Safety instructions

Use the following safety guidelines to protect you monitor from potential damage and to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that you have read the safety information that shipped with your monitor.

NOTE: Before using the monitor, read the safety information that is shipped with your monitor and printed on the product. Keep the documentation at a secure location for future reference.

WARNING: Use of controls, adjustments, or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards, and/or mechanical hazards.

WARNING: The possible long-term effect of listening to audio at high volume through the headphones (on monitor that support it) may cause damage to your hearing ability.

- Place the monitor on a solid surface and handle it carefully. The screen is fragile and can be damaged if dropped or hit with a sharp object.
- Ensure that your monitor is electrically rated to operate with the AC power available in your location.
- Keep the monitor in room temperature. Excessive cold or hot conditions can have an adverse effect on the liquid crystals of the display.
- Connect the power cable from the monitor to a wall outlet that is near and accessible. See [Connecting your monitor](#).
- Do not place and use the monitor on a wet surface or near water.
- Do not subject the monitor to severe vibration or high impact conditions. For example, do not place the monitor inside a car trunk.
- Unplug the monitor when it is going to be left unused for an extended period.
- To avoid electric shock, do not attempt to remove any cover or touch the inside of the monitor.
- Read these instructions carefully. Keep this document for future reference. Follow all warnings and instructions marked on the product.
- Certain monitors can be wall mounted using the VESA mount that is sold separately. Ensure to use the correct VESA specifications as mentioned in the wall mounting section of the User's Guide.

For information on safety instructions, see the Safety, Environmental, and Regulatory Information (SERI) document that is shipped with your monitor.

About your monitor

Package contents

The following table provides the list of components that are shipped with your monitor. If any component is missing, contact Dell. For more information, see [Contact Dell](#).

 **NOTE: Some items may be optional and may not ship with your monitor. Some features may not be available in certain countries.**

Component image	Component description
	Display
	Stand riser
	Stand base
	Power cable (varies by country)

	DisplayPort cable (DisplayPort to DisplayPort)
	USB 3.2 Gen2 Type-A to Type-C upstream cable
	USB Type-C cable (C to C)

Product features

The **Dell UltraSharp U3223QZ** monitor has an active matrix, Thin-Film Transistor (TFT), Liquid Crystal Display (LCD), and LED backlight. The monitor features include:

- 80.01 cm (31.5 in.) active area display (Measured diagonally) 3840 x 2160 (16:9) resolution, plus full-screen support for lower resolutions.
- Wide viewing angles with 100% sRGB color & 98% DCI-P3.
- Tilt, swivel and vertical extension adjustment capabilities.
- Built-in speakers (2 x 14 W).
- Removable pedestal stand and Video Electronics Standards Association (VESA™) 100 mm mounting holes for flexible mounting solutions.
- Ultra-thin bezel minimizes the bezel gap during multi-monitor usage, enabling easier set up with an elegant viewing experience.
- Extensive digital connectivity with DP helps future-proof your monitor.
- Single USB Type-C to supply power to compatible notebook while receiving video signal.
- USB-C and RJ45 ports enable a single-cable, network-connected experience.
- Plug and play capability if supported by your computer.
- On-Screen Display (OSD) adjustments for ease of set-up and screen optimization.
- Power and OSD buttons lock.
- Security lock slot.
- Stand lock.

- Power consumption $\leq 0.3W$ in Standby Mode.
 - Supports Picture by Picture (PBP) Select mode.
 - Allow user to switch USB KVM function in PBP mode.
 - The monitor is designed with Dell Power Button Sync (DPBS) feature to control PC system power state from monitor power button.*
 - The Monitor allows multiple monitors that are daisy chained via DisplayPort to synchronize a pre-defined group of OSD settings in the background by Multi-Monitor Sync (MMS).
 - Premium Panel Exchange for peace of mind.
 - Optimize eye comfort with a flicker-free screen and ComfortView Plus feature.
 - This monitor uses low blue light panel. When the monitor is reset to factory settings or default setting (**Preset mode: Standard**), it works in compliance with TUV Rheinland (hardware solutions provider).
 - Decreases the level of hazard blue light emitted from the screen to make viewing more comfortable for your eyes.
 - The monitor adopts Flicker-Free technology, which clears the eye visible flicker, brings comfort viewing experience and preventing users suffer from eye strain and fatigue.
 - Certified for Microsoft Teams®.
 - Certified for Windows Hello® (Face Authentication) and supports Microsoft Cortana®.
 - Additional customization using Dell Peripheral Manager
- * PC system that supports DPBS is the Dell OptiPlex 7090/3090 Ultra platform.

 WARNING: The possible long-term effects of blue light emission from the monitor may cause damage to the eyes, which includes but is not limited to eye fatigue and digital eyestrain. ComfortView Plus feature is designed to reduce the amount of blue light emitted from the monitor to optimize eye comfort.

Identifying parts and controls

Front view

Label	Description	Use
1,7	Microphones	Monitor microphones (Mic).
2	IR LED	Indicator of infrared (IR).
3	RGB Camera	Transmits your image in a video conference.
4	Proximity Sensor	The human presence wake & lock feature.
5	Webcam LED indicator	Indicator of Webcam. It will light up in white when webcam is in use.
6	IR Camera	The face recognition feature.
8	Built-in speakers	To output the sound from audio input.

9	Teams button & LED	<p>LED will light in static white when Microsoft Teams® is signed in and running.</p> <p>LED will blink when there is a Teams notification.</p> <p>Short press on the button to bring up Teams and open notification. Ensure that the Teams application is signed in and is already running at the background.</p> <p>Long press on the button to invoke Cortana.</p> <p>NOTE: For the Teams button to work, ensure that the Teams account is provisioned / setup as 'Teams Only' mode. The tenant administrator should enable the account to 'Teams Only' mode.</p> <p>NOTE: Teams button will only work with Teams application in 'Teams Only' mode. Setting might vary in corporate environment, resulting in Teams button not working on the monitor. Please check with your system administrator.</p>
10	Hookswitch & LED	<p>LED will blink in green when there is an incoming Teams/Skype for Business (SfB) call.</p> <p>LED will light up in static green during Teams/Skype for Business (SfB) call.</p> <p>Short press to answer / end call.</p> <p>Long press to reject incoming call.</p>
11	Volume down & LED	<p>Short press for 2 unit volume decrement.</p> <p>Long press for continuous volume decrement.</p>
12	Volume up & LED	<p>Short press for 2 unit volume increment.</p> <p>Long press for continuous volume increment.</p>
13	Microphone mute & LED	<p>Press to mute and unmute microphone.</p> <p>LED will light up in static red when mic is muted.</p> <p>LED will go dark when mic is enabled/unmuted.</p>
14	Camera Mute & LED	<p>Press to lock and unlock camera shutter.</p> <p>If locked, icon will light up in red, no software can override and open camera shutter to use the camera.</p> <p>If unlocked, icon will not light up, software can open camera shutter to use the camera when it's needed.</p> <p>NOTE: This camera disable button must not be confused with "Webcam and presence sensor: enable / disable" in OSD.</p> <p>Disabling "webcam & presence sensor" will turn off the whole webcam module, webcam and sensor will not appear in the system.</p>

15	Power LED indicator	Solid white light indicates the monitor is turned on and functioning normally. Breathing white light indicates the monitor is in Standby Mode.
----	---------------------	--

Back view

Label	Description	Use
1	VESA mounting holes (100 mm x 100 mm-behind attached VESA cover)	Wall mount monitor using VESA-compatible wall mount kit (100 mm x 100 mm).
2	Regulatory label	Lists the regulatory approvals.
3	Stand release button	Releases stand from the monitor.
4	Power On/Off button	To turn the monitor on or off.
5	Joystick	Use it to control the OSD menu. For more information, see Operating the Monitor .
6	Mac address, Barcode, serial number, and Service Tag label	Refer to this label if you need to contact Dell for technical support. The Service Tag is a unique alphanumeric identifier that enables Dell service technicians to identify the hardware components in your computer and access warranty information.
7	Cable-management slot	Use to organize cables by inserting them through the slot.

Bottom view

Label	Description	Use
1	Security lock slot (based on Kensington Security Slot™)	Secures monitor with security cable lock (sold separately)
2	 Power connector	Connect the power cable.
3	 HDMI port	Connect your computer with the HDMI cable.
4	 DisplayPort (in)	Connect your computer with the DisplayPort cable.
5	 USB Type-C upstream/ DisplayPort	Connect to your computer using the USB Type-C cable. The USB Type-C port offer the fastest transfer rate (USB 3.2 Gen 2) and the alternate mode with DP 1.4 support the following, and PD 20 V/4.5 A, 15 V/3 A, 9 V/3 A, 5 V/3 A. Maximum resolution of 3840 x 2160 at 60 Hz NOTE: USB Type-C is not supported on Windows versions that are prior to Windows 10.
6	 DP port (out)	DP output for MST (multi-stream transport) capable monitor. To enable MST, refer to instruction on section Connecting the Monitor for DP MST Function . NOTE: Remove the rubber plug when using DP out connector.
7	 USB-C upstream port	Connect the USB cable that comes with your monitor to the computer. Once this cable is connected, you can use the USB downstream connectors on the monitor.

8,9, 10,11, 14	 Super speed USB 10 Gbps (USB 3.2 Gen2)	Connect your USB device. You can use these ports only after you have connected the USB cable (Type-A to Type-C or Type-C to Type-C) from the computer to the monitor. Port 14 with  battery icon supports Battery Charging Rev. 1.2.
12	 RJ-45 connector	Connect Internet. You can surf Internet via RJ45 only after you have connected the USB cable (Type-A to Type-C or Type-C to Type-C) from the computer to the monitor.
13	Stand lock	Lock the stand to the monitor using a M3 x 6 mm screw (screw not included).
15	Headphone jack	Connect headphones or headset to playback audio through HDMI or DisplayPort or USB Type-C audio channels. NOTE: Excessive sound pressure from earphones or headphones can cause hearing damage or loss. Adjustment of the equalizer to maximum increases the earphones and headphones output voltage and therefore the sound pressure level.
16	 USB Type-C downstream port	Port with  icon supports 5 V/3 A. Connect your USB device. You can use these ports only after you have connected the USB cable (Type-A to Type-C or Type-C to Type-C) from the computer to the monitor. NOTE: This port is downstream only and unable to broadcast video or sound to the display or speakers.

