

LENOVO L24i

**SATISFYINGLY SOPHISTICATED.
ANYTHING BUT ORDINARY.**

ALL-ROUND FUNCTIONALITY MEETS ELEGANT DESIGN.

Why settle for ordinary? When everything else in the home is chosen for style, a monitor that delivers on performance should have a design aesthetic to match. That's why nothing about Lenovo L24i-30 is ordinary. Its newly restyled 7.1 mm ultra-slim head is slimmer than many smartphones, giving a clean, modern aspect to the monitor. Its minimalist 3-side NearEdgeless form factor almost eliminates its bezels altogether letting movies "float" in a space that's as clean as your home's design. Set up two side-by-side for a multi-screen workspace and the experience is virtually gapless continuity that makes comparing detailed documents so much easier. At its heart, L24i-30's In-Plane Switching panel display delivers crisp, clean images that match its physical form in quality. Even at extreme angles of up to 178°, a family can huddle to binge-watch their favorite dramas without any one of them seeing color-distorted images. Look beneath the screen and its upgraded metal wedge pedestal is engineered for style, stability and satisfaction: a built-in rack to neatly hold a mobile phone as well as concealed, integrated cable management to keep wires out of sight and de-clutter deskpace. Movie time and gameplay are rendered free of visual distraction thanks to a rapid 75 Hz¹ refresh rate and AMD FreeSync™² that eliminate streaking, ghosting, lagging and image tearing even in the most intense situations. And no matter how long those gaming sessions last, or how long it takes to reply to all those work emails, TÜV Rheinland Eye Comfort certification means it filters harmful wavelengths to safeguard viewers' eyes from fatigue. And, as if that weren't enough, Lenovo's exclusive and dedicated Artery³ software³ gives users complete, seamless control of L24i-30's performance, allowing fine-tuning through the elegant interface.

FEATURES OF LENOVO L24i-30 MONITOR

Taking minimalism to the max

With its brand-new minimal styling, Lenovo L24i-30's modern 7.1 mm ultra-slim display looks as good in any home as the images it displays on its In-Plane Switching panel screen. A screen that floats above its newly upgraded two-tone metal wedge pedestal that's engineered for elegance, stability and convenience because it tidies cables invisibly away behind its slender neck and integrates a rack to neatly hold a mobile phone.

Keep watching in comfort

L24i-30's In-Plane Switching panel display delivers faultless images even when it's viewed from angles as extreme as 178°. So, watching a movie with the whole family will bring smiles as wide as the viewing angle. But whether you need to work at home, input data well into the night or get entertained, binge-watching a favorite show, this monitor safeguards users' eyes from fatigue thanks to TÜV Rheinland Eye Comfort-certified technology that filters harmful blue wavelengths.

Uninterrupted convenience

Press play. And let the movie roll or the games flow uninterrupted. L24i-30 refreshes the screen at a rate of 75 Hz¹ and, when coupled with built-in AMD FreeSync™², it leaves image tearing and stuttering way behind in the dust while racers take the chequered flag. Plus, with Lenovo's exclusive Artery³ software coming standard with the monitor, users can fine-tune its brightness, contrast and other controls to match different usage scenarios and quickly switch between them through its convenient and elegant "soft OSD" interface.
