (PCBs),

which can now be easily removed with hand and screw driver.

LGD module(together with their casing) is only left after all other parts like electronic units and casing have been removed.

### **3. Product Disassembly Process**

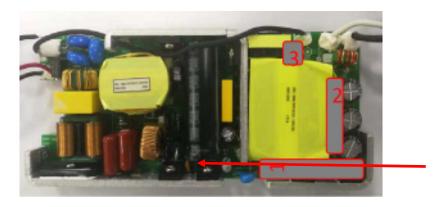

#### 3. Power cord and signal cables

A Power cord plugged into the back of the display can easily be removed by hand or cables are provided as de-attached from the product

#### 4. Capacitors > 25 mm

Capacitors > 25 mm are located in the power supply units and can be removed by nipper

## **4. Disassembly of External enclosure**

Unscrew the stand body

Push button and lift the stand

Overturn the set use jig to disassemble backcover

# **4. Disassembly of External enclosure**

Disassemble the back cover

Re-overturn the set and disaaemble screw 4EA+4EA and disassemble the PCB

#### LCD Module