Monitor specifications

Screen type	Active matrix - TFT LCD

HBR2	1

 **NOTE: Maximum external monitor resolution with the maximum number of external monitors supported is 3840 x 2160 / 60Hz only when DSC is enabled on graphic cards or with graphic cards that support DSC.**

Electrical specifications

Video input signals	<ul style="list-style-type: none">• Digital video signal for each differential line Per differential line at 100 ohm impedance• DP/HDMI/USB Type-C signal input support
Input voltage/ frequency/ current	100-240 VAC / 50 or 60 Hz \pm 3 Hz / 2.5 A (maximum)
Inrush current	120 V: 42 A (Max.) 240 V: 80 A (Max.) Inrush current is measured at an ambient temperature of 0°C
Power Consumption	0.3 W (Off Mode) ¹ 0.3 W (Standby Mode) ¹ 29.90 W (On Mode) ¹ 240 W (Max) ² 28.43 W (P_{on}) ³ 97.36 kWh (TEC) ³

¹ As defined in EU 2019/2021 and EU 2019/2013.

² Max brightness and contrast setting with maximum power loading on all USB ports.

³ P_{on} : Power consumption of On Mode as defined in Energy Star 8.0 version.

TEC: Total energy consumption in kWh as defined in Energy star 8.0 version.

This document is informational only and reflects laboratory performance. Your product may perform differently, depending on the software, components and peripherals you ordered and shall have no obligation to update such information. Accordingly, the customer should not rely upon this information in making decisions about electrical tolerances or otherwise. No warranty as to accuracy or completeness is expressed or implied.

 **NOTE:** This monitor is ENERGY STAR certified.

This product qualifies for ENERGY STAR in the factory default settings which can be restored by “Factory Reset” function in the OSD menu. Changing the factory default settings or enabling other features may increase power consumption that could exceed the ENERGY STAR specified limit.

Webcam – microphone specifications

Lens	Field of view (horizontal)	65 / 78 / 90 degree
	Focus mode	5x digital zoom
	Focus area	25 cm ~ ∞
	Focusing distance	500 cm
Image Sensor	Active array size	8 mega-pixel
Video Specification	Video frame rate	3840 x 2160 (4K UHD)- up to 30 frames per second
		1920 x 1080 (Full HD)- up to 60 frames per second
Audio Specification	Microphone type	Digital microphone x 2

Speaker Specifications

Speaker rated power	2 x 14 W
Frequency Response	100 Hz - 20 kHz
Impedance	4 ohm

Physical characteristics

Connector type	<ul style="list-style-type: none">• DP connector• HDMI connector• USB Type-C connector• Audio jack• RJ45 connector• USB Type-C upstream connector x 2• USB 3.2 Gen 2 downstream connector x 5• USB Type-C downstream connector

Universal Serial Bus (USB)

This section gives you information about the USB ports available on your monitor.

 **NOTE: Up to 2 A on USB downstream port (port with  battery icon) with BC 1.2 compliance devices; up to 0.9 A on the other 4 USB downstream ports; Up to 3 A on USB-C downstream port (port with  icon) with 5 V/3 A compliance devices.**

Your computer has the following USB ports:

- 2 upstream - at rear.
- 6 downstream - 2 at bottom, 4 at rear.

Power Charging Port - the ports with  battery icon supports fast current charging capability if the device is BC 1.2 compatible. The USB Type-C downstream port with  icon supports fast current charging capability if the device is 5V/3A compatible.

 **NOTE: The monitor’s USB ports work only when the monitor is on or in Standby Mode. On in Standby Mode, if the USB cable (A to C or C to C) is plugged in, the USB ports can work normally. Otherwise, follow the OSD setting of Other USB Charging, if the setting is “On in Standby Mode” then USB work normally, otherwise USB is disabled. If you turn off the monitor and then turn it on, the attached peripherals may take a few seconds to resume normal functionality.**

Driver installation

Install the Realtek USB GBE Ethernet Controller Driver available for your system. This is available for download at <https://www.dell.com/support> under the “Driver and download” section.

Network (RJ45) data rate via USB-C max speed is 1000 Mbps.

 **NOTE: This LAN port is 1000Base-T IEEE 802.3az compliant, supporting Mac Address (Printed on model label) Pass-thru (MAPT), Wake-on-LAN (WOL) from standby mode (S3 only) and UEFI PXE Boot function [UEFI PXE Boot is not supported on Dell Desktop PC's (except for OptiPlex 7090/3090 Ultra Desktop)], these 3 features depend on BIOS settings and version of the OS. Functionality may vary with Non Dell PC's.**

RJ45 Connector LED status:

LED	Color	Description
Right LED	Amber or Green	Speed indicator: <ul style="list-style-type: none">• Amber On - 1000 Mbps• Green On - 100 Mbps• Off - 10 Mbps
Left LED	Green	Link / Activity indicator: <ul style="list-style-type: none">• Blinking - Activity on the port.• Green On - Link is being established.• Off - Link is not established.

 **NOTE:** RJ45 cable is non in-box standard accessory.

Plug-and-Play capability

You can connect the monitor to any Plug and Play-compatible system. The monitor automatically provides the computer with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so that the computer can configure itself and optimize the monitor settings. Most monitor installations are automatic; you can select different settings as required. For more information about changing the monitor settings, see [Operating the Monitor](#).

LCD monitor quality and pixel policy

During the LCD Monitor manufacturing process, it is not uncommon for one or more pixels to become fixed in an unchanging state which are hard to see and do not affect the display quality or usability. For more information on Dell Monitor Quality and Pixel Policy, see <https://www.dell.com/pixelguidelines>.

Maintenance guidelines

Cleaning your monitor

 **WARNING:** Using improper methods when cleaning the monitor can result in a physical damage to the screen or the body of your Dell monitor.

 **CAUTION:** Read and follow the [Safety instructions](#) before cleaning the monitor.

 **WARNING:** Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.

For best practices, follow the instructions in the list below when unpacking, cleaning, or handling your monitor:

- To clean the Dell monitor screen, lightly dampen a soft, clean cloth with water. If possible, use a special screen-cleaning tissue or solution suitable for the Dell monitor screen.

 **CAUTION:** Do not use detergents or other chemicals such as benzene, thinner, ammonia, abrasive cleaners, or compressed air.

 **CAUTION:** Using chemicals for cleaning may cause changes in the appearance of the monitor, such as color fading, milky film on the monitor, deformation, uneven dark shade, and peeling of screen area.

 **WARNING:** Do not spray the cleaning solution or even water directly on the surface of the monitor. Doing so will allow liquids to accumulate at the bottom of the display panel and corrode the electronics resulting in permanent damage. Instead, apply the cleaning solution or water to a soft cloth and then clean the monitor.

 **NOTE:** Monitor damages due to improper cleaning methods and the use of benzene, thinner, ammonia, abrasive cleaners, alcohol, compressed air, detergent of any kind will lead to a Customer Induced Damage (CID). CID is not covered under the standard Dell warranty.

- If you notice white powder when you unpack your monitor, wipe it off with a cloth.
- Handle your monitor with care as a darker-colored monitor may get scratched and show white scuff marks more than a lighter-colored monitor.
- To help maintain the best image quality on your monitor, use a dynamically changing screen saver and turn off your monitor when not in use.

Setting up the monitor

Attaching the stand

-  **NOTE:** The stand is not installed at the factory when shipped.
-  **NOTE:** The following instructions are applicable only for the stand that was shipped with your monitor. If you are attaching a stand that you purchased from any other source, follow the setup instructions that were included with the stand.

To attach the monitor stand:

1. Open the front flap of the box to get the stand riser and stand base.

2. Align and place the stand riser on the stand base.
3. Open the screw handle at the bottom of the stand base and turn it clockwise to secure the stand assembly.

- 4.** Close the screw handle.

- 5.** Open the protective cover on the monitor to access the VESA slot on the monitor.

- 6.** Slide the tabs on the stand riser into the slots on the display back cover and lower the stand assembly to snap it into place.

7. Hold the stand riser and lift the monitor carefully, then place it on a flat surface.

 **NOTE:** Hold the stand riser firmly when lifting the monitor to avoid any accidental damage.

8. Tear the paper cushion from the monitor.

9. Lift the protective cover from the monitor.

Using the tilt, swivel, and vertical extension

NOTE: The following instructions are applicable only for the stand that was shipped with your monitor. If you are connecting a stand that you purchased from any other source, follow the set up instructions that were included with the stand.

Tilt, swivel and vertical extension

With the stand attached to the monitor, you can tilt the monitor for the most comfortable viewing angle.

NOTE: The stand is detached when the monitor is shipped from the factory.

Organizing your cables

After attaching all necessary cables to your monitor and computer, (see [Connecting Your Monitor](#) for cable attachment) organize all cables as shown above.

If your cable is not able to reach your PC, you may connect directly to the PC without routing through the slot on the monitor stand.

Connecting your monitor

-  **WARNING:** Before you begin any of the procedures in this section, follow the [Safety Instructions](#).
-  **NOTE:** Dell monitors are designed to work optimally with the Dell supplied cables inside the box. Dell does not guarantee the video quality and performance if non-Dell cables are used.
-  **NOTE:** Route the cables through the cable-management slot before connecting them.
-  **NOTE:** Do not connect all the cables to the computer at the same time.
-  **NOTE:** The images are for the purpose of illustration only. The appearance of the computer may vary.

To connect your monitor to the computer:

1. Turn off your computer.
2. Connect the DisplayPort or USB cable, and the USB Type-C cable from your monitor to the computer.
3. Turn on your monitor.
4. Select the correct input source from the OSD Menu on your monitor and then turn on your computer.

-  **NOTE:** U3223QZ default setting is DisplayPort 1.4. A DisplayPort 1.1 Graphic card may not display normally. Please refer to [product specific problems – No image when using DP connection to the PC to change default setting](#).

Connecting the HDMI cable (Optional)

Connecting the DP cable

Connecting the monitor for DP Multi-Stream Transport (MST) function

-  **NOTE:** Supports the DP MST feature. To make use of this feature, your PC Graphics Card must be certified to at least DP1.2 with MST option.
-  **NOTE:** Remove the rubber plug when using DP out connector.

Connecting the USB-C Cable (A to C)

NOTE: This connection only data is available and no video. Need another video connection for display.

Connecting the USB Type-C cable (C to C) (Optional)

The USB Type-C port on your monitor:

- Can be used as USB-C or DisplayPort 1.4, alternatively.
- Supports USB Power Delivery (PD), with profiles up to 90W.

NOTE: Regardless of the power requirement/actual power consumption of your laptop, or the remaining power runtime in your battery, the Dell monitor is designed to supply power delivery of up to 90 W to your laptop.

Rated power (on laptops that have USB Type-C with Power Delivery)	Maximum charging power
45 W	45 W
65 W	65 W
90 W	90 W
130 W	Not supported

Connecting the monitor for USB-C Multi-Stream Transport (MST) function

NOTE: The maximum number of supported via MST is subjected to the bandwidth of the USB-C source. Please refer to “[product specific problems –No image when using USB Type-C MST](#)”.

NOTE: Remove the rubber plug when using DP out connector.

Connecting the monitor for RJ45 Cable (Optional)

Dell Power Button Sync (DPBS)

The monitor is designed with Dell Power Button Sync (DPBS) feature to allow you to control PC system power state from the monitor power button. This feature is compatible with Dell OptiPlex 7090/3090 Ultra platform, and is only supported over USB-C interface.

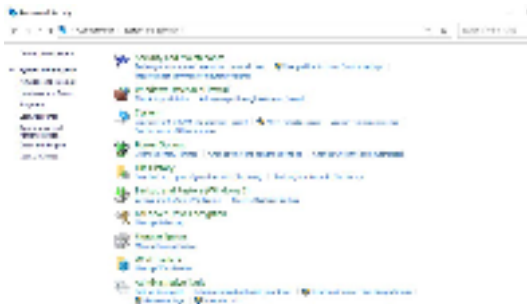

To make sure the DPBS function works for the first time, you should do the following steps for Dell OptiPlex 7090/3090 Ultra platform in the **Control Panel** first.

 **NOTE:** DPBS only supports the port with  icon.

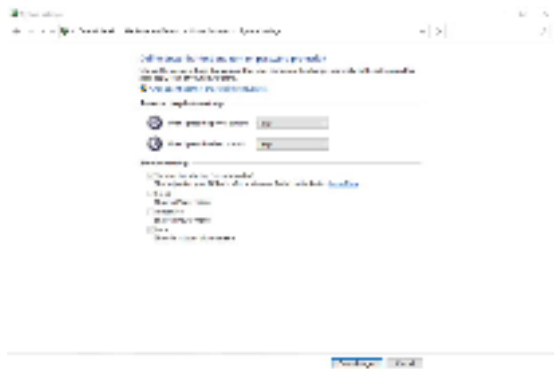

1. Go to **Control Panel**.

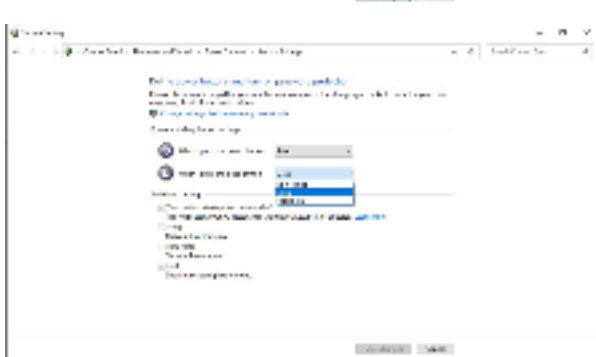

2. Select **Hardware and Sound**, followed by **Power Options**.

3. Go to **System Settings**

4. In the drop-down menu of **When I press the power button**, there are a few options for selection namely **Do nothing/Sleep/Hibernate/Shut down**, and you can select **Sleep/Hibernate/Shut down**.

NOTE: Do not select Do nothing, otherwise monitor power button cannot sync with PC system power state.

Connecting the monitor for DPBS for the first time

For the first time setting up the DPBS function, please follow below steps:

1. Make sure both the PC and monitor is OFF.
2. Connect the USB-C cable from the PC to the monitor.
3. Press the monitor power button to turn ON the monitor.
4. Both the monitor and PC will turn ON momentarily. Wait for a while (approximately 6 seconds) and both the PC and monitor will turn OFF.
5. Press either the monitor power button or PC power button, both the PC and monitor will turn ON. The PC system power state is in sync with the monitor power button.

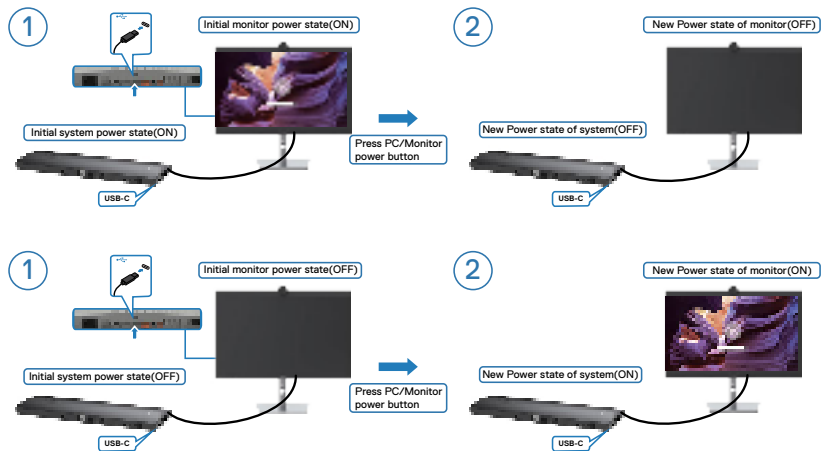

NOTE: When the monitor and PC are both at power OFF state at first time, it is recommended that you turn ON the monitor first, then connect the USB-C cable from the PC to the monitor.

NOTE: You can power the OptiPlex 7090/3090 Ultra platform using its DC adaptor jack. Alternatively, you can power the OptiPlex 7090/3090 Ultra platform using the monitor's USB-C cable via Power Delivery (PD); please set USB-C Charging to On in Off Mode.

Using DPBS function

When you press the monitor power button or PC power button, the Monitor / PC state is as follows:

When the monitor and PC power state are both ON, while you **press and hold 4 seconds on monitor power button**, the screen prompt will ask if you would like to shut down the PC.

When the monitor and PC power state are both ON, while **you press and hold 10 seconds on monitor power button**, the PC will shut down.

Connecting the monitor for USB-C Multi-Stream Transport (MST) function

A PC is connected to two monitors in an initially OFF power state, and the PC system power state is in sync with Monitor 1 power button. When you press the Monitor 1 or PC power button, both the Monitor 1 and PC turns ON. Meanwhile the Monitor 2 will remain OFF. You need to manually press the power button on Monitor 2 to turn it ON.

Similarly, a PC is connected to two monitors in an initially ON power state, and the PC system power state is in sync with Monitor 1 power button. When you press the Monitor 1 or PC power button, both the Monitor 1 and PC turns OFF. Meanwhile the Monitor 2 will be in Standby mode. You need to manually press the power button on Monitor 2 to turn it OFF.

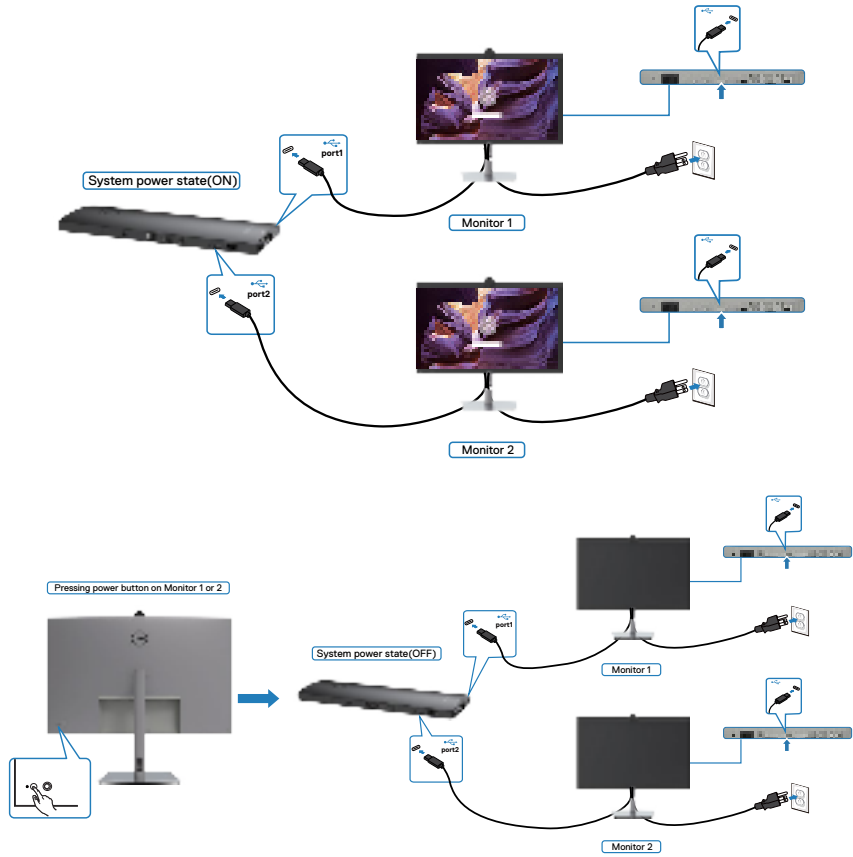

Connecting the monitor for USB-C

The Dell OptiPlex 7090 Ultra platform has two USB-C ports, so both Monitor 1 and Monitor 2 power state can sync with the PC.

While the PC and two monitors are in an initially ON power state, by pressing the power button on Monitor 1 or Monitor 2 will turn OFF the PC, Monitor 1, and Monitor 2.

 **NOTE: DPBS only supports the port with  icon.**

Make sure to set **USB-C Charging** to On in Off Mode. While the PC and two monitors are in an initially OFF power state, by pressing the power button on Monitor 1 or Monitor 2 will turn ON the PC, Monitor1, and Monitor 2.

Operating the monitor webcam

The webcam which offers the following:

- Camera offer 0-20 degree tilt adjustability
- 4K video at 30 fps and Full HD video at 60 fps
- AI Auto-framing
- 5x digital zoom
- Adjustable field-of-view with autofocus
- High Dynamic Range (HDR) and video noise reduction support
- Walk Away Lock and Wake on Approach support
- Windows Hello support
- Additional customization using Dell Peripheral Manager

Auto-framing (Single user framing) :

- If the user is within 2 meters of the webcam, the webcam will enable the Auto-framing.
- (single user framing) feature and adjust the frame to focus on the user. You can enable Autoframing to ensure the camera always keeps you in the center of the frame.

HDR and Video Noise Reduction :

- The webcam's Digital Overlap HDR guarantees superior picture quality in extreme lighting environments, while video noise reduction automatically eliminates grainy images in low light.

Dell Peripheral Manager

What is Dell Peripheral Manager?

The Dell Peripheral Manager application helps you manage and set up various Dell Peripherals connected to your computer. It allows the user to make changes to webcam settings of the device and provides additional customization.

For more details on the application and the customizations available for the Dell U3223QZ, find the User's Guide for Dell Peripheral Manager at

www.dell.com/support.

Securing your monitor using Kensington lock (optional)

The security lock slot is located at the bottom of the monitor. (See [Security lock slot](#)). Secure your monitor to a table using the Kensington security lock.

For more information on using the Kensington lock (purchased separately), see the documentation that is shipped with the lock.

 **NOTE:** The image is for the purpose of illustration only. Appearance of the lock may vary.

Removing the monitor stand

 **NOTE:** To prevent scratches on the LCD screen when removing the stand, ensure that the monitor is placed on a soft surface and handle it carefully.

 **NOTE:** The following steps are specifically for removing the stand that is shipped with your monitor. If you are removing a stand that you purchased from any other source, follow the setup instructions that are included with the stand.

To remove the stand:

 **CAUTION:** Place the monitor screen on the desktop. Take note that the webcam is slightly protruded out of the monitor screen, please protect the webcam surface to prevent wear by the desktop.

1. Place the monitor on a soft cloth or cushion.
2. Press and hold the stand-release button.
3. Lift the stand up and away from the monitor.

Wall mounting (Optional)

 **NOTE: Use M4 x 10 mm screws to connect the monitor to the wall-mounting kit.**

Refer to the instructions that come with the VESA-compatible wall mounting kit.

1. Place the monitor on a soft cloth or cushion on a stable flat table.
2. Remove the stand.
3. Use a Phillips crosshead screwdriver to remove the four screws securing the plastic cover.
4. Attach the mounting bracket from the wall mounting kit to the monitor.
5. Mount the monitor on the wall as instructed in the documentation that shipped with the wall-mounting kit.

 **NOTE: For use only with UL or CSA or GS-listed wall mount bracket with minimum weight/load bearing capacity of 29.04 kg (64.02 lb).**

Operating the monitor

Power on the monitor

Press the  button to turn on the monitor.

Using the joystick control

To modify the OSD adjustments using the joystick control on the rear end of the monitor, do the following:

1. Press the joystick to open the OSD Menu Launcher.
2. Move the joystick up/down/left/right to toggle between the OSD menu options.

Joystick Functions

Joystick	Description
	Press joystick to open the OSD Menu Launcher.
	For right and left navigation.
	For up and down navigation.

Using the rear-panel controls

Press the Joystick to open the OSD Menu Launcher.

Menu Launcher

- Toggle the Joystick **Up** to open the **Main Menu**.
- Toggle the Joystick **Left** or **Right** to select the desired **Shortcut Keys**.
- Toggle the Joystick **Down** to **Exit**.

Menu Launcher Details

The following table describes the Menu Launcher icons:

Options	Description
 Shortcut key: Menu	Use this Menu button to launch the on-screen display (OSD) and select the OSD menu.
 Shortcut key: Preset Modes	Use this button to choose from a list of preset color modes .
 Shortcut key: Brightness/Contrast	To directly access the Brightness/Contrast adjustment sliders.
 Shortcut key: Display Info	Use this button to choose from a list of Display Info .
 Shortcut key: Volume	Use this button to adjust the volume of the built-in speakers.

Options	Description
 Shortcut key: Input Source	Use this button to choose from a list of Input Source .
 Shortcut key: Aspect Ratio	Use this button to choose from a list of Aspect Ratio .
 Exit	Use this button to go back to the main menu or exit the OSD main menu.

Front-panel button

Use the buttons on the front of the monitor to adjust the image settings.

Front Panel	Description
1  Up  Down	Use the Up (increase) and Down (decrease) buttons to adjust items in the OSD menu.
2  Previous	Use the Previous button to go back to the previous menu.
3  Next	Use the Next button to confirm your selection.
4  Tick	Use the Tick button to confirm your selection.

Using the Main Menu

Icon	Menu and Submenus	Description
	Brightness/Contrast	Use this menu to activate Brightness/Contrast adjustment. <div></div> <div></div>
	Brightness	Adjusts the luminance of the backlight (Range: 0 - 100). Move the Joystick Up to increase brightness. Move the Joystick Down to decrease brightness.
	Contrast	Adjust the Brightness first, and then adjust Contrast only if further adjustment is necessary. Move the Joystick Up to increase contrast and Move the Joystick Down to decrease contrast (Range: 0 - 100). The Contrast function adjusts the degree of difference between darkness and lightness on the monitor screen.

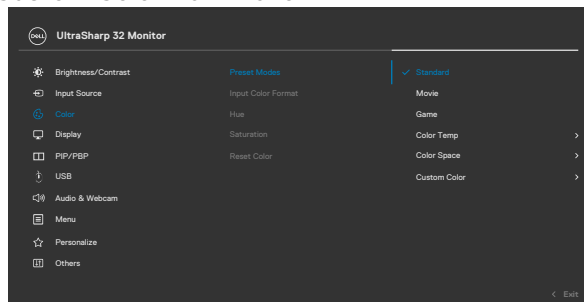

Icon	Menu and Submenus	Description
	Input Source	Use the Input Source menu to select between different video inputs that are connected to your monitor.
		
		
USB-C 90 W		Select USB-C 90 W input when you are using the USB-C 90 W connector. Press the joystick button to confirm the selection.
DP		Select DP input when you are using the DP (DisplayPort) connector. Press the joystick button to confirm the selection.
HDMI		Select the HDMI input when you are using the HDMI connector. Press the joystick button to confirm the selection.
Auto Select		Allows you to scan for available input sources. Press  to select this function.
Auto Select for USB-C		Press  to select these functions: <ul style="list-style-type: none"> ◆ Prompt for Multiple Inputs: always show Switch to USB-C Video Input message for user to choose whether to switch or not. ◆ Yes: The monitor always switch to USB-C video without asking while USB-C connected. ◆ No: The monitor will NOT auto switch to USB-C video from another available input.
Rename Inputs		Allows you to Rename Inputs .
Reset Input Source		Resets all settings under the Input Source menu to the factory defaults. Press  to select this function.

Icon	Menu and Submenus	Description
	Color	Adjusts the color setting mode.

Preset Modes When you select Preset Modes, you can choose **Standard**, **Movie**, **Game**, **Color Temp**, **Color Space** or **Custom Color** from the list.

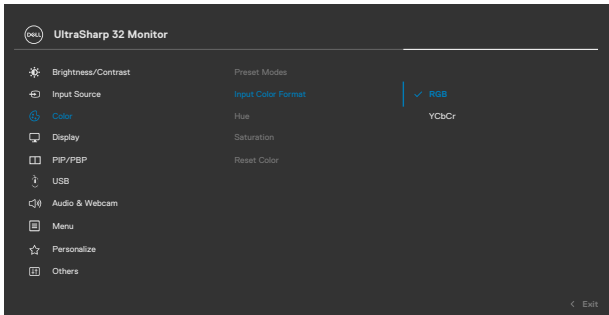

Icon	Menu and Submenus	Description
		<ul style="list-style-type: none"> ♦ Standard: Default Color setting. This monitor uses a low blue light panel, and is certified by TUV to reduce blue light output and create a more relaxing and less stimulating image while reading content on the screen. ♦ Movie: Ideal for movies. ♦ Game: Ideal for most gaming applications. ♦ Color Temp: The screen appears warmer with a red/yellow tint with slider set at 5,000K or cooler with blue tint with slider set at 10,000K. ♦ Color Space: Allows users to select the color space: sRGB, Rec. 709, DCI-P3. ♦ Custom Color: Allows you to manually adjust the color settings. Press the joystick left and right buttons to adjust the Red, Green, and Blue values and create your own preset color mode.

Input Color Format

Allows you to set the video input mode to:

- ♦ **RGB:** Select this option if your monitor is connected to a computer or a media player that supports RGB output.
- ♦ **YCbCr:** Select this option if your media player supports only YCbCr output.

Hue

Use Joystick **Up** or **Down** to adjust the **Hue** from 0 to 100.

NOTE: Hue adjustment is available only for **Movie** and **Game** mode.

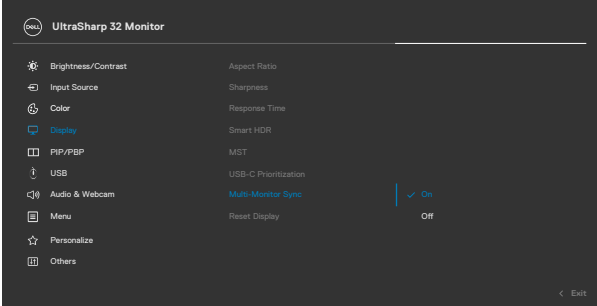

Icon	Menu and Submenus	Description
	Saturation	Use Joystick Up or Down to adjust the Saturation from 0 to 100. NOTE: Saturation adjustment is available only for Movie and Game mode.
	Reset Color	Resets your monitor's color settings to the factory defaults. Press  to select this function.
	Display	Use the Display menu to adjust image.
		 
	Aspect Ratio	Adjust the image ratio to 16:9,Auto Resize, 4:3, 1:1 .
	Sharpness	Makes the image look sharper or softer. Move the joystick up and down to adjust the sharpness from '0' to '100'.
	Response Time	Allows you to set the Response Time to Normal or Fast .

Icon	Menu and Submenus	Description
	Smart HDR	<p>Press  to select these functions.</p> <p>Smart HDR (High Dynamic Range) automatically enhances the display output by adjusting the settings optimally to resemble life-like visuals.</p> <p>Desktop: This is the default mode. This mode is more suitable for general usage of the monitor with a desktop computer.</p> <p>Movie HDR: Use this mode during playback of HDR video content to expand the contrast ratio, brightness, and color palette. It matches the video quality with real life visuals.</p> <p>Game HDR: Use this mode when playing games that support HDR to expand the contrast ratio, brightness, and color palette. It makes gaming experience more realistic as intended by game developers.</p> <p>DisplayHDR: Best used with content that complies with DisplayHDR standards.</p> <p>Off: Disables Smart HDR function.</p> <p>NOTE: The possible peak luminance during HDR mode is 400-nits (typical). The actual value and duration during HDR playback might vary accordingly to the video content.</p>
	MST	<p>DP Multi Stream Transport, Set to ON enables MST (DP out), Set to OFF disables MST function.</p> <p>NOTE: When DP/USB-C upstream cable and DP downstream cable is connected, monitor will set MST = ON automatically, this action will only be done once after Factory Reset or Display Reset. Please refer to Connecting the Monitor for DP Multi-Stream Transport (MST) Function.</p>

Icon	Menu and Submenus	Description
	USB-C Prioritization	Allows you to specify the priority to transfer the data with high resolution (High Resolution) or high speed (High Data Speed) when using the USB-C port/DisplayPort.
	Multi-Monitor Sync	Multi-Monitor Sync allows multiple monitors that are daisy chained via DisplayPort to synchronize a pre-defined group of OSD settings in the background. An OSD option, “ Multi-Monitor Sync ” will be created in Display Menu to allow user to enable/disable syncing.

Reset Display	Resets all settings under the Display menu to the factory defaults. Press  to select this function.

PIP/PBP

This function brings up a window displaying image from another input source.

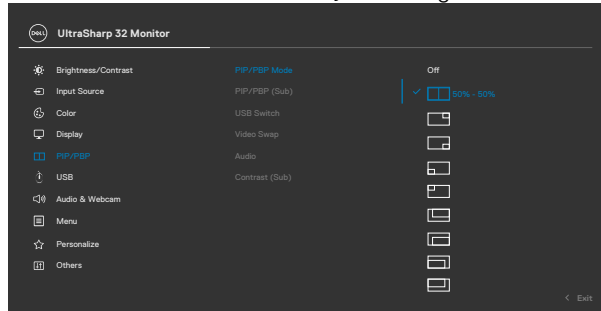

Main Window	Sub-Window		
	USB Type-C	DP	HDMI
USB Type-C	✓	✓	✓
DP	✓	✓	✓
HDMI	✓	✓	✓

NOTE: The images under PBP will be displayed at the center of the screen, not full screen.

Icon	Menu and Submenus	Description
------	-------------------	-------------

PIP/PBP Mode Adjusts the PIP or PBP (Picture by Picture) mode. You can disable this feature by selecting Off.

Icon	Menu and Submenus	Description
	PIP/PBP (Sub)	Select between the different video signals that may be connected to your monitor for the PBP sub-window. Press the  button to select the PBP sub-window source signal.
		 
	USB Switch	Select to switch between the USB upstream sources in PBP mode. Move the joystick to switch among USB upstream sources in PBP mode.
	Video Swap	Select to swap videos between main window and sub-window in PBP mode. Move the joystick to swap main window and sub-window.
	Audio	Allows you to set the audio source from the main window or the sub-window.
	Contrast (Sub)	Adjust the Contrast level of the picture in PBP Mode. Move the Joystick to increase or decrease the contrast.

Icon	Menu and Submenus	Description
	USB	<p>Allows you to set the USB upstream port for the DP input signals, thus the monitor's USB downstream port (For example, keyboard and mouse) can be used by the current input signals when you connect a computer to either one of the upstream ports. When you use only one upstream port, the connected upstream port is active.</p>   <p>NOTE: To prevent data damage or loss, before changing USB upstream ports, make sure that NO USB storage devices are in use by the computer connected to the monitor's USB upstream port.</p>
	Show KVM Setup Guide	Select this option and follow steps if you want to connect multiple computers to the monitor and use one setup of keyboard and mouse.

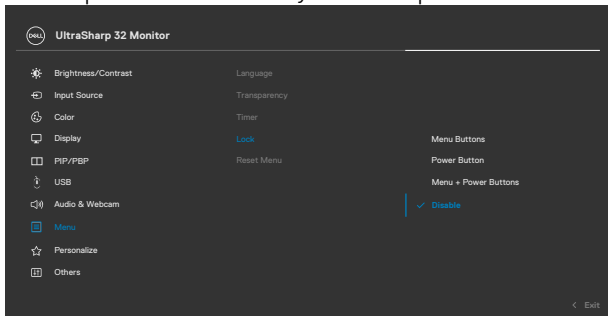

Icon	Menu and Submenus	Description
	Audio & Webcam	Use the Audio Settings menu to adjust the audio settings.
	 	
	Volume	<p>Allows you to increase the speaker volume.</p> <p>Move the joystick up and down to adjust the volume from '0' to '100'.</p>
	Speaker	Select On or Off the Speaker function.
	Microphone	Select Mute or Unmute the Microphone function.
	Webcam & Presence Sensor	<p>Select Enable or Disable the Webcam and Presence Sensor function.</p> <p>NOTE: Disabling “webcam & presence sensor” will turn off the whole webcam module, webcam and sensor will not appear in the system. “Camera disable” button will not work as well.</p> <p>Camera disable button at the front is used to lock and unlock shutter.</p>
	Audio Profiles	Expand to show the various audio profiles.
	Reset Audio & Webcam	Resets all settings under the Audio and Webcam menu to the factory preset values.

Icon	Menu and Submenus	Description
	Menu	Select this option to adjust the settings of the OSD, such as the languages of the OSD, the amount of time the menu remains on screen, and so on.
		 
	Language	Set the OSD display to one of eight languages. (English, Spanish, French, German, Brazilian Portuguese, Russian, Simplified Chinese, or Japanese).
	Transparency	Select this option to change the menu transparency by moving the Joystick up or down (Range: 0 - 100).
	Timer	<p>OSD Hold Time: Sets the length of time the OSD remains active after you press a button.</p> <p>Move the joystick to adjust the slider in 1-second increments, from 5 to 60 seconds.</p>

Icon	Menu and Submenus	Description
	Lock	With the control buttons on the monitor locked, you can prevent people from accessing the controls. It also prevents accidental activation in multiple monitors side-by-side setup.

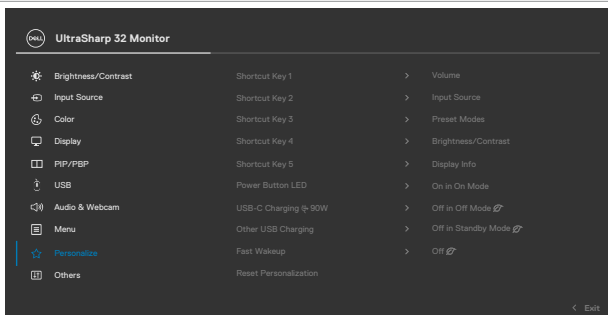

- **Menu Buttons:** Through OSD to lock the Menu buttons.
- **Power Button:** Through OSD to lock the Power button.
- **Menu + Power Buttons:** Through OSD to lock the all of Menu and Power buttons.
- **Disable:** Move the Joystick left and hold for 4 seconds.

Reset Menu

Resets all settings under the **Reset Menu** to the factory defaults.

Press  to select this function.

Personalize

Icon	Menu and Submenus	Description
	Shortcut key 1	
	Shortcut key 2	Select from Volume, Preset Modes, Brightness/Contrast, Input Source, Display Info set as shortcut key.
	Shortcut key 3	
	Shortcut key 4	
	Shortcut key 5	
	Power Button LED	Allows you to set the state of the power light to save energy.
	USB-C Charging 90 W 	Allows you to enable or disable USB-C Charging 90W charging function during monitor power off mode. NOTE: When this function is enabled, you will be able to charge your notebook or mobile devices through the USB-C cable even when the monitor is powered Off.
	Other USB Charging	Allows you to enable or disable Other USB Charging function during monitor Standby mode. NOTE: When this function is enabled, you will be able to charge your mobile phone through the USB-A cable even when the monitor is in standby mode.
	Fast Wakeup	Speed up recovery time from sleep mode.
	Reset Personalization	Resets all settings under the Personalize to the factory defaults. Press  to select this function.

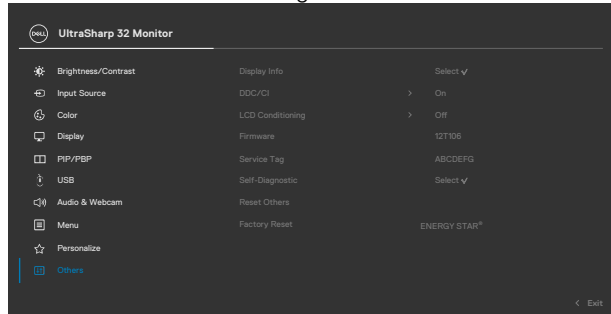

Icon Menu and Submenus

Others

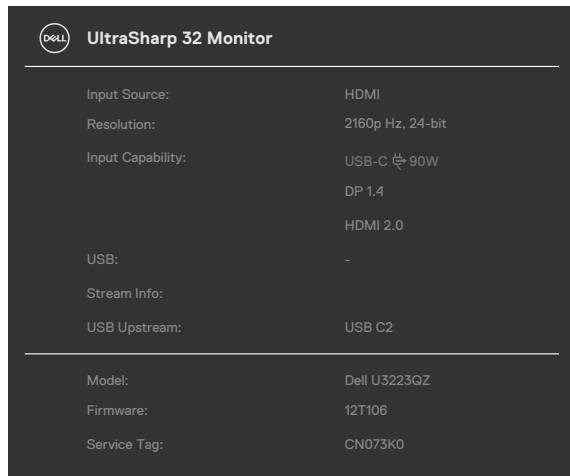

Description

Select this option to adjust the OSD settings such as the **DDC/CI**, **LCD** conditioning, and so on.

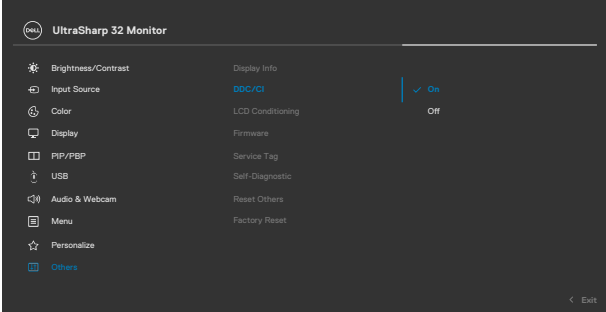

Display Info

Displays the monitor's current settings. Press  to select this function.

Icon	Menu and Submenus	Description
	DDC/CI	DDC/CI (Display Data Channel/Command Interface) allows your monitor parameters (brightness, color balance, and etc.) to be adjustable via the software on your computer. You can disable this feature by selecting Off . Enable this feature for best user experience and optimum performance of your monitor.

Icon	Menu and Submenus	Description
	LCD Conditioning	Helps reduce minor cases of image retention. Depending on the degree of image retention, the program may take some time to run. You can enable this feature by selecting On .
		 
	Firmware	Displays the Firmware version of your monitor.
	Service Tag	Displays the Service Tag . The Service Tag is a unique alphanumeric identifier that allows Dell to identify the product specifications and access warranty information. NOTE: The Service Tag is also printed on a label located at the back of the cover.
	Self-Diagnostic	Use this option to run the built-in diagnostics, see Built-in Diagnostics .
	Reset Others	Resets all settings under the Others menu to the factory defaults. Press  to select this function.
	Factory Reset	Restores all preset values to the factory default settings. These are also the settings for ENERGY STAR® tests.

Using the OSD lock function

You can lock the front-panel control buttons to prevent access to the OSD menu and/or power button.

Use the Lock menu to lock the button(s).

- 1. Select one of the following options.

- 2. The following message appears.

- 3. Select **Yes** to lock buttons. Once locked, pressing any control button will display the lock icon .

Use the Joystick to lock the button(s).

Press the left directional navigation of Joystick for four seconds, a menu appears on the screen.

Select one of the following options:

Options	Description
1  Menu Button lock	Select this option to lock OSD menu function.
2  Power Button lock	Use this option to lock power button. This will prevent the user to turn off the monitor using the power button.
3  Menu and Power Button lock	Use this option to lock OSD menu and power button to turn off the monitor.

To unlock the button(s).

Press the left directional navigation of Joystick for four seconds until a menu appears on the screen. The following table describes the options to unlock the front-panel control buttons.

Options	Description
1  Menu Button unlock	Use this option to unlock OSD menu function.
2  Power Button unlock	Use this option to unlock power button to turn off the monitor.
3  Menu and Power Button unlock	Use this option to unlock OSD menu and power button to turn off the monitor.

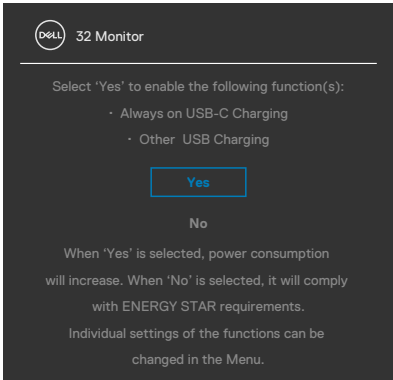

Initial Setup

When you select OSD items of **Factory Reset** in Other feature, the following message will appear:

When you select '**Yes**' to reset to default settings, the following message will appear:

OSD warning messages

When the monitor does not support a particular resolution mode, you can see the following message:

This means that the monitor cannot synchronize with the signal that it is receiving from the computer. See [Monitor Specifications](#) for the Horizontal and Vertical frequency ranges addressable by this monitor. Recommended mode is **3840 x 2160**. You can see the following message before the DDC/CI function is disabled:

When the monitor enters the **Standby Mode**, the following message will appear:

Activate the computer and wake up the monitor to gain access to the [OSD](#). If you press any button other than the power button, the following messages will appear depending on the selected input:

A message is displayed while the cable supporting DP alternate mode is connected to the monitor under the following conditions:

- When Auto Select for **USB-C** is set to **Prompt for Multiple Inputs**.
- When the USB-C cable is connected to the monitor.

If the monitor connect with two ports or more, when the **Auto** of Input Source is selected, it will turn to the next port with signal.

Select OSD items of **On in Standby Mode** in Personalize feature, the following message will appear:

If adjust the Brightness level above the default level over 75%, the following message will appear:

- When user selects “Yes”, the power message is displayed only once.
- When user select ‘No’, the power warning message will pop-up again.
- The power warning message will appear again only when the user does a Factory Reset from the OSD menu.

If either USB Type-C / DP / HDMI input is selected and the corresponding cable is not connected, a floating dialog box as shown below appears.

or

or

When the USB upstream cable is not connected, and you press the **Teams/ Hookswitch/ Mute** button, the following message will appear:

NOTE: For the **Teams/ Hookswitch/ Volume down/ Volume up/ Mute** buttons to work, you need to connect the USB upstream cable (Type-A to Type-C or Type-C to Type-C) from the PC to the monitor.

See [Troubleshooting](#) for more information.

Setting the maximum resolution

NOTE: The steps may vary slightly depending on the version of Windows you have.

To set the maximum resolution for the monitor:

In Windows 8.1:

1. For Windows 8.1, select the Desktop tile to switch to classic desktop.
2. Right-click on the desktop and click **Screen Resolution**.
3. If you have more than one monitor connected, ensure that you select **U3223QZ**.
4. Click the **Screen Resolution** dropdown list and select **3840 x 2160**.
5. Click **OK**.

In Windows 10 and Windows 11:

1. Right-click on the desktop and click **Display Settings**.
2. If you have more than one monitor connected, ensure that you select **U3223QZ**.
3. Click the **Display Resolution** dropdown list and select **3840 x 2160**.
4. Click **Keep changes**.

If you do not see **3840 x 2160** as an option, you must update your graphics driver to the latest version. Depending on your computer, complete one of the following procedures:

If you have a Dell desktop or laptop:

- Go to <https://www.dell.com/support>, enter your service tag, and download the latest driver for your graphics card.

If you are using a non-Dell computer (laptop or desktop):

- Go to the support site for your computer and download the latest graphic drivers.
- Go to your graphics card website and download the latest graphic drivers.

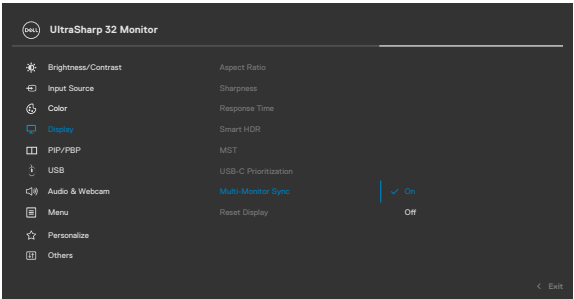

Multi-Monitor Sync (MMS)

Multi-Monitor Sync allows multiple monitors that are daisy chained via DisplayPort to synchronize a pre-defined group of OSD settings in the background.

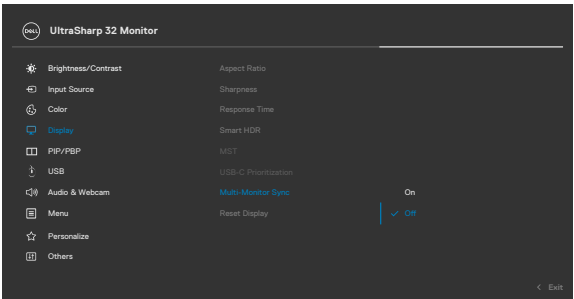

An OSD option, **Multi-Monitor Sync** is available in Display Menu to allow user to enable/disable syncing.

 **NOTE: MMS is not supported over HDMI interface.**

If Monitor 2 supports Multi-Monitor Sync, its MMS option will automatically be set to **On** for syncing as well.

If syncing of OSD settings across monitors is not preferred, this feature can be disabled by setting MMS option of any of the monitor to **Off**.

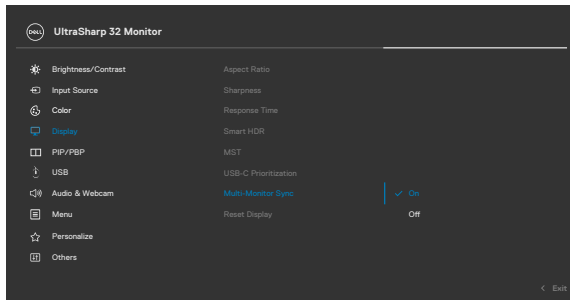

OSD Settings to be synchronized

- Brightness
- Contrast
- Preset Modes
- Color Temperature
- Custom Color (RGB Gain)
- Hue (Movie, Game mode)
- Saturation (Movie, Game mode)
- Response Time
- Sharpness

Setting Multi-Monitor Sync (MMS)

During initial power on or connection of new monitor, user setting synchronization only start if MMS is **On**. All monitor should synchronize settings from Monitor 1.

After first synchronization, subsequent syncing is driven by changes to the predefined group of OSD settings from any node in the chain. Any node may initiate the changes downstream and upstream.

Setting up Windows Hello

In Windows® 10 / Windows® 11:
Click Windows start menu, click **Settings**.

Click **Accounts**.

Click **Sign-in options**. You must set up a PIN before you can enroll in Windows Hello.

Click **Add** under **PIN** enter to **Set up a PIN**. Enter New PIN and Confirm PIN, and then click **OK**.

Once you've done that, the options to set up Windows Hello will unlock. Click **Set up** under **Windows Hello**, enter to **Windows Hello setup**.

The following message is displayed, click **Get started**.

Keep looking directly at your screen and position yourself so that your face is in the center of the frame that appears on screen. The webcam will then register your face.

When the following message is displayed, click **Close** to exit **Windows Hello setup**.

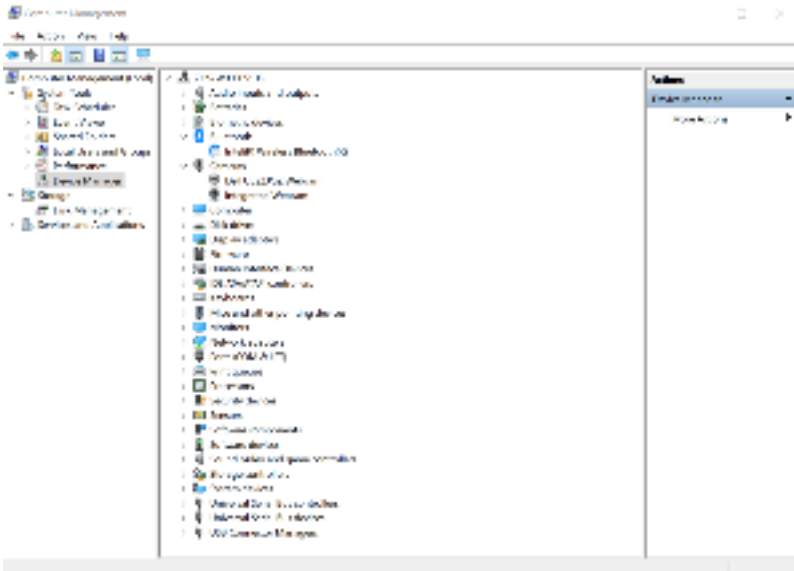

Once you have set up, you have another option to improve the recognition. Click **Improve recognition** if necessary.

Setting up the monitor webcam as default setting

When using a notebook with built-in webcam to connect this monitor, in the device manager interface, you can find the notebook built-in webcam and the monitor webcam. Normally, they are in enable status, and the default setting is using notebook built-in webcam.

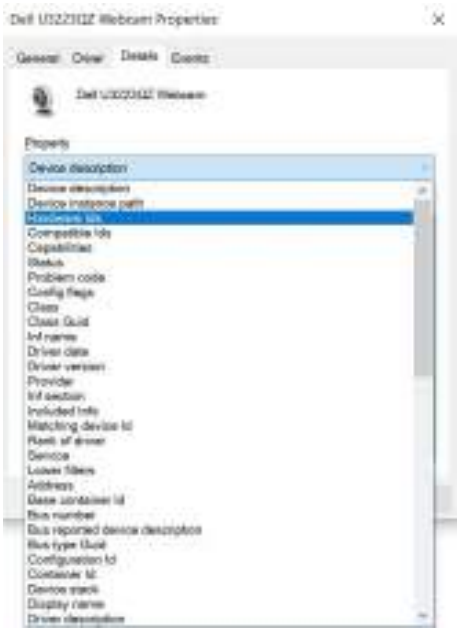

If you want to set up the monitor webcam as default setting, you need disable the notebook built-in webcam. To identify the notebook built-in webcam and disable it, please follow below instructions:

Right-click **Dell Monitor IR Webcam**, and click **Properties** to open the **Dell Monitor IR Webcam Properties**.

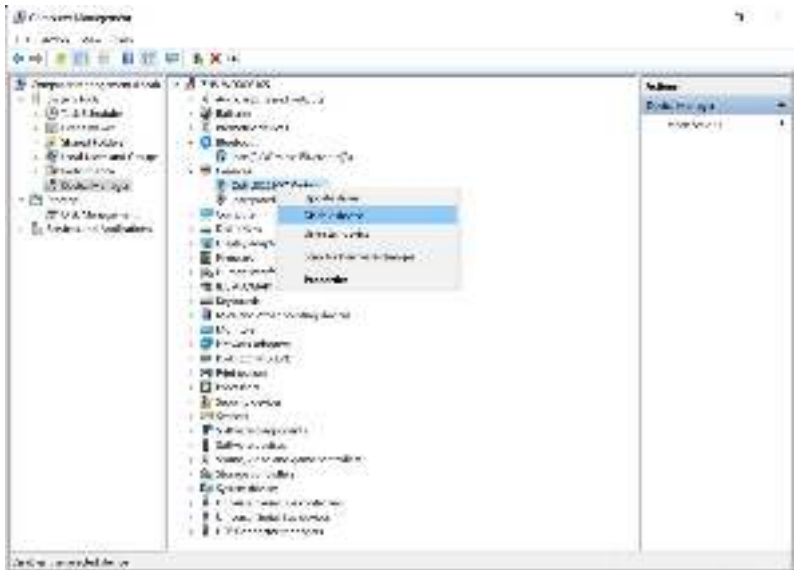

Click **Details > Property** and select **Hardware Ids**.

The **Value** will show the detail hardware ids of this Dell Monitor IR Webcam. The hardware ids of the notebook built-in webcam and the monitor webcam are different. For U3223QZ, the monitor webcam hardware ids will show as below:

Right click the **PC/Notebook** webcam which has different hardware ids , and then click **Disable**.

The following message is displayed:

Click Yes. The notebook webcam is now disabled and the monitor webcam will be used as the default setting. Restart the notebook.

Setting up the monitor speaker as default setting

When your computer connects multiple speakers, if you want to set up the monitor speaker as default setting, please follow below instructions:

Right-click **Volume** in the Windows task bar notification area.

Click **Playback devices** enter to **Sound** setting interface.

If only the HDMI or DP cable is connected from your monitor to the computer, only one speaker named **DELL U3223QZ** from the monitor will show in the **Sound** setting interface.

Click **DELL U3223QZ**, and then click **Set Default**, the monitor speaker will be used as the default setting.

Click **OK** to exit the **Sound** setting.

If the USB cable and the HDMI or DP cable are connected from monitor to the computer, two audio paths named **DELL U3223QZ** and **Echo Cancelling Speakerphone U3223QZ** from the monitor will show in the **Sound** setting interface. The **U3223QZ** monitor would show options for two audio paths supported in the monitor.

- **Echo Cancelling Speakerphone** audio path is where audio streams through USB. This is either through USB-C to USB-C cable or USB-A to USB-C cable. As the microphone path streams from monitor back to PC through USB, this selection is required for VoIP/UC conference applications. Audio Recording and Playback will work under this selection.
- **DELL U3223QZ** audio path is where audio streams through HDMI/ DP alternate mode. Under this selection, there will not be microphone support. This selection is suitable for Audio Playback only.

Audio Playback performance would be the same for either audio path selection. Under normal Playback with USB-C to USB-C/USB-A to USB-C and/or for UC conference applications, default selecting the **Echo Cancelling Speakerphone** audio path is recommended.

 **NOTE:** If you select **DELL U3223QZ** audio path, please ensure that the **Echo Cancelling Speakerphone** volume is set to medium or high. Else, the **DELL U3223QZ** maximum volume may sound soft because it is limited by the **Echo Cancelling Speakerphone** volume. For example, when the **Echo Cancelling Speakerphone** volume is at 50%, and the **DELL U3223QZ** volume is set to 100% will have the same sound level as the former.

Troubleshooting

 **WARNING:** Before you begin any of the procedures in this section, follow the **Safety Instructions**.

Self-test

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

1. Turn off both your computer and the monitor.
2. Unplug the video cable from the back of the computer. To ensure proper Self-Test operation, remove all digital and the analog cables from the back of computer.
3. Turn on the monitor.

The floating dialog box should appear on-screen (against a black background), if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains white. Also, depending upon the selected input, one of the dialogs shown below will continuously scroll through the screen.

or

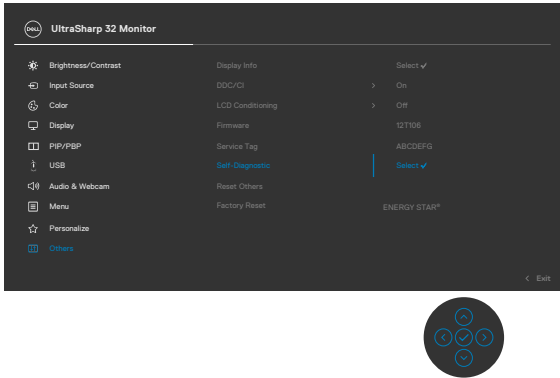

4. This box also appears during normal system operation if the video cable becomes disconnected or damaged.
5. Turn off your monitor and reconnect the video cable; then turn on both your computer and the monitor.

If your monitor screen remains blank after you use the previous procedure, check your video controller and computer, because your monitor is functioning properly.

Built-in diagnostics

Your monitor has a built-in diagnostic tool that helps you determine if the screen abnormality you are experiencing is an inherent problem with your monitor, or with your computer and video card.

To run the built-in diagnostics:

1. Ensure that the screen is clean (no dust particles on the surface of the screen).
2. Press and hold Up or Down or Left or Right direction for four seconds until a menu appears on the screen.
3. Using the joystick control, highlight the Diagnostics  option and press the joystick button to start the diagnostics. A gray screen is displayed.
4. Observe if the screen has any defects or abnormalities.
5. Toggle the joystick once again until a red screen is displayed.
6. Observe if the screen has any defects or abnormalities.
7. Repeat steps 5 and 6 until the screen displays green, blue, black, and white colors. Note any abnormalities or defects.

The test is complete when a text screen is displayed. To exit, toggle the joystick control again.

If you do not detect any screen abnormalities upon using the built-in diagnostic tool, the monitor is functioning properly. Check the video card and computer.

Common Problems

The following table contains general information about common monitor problems you might encounter and the possible solutions:

Common Symptoms	What you experience	Possible solutions
No Video/ Power LED off	No picture	<ul style="list-style-type: none">• Ensure that the video cable connecting the monitor and the computer is properly connected and secure.• Verify that the power outlet is functioning properly using any other electrical equipment.• Ensure that the power button is depressed fully.• Ensure that the correct input source is selected in the Input Source menu.
No Video/ Power LED on	No picture or no brightness	<ul style="list-style-type: none">• Increase brightness and contrast controls via OSD.• Perform monitor self-test feature check.• Check for bent or broken pins in the video cable connector.• Run the built-in diagnostics.• Ensure that the correct input source is selected in the Input Source menu.
Missing Pixels	LCD screen has spots	<ul style="list-style-type: none">• Cycle power on-off.• Pixel that is permanently off is a natural defect that can occur in LCD technology.• For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: https://www.dell.com/pixelguidelines.
Stuck-on Pixels	LCD screen has bright spots	<ul style="list-style-type: none">• Cycle power On-Off.• Pixel that is permanently off is a natural defect that can occur in LCD technology.• For more information on Dell Monitor Quality and PixelPolicy, see Dell Support site at: https://www.dell.com/pixelguidelines.
Brightness Problems	Picture too dim or too bright	<ul style="list-style-type: none">• Reset the monitor to factory settings.• Adjust brightness and contrast controls via OSD.

Common Symptoms	What you experience	Possible solutions
Safety Related Issues	Visible signs of smoke or sparks	<ul style="list-style-type: none"> • Do not perform any troubleshooting steps. • Contact Dell immediately.
Intermittent Problems	Monitor malfunctions on & off	<ul style="list-style-type: none"> • Ensure that the video cable connecting the monitor to the computer is connected properly and is secure. • Reset the monitor to factory settings. • Perform monitor self-test feature check to determine if the intermittent problem occurs in self-test mode.
Missing Color	Picture missing color	<ul style="list-style-type: none"> • Perform monitor self-test. • Ensure that the video cable connecting the monitor to the computer is connected properly and is secure. • Check for bent or broken pins in the video cable connector.
Wrong Color	Picture color not good	<ul style="list-style-type: none"> • Change the settings of the Preset Modes in the Color menu OSD depending on the application. • Adjust R/G/B value under Custom Color in Color menu OSD. • Change the Input Color Format to PC RGB or YPbPr in the Color menu OSD. • Run the built-in diagnostics.
Image retention from a static image left on the monitor for a long period of time	Faint shadow from the static image displayed appears on the screen	<ul style="list-style-type: none"> • Set the screen to turn off after a few minutes of screen idle time. These can be adjusted in Windows Power Options or Mac Energy Saver setting. • Alternatively, use a dynamically changing screensaver.
Mic/Webcam does not work	<ul style="list-style-type: none"> • USB cable not plug in or not select the correct USB source • Not set the monitor Mic/webcam as the default device 	<ul style="list-style-type: none"> • Plug in the USB Cable (Type-A to Type-C or Type-C to Type-C), and if you connect both USB-C port, please switch the USB source in the OSD menu. • Select the monitor Mic/webcam as the default in the PC side. • Touch the Mic button and make sure the Mic mute LED is dark.

Product specific problems

Problem	What you experience	Possible solutions
Screen image is too small	Image is centered on screen, but does not fill entire viewing area	<ul style="list-style-type: none">• Check the Aspect Ratio setting in the Display menu OSD.• Reset the monitor to factory settings.
Cannot adjust the monitor with the joystick control on the rear of the monitor	OSD does not appear on the screen	<ul style="list-style-type: none">• Turn off the monitor, unplug the monitor power cable, plug it back, and then turn on the monitor.
No Input Signal when user controls are pressed	No picture, the LED light is white	<ul style="list-style-type: none">• Check the signal source. Ensure the computer is not in the power saving mode by moving the mouse or pressing any key on the keyboard.• Check whether the signal cable is plugged in properly. Connect the signal cable again, if necessary.• Reset the computer or video player.
The picture does not fill the entire screen	The picture cannot fill the height or width of the screen	<ul style="list-style-type: none">• Due to different video formats (aspect ratio) of DVDs, the monitor may display in full screen.• Run the built-in diagnostics.
No image when using DP connection to the PC	Blank screen	<ul style="list-style-type: none">• Verify which DP standard is your Graphics Card certified to. Download and install the latest graphics card driver.• Some DP 1.1a graphics card cannot support DP 1.2/1.4 monitors. Go to OSD menu, under Input Source selection, press and hold DP select joystick key for 8 seconds to change the monitor setting from DP 1.2 to DP 1.1a, DP 1.4 to DP 1.1a

Problem	What you experience	Possible solutions
No image when using USB Type-C connection to computer, laptop, and so on	Blank screen	<ul style="list-style-type: none"> • Verify if the USB Type-C interface of the device can support DP alternate mode. • Verify if the device required more than 90 W power charging. • USB Type-C interface of device cannot support DP alternate mode. • Set Windows to Projection mode. • Ensure that the USB Type-C cable is not damaged.
No charging when using USB Type-C connection to computer, laptop, and so on	No charging	<ul style="list-style-type: none"> • Verify if the device can support one of 5 V/9 V/15 V/20 V charging profiles. • Verify if the Notebook requires a >90 W power adaptor. • If the Notebook requires a >90 W power adaptor, it may not charge with the USB Type-C connection. • Ensure that you use only Dell approved adapter or the adapter that comes with the product. • Ensure that the USB Type-C cable is not damaged.
Intermittent charging when using USB Type-C connection to computer, laptop, and so on	Intermittent charging	<ul style="list-style-type: none"> • Check if the maximum power consumption of device is over 90 W. • Ensure that you use only Dell approved adapter or the adapter that comes with the product. • Ensure that the USB Type-C cable is not damaged.
No image when using USB Type-C MST	Blank screen or 2nd DUT is not Prime mode	<ul style="list-style-type: none"> • USB Type-C input, Go to OSD menu, under Display Info check the Link Rate is HBR2 or HBR3, if Link Rate is HBR2, suggest to use USB Type-C to DP cable to turn on MST.
No network connection	Network dropped or Intermittent	<ul style="list-style-type: none"> • Do not toggle Off/On the power button when network is connected, keeps the power button On.

Problem	What you experience	Possible solutions
The LAN port is not functioning	OS setting or cable connection issue	<ul style="list-style-type: none"> • Ensure that the latest BIOS and drivers for your computer are installed on your computer. • Ensure that the RealTek Gigabit Ethernet Controller is installed in the Windows Device Manager. • If your BIOS Setup has a LAN/GBE Enabled/Disabled option, make sure it is set to Enabled. • Ensure that the Ethernet cable is connected securely on the monitor and the hub/router/firewall. • Check the status LED of the Ethernet cable to confirm connectivity. Re-connect both ends of the Ethernet cable if the LED is not lit. • First power off the Computer and unplug the Type-C cable and power cord of the monitor. Then, power on the computer, plug in the monitor power cord and Type-C cable.
Monitor buttons (Mute / Volume down / Volume up / Hookswitch) not working with Microsoft Teams® App	Monitor buttons (Mute / Volume down / Volume up / Hookswitch) not working on Microsoft Teams® App with Chrome OS / Ubuntu	<p>Use Microsoft Teams® App to perform the below tasks:</p> <ul style="list-style-type: none"> • Call Icon to accept / hang up call • Volume down / Volume up adjustment • Mic mute / unmute • Video on / off
Video recording not working	Video recording App not working with Win 7	<ul style="list-style-type: none"> • Windows 7 not support • Switch to Windows 10 / Windows 11
Headset with Mic (3.5mm combo jack) not working with monitor mute / unmute button	Headset with Mic (3.5mm combo jack) not working with monitor mute / unmute button	<ul style="list-style-type: none"> • Use UC App (e.g. Microsoft Teams, Skype for Business, Zoom, etc.) Mic Icon to mute / unmute

Contacting Dell

For customers in the United States, call 800-WWW-DELL (800-999-3355).

 **NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.**

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area.

To get online Monitor support content:

See <https://www.dell.com/support/monitors>.

To contact Dell for sales, technical support, or customer service issues:

1. Go to <https://www.dell.com/support>.
2. Verify your country or region in the Choose A Country/Region drop-down menu at the bottom-right corner of the page.
3. Click Contact Us next to the country dropdown.
4. Select the appropriate service or support link based on your need.
5. Choose the method of contacting Dell that is convenient for you.
